V 291	Continued From page 51  Interview on 8/7/24 with the legal guardian for Client #1 and Client #3 revealed: -"I am aware of (Client #3's) 2 black eyes both were in such a short time period of 2 similar incidents that I am aware of now. I wasn't originally aware of it when it happened. After I had a conversation with a care coordinator, she had mentioned that both [Client #3's] eyes were black, so I was made aware of it after the fact. [QP #1] claimed that she told me, and I have a really good memory and didn't recall being notified. I only found out about the black eyes from the care coordinator. She (Client #3) did not have medical attention on that day, but she did have a scan ordered later (7/8/24) which did come back clear, but I wasn't notified about it when it happened. I would have wanted it done sooner, that's usual protocol if someone hits their head. The pictures that I did see, after the fact, were taken by a family member and they were God awful. They were in different stages of healing, and they are still on my phone. The only way the care coordinator knew about the black eyes was a staff member named [Staff #8] showed her a photo of it on her phone ...I didn't see them on her phone. I only saw the ones taken by a family member which were sent to me last Tuesday (7/30/24) of [Client #3's] eye in the healing stage. There has been a lot going on and [QP #1] has not notified me of a lot of stuff in real time. There's just been so many behaviors in this home (facility) and there's probably a lot that I don't know. There was an incident I believe on June 30th (2024) which was a Sunday and when [Client #3] was taking her medicine, they did the Heimlich maneuver, and they said they took her for an evaluation afterwards, but I wasn't notified until July 3rd (2024), and at that time I was also notified that [Client #3] had went AWOL ...on July 2nd (2024) ...and that was the day she got the	V 291

[Client #3] ...has GI (gastrointestinal) complaints of diarrhea and nausea and hasn't had a colonoscopy in 10 years. We were told she was referred to a GI doctor in [local county], but RHA (Licensee) manages the medical care coordination, and it's difficult getting answers and having questions addressed. This has been pretty typical with the lack of communication with RHA. There seems to be something going on all the time with [Client #3] at the group home, and if I don't speak with the guardian all the time, I won't really know what is going on with her ...The guardian and I were unaware of [Client #3's] increased behaviors, but when I was on the phone with [Client #2's] parents (guardians), they informed me that one of the residents (Client #3) had been throwing items in the home and gave me some insight about the dysfunction of the home (facility).
