The CMHC must demonstrate staff knowledge of emergency procedures. Thereafter, the CMHC must provide emergency preparedness training at least every 2 years. This STANDARD is not met as evidenced by: Based on document review and interviews, the facility failed to ensure direct care staff were adequately trained on the facility's emergency preparedness (EP) plan. The finding is: During review on 5/23/22 of evidence of all staff receiving EP training, it was revealed that only the Director and qualified intellectual disabilities professional (QIDP) were trained on table top exercises on 1/10/22. There was no evidence that staff received orientation on the EP manual or direct care staff participated in EP training. Interview on 5/24/22 with the QIDP and Director revealed that they did not have any documentation that other drills were conducted or direct care staff participated in EP training.	E 037

W 263	Continued From page 5 consent of the guardian. This affected 1 of 4 audit clients (#1). The finding is: Review on 5/24/22 of client #1's record revealed he was admitted to the home on 12/8/21 and had his guardian in attendance at the individual program plan meeting on 2/16/22. An additional review of a psychological note dated 3/25/22, revealed client #1 was started on a trial dose of Prozac 10 mg daily, due to an increase in behaviors. On 4/10/22, a BSP was developed for client #1 to increase his appropriate social behaviors. On 4/12/22, the prescription for Prozac was refilled by the physician assistant (PA) and continued. There was no evidence that the guardian signed a consent to authorize a behavior medication or BSP. Interview on 5/24/22 with the qualified intellectual disabilities professional/registered nurse (QIDP/RN) revealed that the guardian was told about the changes to address client #1's behaviors. The QIDP/RN acknowledged she did not secure a signed written informed consent by the guardian for the BSP.	W 263
