DEPARTMENT OF HEALTH AND HUMAN SERVICES  
DIVISION OF HEALTH SERVICE REGULATION

ROY COOPER  
GOVERNOR

MANDY COHEN, MD, MPH  
SECRETARY

MARK PAYNE  
DIRECTOR

November 1, 2018

The Honorable Roy Cooper, Governor  
State of North Carolina  
20301 Mail Service Center  
Raleigh, NC 27699-0301

Dear Governor Cooper:

On behalf of the North Carolina State Health Coordinating Council, I am pleased to forward our recommendations for the North Carolina 2019 State Medical Facilities Plan. This Plan is the culmination of a year's work by the council, its committees and Healthcare Planning staff.

The council has devoted a significant amount of time to the review and discussion of a variety of issues prior to making its recommendations for the upcoming year. The Proposed Plan was disseminated broadly and examined in six public hearings held across the state, and any petitions and comments received during this year-long process were duly considered.

This final document represents the council's recommendations regarding health care needs to be addressed in the 2019 certificate of need reviews.

Sincerely,

A handwritten signature in black ink that reads "Christopher G. Ullrich" with a stylized flourish at the end.

Christopher G. Ullrich, M.D., Chairman  
N.C. State Health Coordinating Council

Enclosure

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

ROY COOPER  
GOVERNOR

MANDY COHEN, MD, MPH  
SECRETARY

### MEMORANDUM

TO: Governor Roy Cooper

FROM: Mandy Cohen, MD, MPH *MC*

SUBJECT: North Carolina 2019 State Medical Facilities Plan

DATE: November 1, 2018

I am forwarding for your review and approval the North Carolina 2019 State Medical Facility Plan (SMFP) as recommended by the North Carolina State Health Coordinating Council (SHCC). Also attached is a summary of the need determinations and summer petitions from the 2018 planning cycle.

I support the SHCC and the implementation of the 2019 SMFP.

Additional background information is available on all areas, if desired. It would greatly facilitate the publication and distribution of the SMFP if you could approve or request changes before the end of November.

MC:ac

## Background

Chapter 1	Overview of the North Carolina 2019 State Medical Facilities Plan	1
Chapter 2	Amendments and Revisions to the State Medical Facilities Plan	7
Chapter 3	Certificate of Need Review Categories and Schedule	13
Chapter 4	Statement of Policies:	17
	Acute Care Hospitals	17
	Technology and Equipment	20
	Nursing Care Facilities	21
	Adult Care Homes	23
	Home Health Services	24
	End-Stage Renal Disease Dialysis Services	25
	All Mental Health, Developmental Disabilities, and Substance Use Disorder Facilities	25
	Psychiatric Inpatient Services Facilities	25
	Intermediate Care Facilities for Individuals with Intellectual Disabilities	26
	All Health Services	28

## Acute Care Facilities and Services

Chapter 5	Acute Care Hospital Beds	33
Chapter 6	Operating Rooms	53
Chapter 7	Other Acute Care Services	99
	Open Heart Surgery Services	99
	Burn Intensive Care Services	102
	Transplantation Services	105
Chapter 8	Inpatient Rehabilitation Services	111

## Technology and Equipment

Chapter 9	Technology and Equipment	115
	Lithotripsy	116
	Gamma Knife	124
	Linear Accelerators	126
	Positron Emission Tomography Scanner	140
	Magnetic Resonance Imaging	148
	Cardiac Catheterization Equipment	173

## Long-Term Care Facilities and Services

Chapter 10	Nursing Care Facilities	187
Chapter 11	Adult Care Homes	217
Chapter 12	Home Health Services	257
Chapter 13	Hospice Services	317
Chapter 14	End-Stage Renal Disease Dialysis Facilities	369
Chapter 15	Psychiatric Inpatient Services	375
Chapter 16	Substance Use Disorder Inpatient and Residential Services (Chemical Dependency Treatment Beds)	385
Chapter 17	Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID)	393

## Appendices

Appendix A:	North Carolina Health Service Areas	407
Appendix B:	Partial Listing of Healthcare Planning Acronyms/Terms	408
Appendix C:	List of Contiguous Counties	410
Appendix D:	North Carolina Certificate of Need Statute	414
Appendix E:	Regulation of Detoxification Services Provided in Hospitals Licensed under Article 5, Chapter 131E, of the General Statutes	435
Appendix F:	Academic Medical Center Teaching Hospitals	436
Appendix G:	Critical Access Hospitals	437

### DISCLAIMER

The North Carolina 2019 State Medical Facilities Plan is subject to revision throughout the year. Notices containing updates and changes will be posted on the North Carolina Division of Health Service Regulation web page at [www2.ncdhhs.gov/dhsr/ncsmfp](http://www2.ncdhhs.gov/dhsr/ncsmfp) as they are approved. Check the website for updates.

# Chapter 1:

Overview of the North Carolina State Medical Facilities Plan

---

# CHAPTER 1

## OVERVIEW OF THE NORTH CAROLINA 2019 STATE MEDICAL FACILITIES PLAN

---

### **Purpose**

The North Carolina 2019 State Medical Facilities Plan (“Plan”) was developed by the North Carolina Department of Health and Human Services, Division of Health Service Regulation, under the direction of the North Carolina State Health Coordinating Council (SHCC), pursuant to G.S. §131E-177. The major objective of the Plan is to provide individuals, institutions, state and local government agencies, and community leadership with policies and projections of need to guide local planning for specific health care facilities and services. Projections of need are provided for the following types of facilities and services:

- ◆ acute care hospitals
- ◆ adult care facilities
- ◆ end-stage renal disease dialysis facilities
- ◆ hospice home care and hospice inpatient beds
- ◆ inpatient rehabilitation facilities
- ◆ intermediate care facilities for individuals with intellectual disabilities
- ◆ Medicare-certified home health agencies
- ◆ nursing care facilities
- ◆ operating rooms
- ◆ other acute care services
- ◆ psychiatric hospital units and specialty hospitals
- ◆ substance use disorder hospital units, specialty hospitals, and residential facilities
- ◆ technology and equipment services

Chapters dealing with specific facility/service categories contain summaries of the supply and the utilization of each type of facility or service, a description of any changes in the projection method and policies from the previous planning year, a description of the projection method, and other data relevant to the projections of need.

The projections of need for the various facilities and services are used in conjunction with other statutes and rules in reviewing certificate of need applications for establishment, expansion, or conversion of health care facilities and services. All parties interested in health care facility and health services planning should consider this Plan a key resource.

## **Basic Principles Governing the Development of this Plan**

### **1. Safety and Quality Basic Principle**

The State of North Carolina recognizes the importance of systematic and ongoing improvement in the quality of health services. Citizens of North Carolina rightfully expect health services to be safe and efficient. To warrant public trust in the regulation of health services, monitoring of safety and quality using established and independently verifiable metrics will be an integral part of the formulation and application of the North Carolina State Medical Facilities Plan.

Scientific quantification of quality and safety is rapidly evolving. Emerging measures of quality address both favorable clinical outcomes and patient satisfaction, while safety measures focus on the elimination of practices that contribute to avoidable injury or death and the adoption of practices that promote and ensure safety. The SHCC recognizes that while safety, clinical outcomes, and satisfaction may be conceptually separable, they are often interconnected in practice. The North Carolina State Medical Facilities Plan should maximize all three elements. Where practicalities require balancing of these elements, priority should be given to safety, followed by clinical outcomes, followed by satisfaction.

The appropriate measures for quality and safety should be specific to the type of facility or service regulated. Clinical outcome and safety measures should be evidence-based and objective. Patient satisfaction measures should be quantifiable. In all cases, metrics should be standardized and widely reported and preference should be given to those metrics reported on a national level. The SHCC recognizes that metrics meeting these criteria are currently better established for some services than for others. Furthermore, experience and research as well as regulation at the federal level will continue to identify new measures that may be incorporated into the standards applicable to quality and safety. As experience with the application of quality and safety metrics grows, the SHCC should regularly review policies and need methodologies and revise them as needed to address any persistent and significant deficiencies in safety and quality in a particular service area.

### **2. Access Basic Principle**

Equitable access to timely, clinically appropriate and high quality health care for all the people of North Carolina is a foundational principle for the formulation and application of the North Carolina State Medical Facilities Plan. Barriers to access include, but are not limited to: geography, low income, limited or no insurance coverage, disability, age, race, ethnicity, culture, language, education and health literacy. Individuals whose access to needed health services is impeded by any of these barriers are medically underserved. The formulation and implementation of the North Carolina State Medical Facilities Plan seeks to reduce all of these types of barriers to timely and appropriate access. The first priority is to ameliorate economic barriers and the second priority is to mitigate time and distance barriers.

The impact of economic barriers is twofold. First, individuals without insurance, with insufficient insurance, or without sufficient funds to purchase their own health care will often require public funding to support access to regulated services. Second, the preferential selection by providers of well-funded patients may undermine the advantages that can accrue to the public from market competition in health care. A competitive marketplace should favor providers that deliver the highest quality and best value care, but only in the circumstances where all competitors deliver like services to similar populations.

The SHCC assigns the highest priority to a need methodology that favors providers delivering services to a patient population representative of all payer types in need of those services in the service area. Comparisons of value and quality are most likely to be valid when services are provided to like populations. Incentives for quality and process improvement, resource maximization, and innovation are most effective when providers deliver services to a similar and representative mixture of patients.

Access barriers of time and distance are especially critical to rural areas and small communities. However, urban populations can experience similar access barriers. The SHCC recognizes that some essential, but unprofitable, medical services may require support by revenues gained from profitable services or other sources. The SHCC also recognizes a trend to the delivery of some services in more accessible, less complex, and less costly settings. Whenever verifiable data for outcome, satisfaction, safety, and costs for the delivery of such services to representative patient populations justify, the SHCC will balance the advantages of such ambulatory facilities with the needs for financial support of medically necessary but unprofitable care.

The needs of rural and small communities that are distant from comprehensive urban medical facilities merit special consideration. In rural and small communities, selective competition that disproportionately captures profitable services may threaten the viability of sole providers of comprehensive care and emergency services. For this reason, methodologies that balance value, quality, and access in urban and rural areas may differ quantitatively. The SHCC planning process will promote access to an appropriate spectrum of health services at a local level, whenever feasible, under prevailing quality and value standards.

### **3. Value Basic Principle**

The SHCC defines health care value as the maximum health care benefit per dollar expended. Disparity between demand growth and funding constraints for health care services increases the need for affordability and value in health services. Maximizing the health benefit for the entire population of North Carolina that is achieved by expenditures for services regulated by the State Medical Facilities Plan will be a key principle in the formulation and implementation of SHCC recommendations for the State Medical Facilities Plan.

Measurement of the cost component of the value equation is often easier than measurement of benefit. Cost per unit of service is an appropriate metric when comparing providers of like services for like populations. The cost basis for some providers may be inflated by disproportionate care to indigent and underfunded patients. In such cases the SHCC encourages the adjustment of cost measures to reflect such disparity, but only to the extent such expenditures can be measured according to an established, state-wide standard that is uniformly reported and verifiable. Measurement of benefit is more challenging. Standardized safety and quality measures, when available, can be important factors in achieving improved value in the provision of health services. Prevention, early detection and early intervention are important means for increasing the total population benefit for health expenditures. Development of new technology has the potential to add value by improving outcome and enhancing early detection. Capital costs of such new technology may be greater but justified by the added population benefit. At the same time, overutilization of more costly and/or highly specialized, low-volume services without evidence-based medical indications may contribute to escalating health costs without commensurate population-based health benefit. The SHCC favors methodologies which encourage technological advances for proven and affordable benefit and appropriate utilization for evidence-based indications when available. The SHCC also recognizes the importance of primary care and health education in promoting affordable health care and best utilization of scarce and expensive health resources. Unfortunately, technologically sophisticated and costly services that benefit small numbers of patients may be more readily pursued than simple and less costly detection and prevention measures that benefit the broader population. In the pursuit of maximum population-based health care value, the SHCC recognizes the potential adverse impact for growth of regulated services to supplant services of broad benefit to the larger population.

Long-term enhancement of health care value will result from a State Medical Facilities Plan that promotes a balance of competition and collaboration and encourages innovation in health care delivery. The SHCC encourages the development of value-driven health care by promoting collaborative efforts to create common resources such as shared health databases, purchasing cooperatives, and shared information management, and by promoting coordinated services that reduce duplicative and conflicting care. The

SHCC also recognizes the importance of balanced competition and market advantage in order to encourage innovation, insofar as those innovations improve safety, quality, access, and value in health care delivery.

**The State Health Planning Process**

Throughout the development of the North Carolina State Medical Facilities Plan there are opportunities for public review and comment. Sections of the Plan, including the policies and methods for projecting need, are developed with the assistance of committees of the North Carolina State Health Coordinating Council. The committees submit their recommendations to the Council for approval. A Proposed Plan is assembled and made available to the public. Public hearings on the Proposed Plan are held throughout the State during the summer. Comments and petitions received during this period are considered by the Council and, upon incorporation of all changes approved by the Council, a final draft of the Plan is presented to the Governor for review and approval. With the Governor’s approval, the State Medical Facilities Plan becomes the official document for health facility and health service planning in North Carolina for the specified calendar year.

**Other Publications**

Information concerning publications or the availability of other data related to the health planning process may be obtained by contacting the North Carolina Division of Health Service Regulation, Healthcare Planning and Certificate of Need Section.

## **Committees and Staff Members**

### **Acute Care Services Committee**

Planning for acute care beds, operating rooms, open heart surgery services, burn intensive care services, transplantation services (bone marrow transplants and solid organ transplants), and inpatient rehabilitation services:

Sandra Greene, DrPH (Chair); Representative Gale Adcock; Christina Apperson (Vice Chair); Allen Feezor; Brian Floyd; Charul G. Haugan, MD, FACEP; Kenneth J. Lewis; Robert B. McBride, Jr., MD

*Staffed by: Andrea Emanuel, PhD*

### **Long-Term and Behavioral Health Committee**

Planning for nursing care facilities, adult care homes, home health services, hospice services, end-stage renal disease dialysis facilities, psychiatric inpatient facilities, substance use disorder inpatient and residential services (chemical dependency treatment beds), and intermediate care facilities for individuals with intellectual disabilities:

Valarie Jarvis (Chair); Glendora Brothers; James Martin, Jr.; Denise M. Michaud (Vice Chair); Jaylan Parikh, MD; Thomas J. Pulliam, MD; Timothy Rogers; Quintana Stewart

*Staffed by: Elizabeth Brown, Andrea Emanuel, PhD, and Kim Ruppel*

### **Technology and Equipment Committee**

Planning for lithotripsy, gamma knife, linear accelerators, positron emission tomography scanners, magnetic resonance imaging scanners, and cardiac catheterization/angioplasty equipment:

Lyndon Jordan, III, MD (Chair); Kelli Collins; Stephen L. DeBiasi, FACHE, CMPE (Vice Chair); Hewitt Fulton; Commissioner Barbara McKoy; Vincent Morgus; Senator Gladys A. Robinson; Christopher G. Ullrich, MD

*Staffed by: Trenesse Michael*

### **Healthcare Planning Staff**

Martha Frisone, Chief, Healthcare Planning and Certificate of Need  
Amy Craddock, PhD, Assistant Chief, Healthcare Planning  
Elizabeth Brown, Planner  
Andrea Emanuel, PhD, Planner  
Trenesse Michael, Planner  
Kim Ruppel, Planner  
Tom Dickson, PhD, Database Manager  
Melinda Boyette, Administrative Assistant

# Chapter 2:

Amendments and Revisions to the State Medical Facilities Plan

---

## **CHAPTER 2**

# **AMENDMENTS AND REVISIONS TO THE STATE MEDICAL FACILITIES PLAN**

---

### **Amendment of Approved Plans**

After the North Carolina State Medical Facilities Plan has been signed by the Governor, it will be amended only as necessary to correct errors or to respond to statutory changes, amounts of legislative appropriations or judicial decisions. The North Carolina State Health Coordinating Council will conduct a public hearing on proposed amendments and will recommend changes it deems appropriate for the Governor's approval.

**NOTE:** Need determinations as shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (*See Chapter 4*).

### **Petitions to Revise the Next State Medical Facilities Plan**

Anyone who finds that the North Carolina State Medical Facilities Plan policies or methodologies, or the results of their application, are inappropriate may petition for changes or revisions. Such petitions are of two general types: those requesting changes in basic policies and methodologies, and those requesting adjustments to the need projections.

### **Petitions for Changes in Basic Policies and Methodologies**

People who wish to recommend changes that may have a statewide effect are asked to contact Healthcare Planning and Certificate of Need Section staff as early in the year as possible, and to submit petitions no later than March 6, 2019. Changes with the potential for a statewide effect are the addition, deletion, and revision of policies or projection methodologies. These types of changes will need to be considered in the first four months of the calendar year as the "Proposed North Carolina State Medical Facilities Plan" (explained below) is being developed.

### **Instructions for Writing Petitions for Changes in Basic Policies and Methodologies**

At a minimum, each written petition requesting a change in basic policies and methodologies used in the North Carolina State Medical Facilities Plan should contain:

1. Name, address, email address and phone number of petitioner.
2. Statement of the requested change, citing the policy or planning methodology in the North Carolina State Medical Facilities Plan for which the change is proposed.
3. Reasons for the proposed change to include:
  - a. A statement of the adverse effects on the providers or consumers of health services that are likely to ensue if the change is not made, and
  - b. A statement of alternatives to the proposed change that were considered and found not feasible.
4. Evidence that the proposed change would not result in unnecessary duplication of health resources in the area.

5. Evidence that the requested change is consistent with the three Basic Principles governing the development of the North Carolina State Medical Facilities Plan: Safety and Quality, Access, and Value.

Each written petition must be clearly labeled “Petition” and one copy of each petition must be received by the North Carolina Division of Health Service Regulation, Healthcare Planning by 5:00 p.m. on March 6, 2019. Petitions must be submitted by e-mail, mail or hand delivery.

**E-Mail:** [DHSR.SMFP.Petitions-Comments@dhhs.nc.gov](mailto:DHSR.SMFP.Petitions-Comments@dhhs.nc.gov)

**Mail:** North Carolina Division of Health Service Regulation  
Healthcare Planning  
2704 Mail Service Center  
Raleigh, North Carolina 27699-2704

The office location and address for hand delivery and use of delivery services:

809 Ruggles Drive  
Raleigh, North Carolina 27603

#### **Response to Petitions for Changes in Basic Policies and Methodologies**

The process for response to such petitions is as follows:

1. The Division will prepare an agency report. Staff may request additional information from the petitioner or any other people or organizations who may be affected by the proposed change.
2. The petition will be considered by the appropriate committee of the North Carolina State Health Coordinating Council and the committee will make recommendations to the North Carolina State Health Coordinating Council regarding disposition of the petition.
3. The North Carolina State Health Coordinating Council will consider the committee’s recommendations and make decisions regarding whether or not to incorporate the changes into the Proposed North Carolina State Medical Facilities Plan.

Petitioners will receive written notification of times and places of meetings at which their petitions will be discussed. Disposition of all petitions for changes in basic policies and methodologies in the North Carolina State Medical Facilities Plan will be made no later than the final Council meeting of the calendar year.

### **Petitions for Adjustments to Need Determinations**

A North Carolina Proposed State Medical Facilities Plan is adopted annually by the North Carolina State Health Coordinating Council, and is made available for review by interested parties during an annual "Public Review and Comment Period." During this period, regional public hearings are held to receive oral/written comments and written petitions. The Public Review and Comment Period for consideration of each North Carolina Proposed State Medical Facilities Plan is determined annually and dates are available from Healthcare Planning and published in the North Carolina State Medical Facilities Plan.

People who believe that unique or special attributes of a particular geographic area or institution give rise to resource requirements that differ from those provided by application of the standard planning procedures and policies may submit a written petition requesting an adjustment be made to the need determination given in the North Carolina Proposed State Medical Facilities Plan. These petitions should be delivered to Healthcare Planning as early in the Public Review and Comment Period as possible, but no later than the last day of this period. Requirements for petitions to change need determinations in the North Carolina Proposed State Medical Facilities Plan are given below.

### **Instructions for Writing Petitions for Adjustments to Need Determinations**

At a minimum, each written petition requesting an adjustment to a need determination in the Proposed State Medical Facilities Plan should contain:

1. Name, address, email address and phone number of petitioner.
2. A statement of the requested adjustment, citing the provision or need determination in the Proposed State Medical Facilities Plan for which the adjustment is proposed.
3. Reasons for the proposed adjustment, including:
  - a. Statement of the adverse effects on the population of the affected area that are likely to ensue if the adjustment is not made, and
  - b. A statement of alternatives to the proposed adjustment that were considered and found not feasible.
4. Evidence that health service development permitted by the proposed adjustment would not result in unnecessary duplication of health resources in the area.
5. Evidence that the requested adjustment is consistent with the three Basic Principles governing the development of the North Carolina State Medical Facilities Plan: Safety and Quality, Access and Value.

Petitioners should use the same service area definitions as provided in the program chapters of the North Carolina Proposed State Medical Facilities Plan.

Petitioners should also be aware that Healthcare Planning staff, in reviewing the proposed adjustment, may request additional information and opinions from the petitioner or any other people and organizations who may be affected by the proposed adjustment.

Each written petition must be clearly labeled “Petition” and one copy of each petition must be received by Healthcare Planning by 5:00 p.m. on July 24, 2019. Petitions must be submitted by e-mail, mail or hand delivery.

**E-Mail:** [DHSR.SMFP.Petitions-Comments@dhhs.nc.gov](mailto:DHSR.SMFP.Petitions-Comments@dhhs.nc.gov)

**Mail:** North Carolina Division of Health Service Regulation  
Healthcare Planning  
2704 Mail Service Center  
Raleigh, North Carolina 27699-2704

The office location and address for hand delivery and use of delivery services:

809 Ruggles Drive  
Raleigh, North Carolina 27603

**Response to Petitions for Adjustments to Need Determinations**

The process for response to these petitions by the North Carolina Division of Health Service Regulation and the North Carolina State Health Coordinating Council is as follows:

1. The Division will prepare an agency report. Staff may request additional information from the petitioner, or other people or organizations who may be affected by the proposed change.
2. Committee submits its recommendations to the North Carolina State Health Coordinating Council and the committee will make recommendations to the North Carolina State Health Coordinating Council regarding disposition of the petition.
3. Consideration of the committee recommendations by the North Carolina State Health Coordinating Council and decisions regarding whether or not to incorporate the recommended adjustments in the final draft of the North Carolina State Medical Facilities Plan to be forwarded to the Governor.

Petitioners will receive written notification of times and places of meetings at which their petitions will be discussed. Disposition of all petitions for adjustments to need determinations in the North Carolina State Medical Facilities Plan will be made no later than the date of the final Council meeting of the calendar year.

## **Scheduled State Health Coordinating Council Meetings and Committee Meetings**

Any changes to Council, Committee, workgroup, and public hearing meeting dates, times, and locations will be posted on the meeting information web page at:

<https://www2.ncdhhs.gov/dhsr/mfp/meetings.html>

All meetings begin at 10:00 a.m. in Room 104 of the Brown Building on the Dorothea Dix Campus, 801 Biggs Drive, Raleigh NC. Directions to the Brown Building can be found at:

<https://www2.ncdhhs.gov/dhsr/brown.html>

## **North Carolina State Health Coordinating Council**

March 6, 2019

May 29, 2019

August 28, 2019

October 2, 2019

**The Council will conduct a public hearing on statewide issues related to development of the North Carolina Proposed 2020 State Medical Facilities Plan immediately following the business meeting on March 6, 2019.**

## **Committee Meetings for 2019**

### **Acute Care Services Committee**

April 9, 2019

May 7, 2019

September 17, 2019

### **Technology and Equipment Committee**

April 17, 2019

May 15, 2019

September 11, 2019

### **Long-Term and Behavioral Health Committee**

April 11, 2019

May 2, 2019

September 5, 2019

**Deadlines for Petitions and Comments, and Public Hearing Schedule**

The deadline for receipt by Healthcare Planning of petitions, written comments and written comments on petitions and comments is 5:00 p.m. on dates listed below.

- March 6, 2019            The Council will conduct a Public Hearing on statewide issues related to Development of the North Carolina Proposed 2020 State Medical Facilities Plan (SMFP) immediately following the business meeting.
- March 21, 2019        Deadline for receipt by Healthcare Planning of any written comments regarding petitions or comments submitted by the March 6<sup>th</sup> deadline on statewide issues related to development of the North Carolina Proposed 2020 State Medical Facilities Plan.

**2019 Schedule of Public Hearings on the N.C. Proposed 2020 SMFP**

(All hearings begin at 1:30 p.m.)

July 10, 2019	Greensboro	Wesley Long Hospital
July 12, 2019	Wilmington	New Hanover County - Main Library
July 16, 2019	Concord	Carolinas HealthCare System NorthEast
July 19, 2019	Asheville	Mission Health System Health Education Center
July 23, 2019	Greenville	Pitt County Office Building
July 24, 2019	Raleigh	Dorothea Dix Campus – Brown Building

July 24, 2019            Deadline for receipt by Healthcare Planning of petitions for adjustments to need determinations and other written comments regarding the North Carolina Proposed 2020 State Medical Facilities Plan.

August 8, 2019        Deadline for receipt by Healthcare Planning of any written comments on petitions or comments submitted by the July 24<sup>th</sup> deadline regarding adjusted need determinations or other issues arising from the North Carolina Proposed 2020 State Medical Facilities Plan.

# Chapter 3:

Certificate of Need Review Categories and Schedule

---

## **CHAPTER 3**

### **CERTIFICATE OF NEED**

### **REVIEW CATEGORIES AND SCHEDULE**

---

Certificates of need are required prior to the development of new institutional health services. Certificate of Need shall determine the appropriate review category or categories in which an application shall be submitted pursuant to 10A NCAC 14C .0202. For proposals which include more than one category, an applicant must contact Certificate of Need prior to submittal of the application for a determination regarding the appropriate review category or categories and the applicable review period in which the proposal must be submitted.

The categories are as follows:

#### **Category A: Acute Care Services**

- new acute care hospitals;
- new or additional campus of an existing acute care hospital;
- new or additional acute care beds;
- relocation of existing or approved acute care beds within the same service area;
- relocation of existing acute care hospital within the same service area;
- new or additional intensive care services;
- new or expanded satellite emergency department;
- offering inpatient dialysis services;
- new transplantation services;
- new open heart surgery services;
- new long-term care hospitals or beds, including conversion of acute care beds to long-term care hospital beds; and
- Policy AC-3 projects.

#### **Category B: Nursing and Adult Care Services**

- new nursing facilities or beds;
- relocation of existing or approved nursing facility beds within the same service area;
- relocation of nursing facility beds pursuant to Policy NH-6;
- transfer of nursing facility beds from state psychiatric hospitals pursuant to Policy NH-5;
- new adult care home facilities or beds;
- relocation of existing or approved adult care home beds within the same service area;
- relocation of adult care home beds to a contiguous county pursuant to Policy LTC-2; and
- new or existing continuing care retirement communities applying pursuant to Policy NH-2 or Policy LTC-1.

### **Category C: Psychiatric, Substance Use Disorder or Intellectual Disability Services**

- new psychiatric facilities or beds;
- relocation of existing or approved psychiatric beds within the same service area;
- transfer of psychiatric beds from state psychiatric hospitals pursuant to Policy PSY-1;
- new substance use disorder facilities or beds;
- relocation of existing or approved substance use disorder beds within the same service area;
- new intermediate care facilities or beds for individuals with intellectual disabilities (ICF/IID);
- relocation of existing or approved ICF/IID beds within the same service area; and
- transfer of ICF/IID beds from state developmental centers pursuant to Chapter 858 of the 1983 Session Laws, Policy ICF/IID-1, Policy ICF/IID-2, Policy ICF/IID-3 or Policy ICF/IID-4.

### **Category D: Dialysis Services**

#### Category D.1

- new certified dialysis stations pursuant to the facility need methodology;
- new kidney disease treatment centers pursuant to the county need methodology; and
- new certified dialysis stations pursuant to the county need methodology.

#### Category D.2

- relocation of existing kidney disease treatment centers;
- relocation of existing certified dialysis stations pursuant to Policy ESRD-2; and
- new kidney disease treatment centers for home hemodialysis or peritoneal dialysis services.

### **Category E: Surgical Services**

- new licensed ambulatory surgical facilities;
- new operating rooms;
- relocation of existing or approved operating rooms within the same service area; and
- relocation of existing ambulatory surgical facility within the same service area.

### **Category F: Home Health and Hospice Services**

- new Medicare-certified home health agencies or offices;
- new hospices or hospice offices;
- new hospice inpatient facility beds;
- relocation of existing or approved hospice inpatient facility beds within the same service area;
- new hospice residential care facility beds; and
- relocation of existing or approved hospice residential care facility beds within the same service area.

### **Category G: Inpatient Rehabilitation Services**

- new inpatient rehabilitation facilities or beds; and
- relocation of existing or approved inpatient rehabilitation beds within the same service area.

### **Category H: Medical Equipment**

- cardiac catheterization equipment or new cardiac catheterization services;
- heart-lung bypass machines;
- gamma knives;
- lithotripters;
- magnetic resonance imaging scanners;
- positron emission tomography scanners
- linear accelerators;
- simulators;
- major medical equipment as defined in G.S. 131E-176(14o);
- diagnostic centers as defined in G.S. 131E-176(7a);
- replacement equipment that does not result in an increase in the inventory of the equipment;
- conversion of an existing or approved fixed PET scanner to mobile pursuant to Policy TE-1 (July 1<sup>st</sup> Review Cycle only);
- intraoperative magnetic resonance scanners acquired pursuant to Policy TE-2; and
- fixed magnetic resonance imaging scanners acquired pursuant to Policy TE-3.

### **Category I: Gastrointestinal Endoscopy Services**

- new or additional gastrointestinal endoscopy rooms as defined in G.S. 131E-176(7d); and
- relocation of existing or approved gastrointestinal endoscopy rooms within the same service area.

### **Category J: Miscellaneous**

- changes of scope and cost overruns;
- reallocation of beds or services pursuant to Policy GEN-1; and
- projects not included in Categories A through I.

**Review Dates**

Table 3A shows the review schedule, by category, for certificate of need applications requiring review. However, a service, facility, or equipment for which a need determination is identified in the North Carolina State Medical Facilities Plan will have only one scheduled review date and one corresponding application filing deadline in the calendar year, even though the table shows multiple review dates for the broad category. In order to determine the designated filing deadline for a specific need determination in the North Carolina State Medical Facilities Plan, an applicant must refer to the applicable need determination table for that service in the related chapter in the Plan. Applications for certificates of need for new institutional health services not specified in other chapters of the Plan shall be reviewed pursuant to the following review schedule, with the exception that no reviews are scheduled if the need determination is zero. Need determinations for additional dialysis stations pursuant to the “county need” or “facility need” methodologies shall be reviewed in accordance with the provisions of Chapter 14.

**In order to give Certificate of Need sufficient time to provide public notice of review and public notice of public hearings as required by G.S. 131E-185, the deadline for filing certificate of need applications is 5:30 p.m. on the 15<sup>th</sup> day of the month preceding the “CON Beginning Review Date.” In instances when the 15<sup>th</sup> day of the month falls on a weekend or holiday, the filing deadline is 5:30 p.m. on the next business day. The filing deadline is absolute and applications received after the deadline shall not be reviewed in that review period. Applicants are strongly encouraged to complete all materials at least one day prior to the filing deadline and to submit material early on the “Certificate of Need Application Due Date.”**

**Table 3A: 2019 Certificate of Need Review Schedule**

<b>CON Beginning Review Date</b>	<b>Category (All HSAs)</b>									
February 1, 2019			C	D.2						
March 1, 2019	A	B			E	F	G	H	I	J
April 1, 2019			C	D.1						
May 1, 2019	A	B			E	F	G	H		J
June 1, 2019			C	D.2					I	
July 1, 2019	A				E	F	G	H		J
August 1, 2019		B	C	D.2						
September 1, 2019	A		C		E			H	I	J
October 1, 2019				D.1			G			
November 1, 2019	A	B			E	F		H		J
December 1, 2019				D.2				H	I	J

# Chapter 4:

## Statement of Policies:

- Acute Care Hospitals
- Technology and Equipment
- Nursing Care Facilities
- Adult Care Homes
- Home Health Services
- End-Stage Renal Disease Dialysis Services
- Mental Health, Intellectual Disabilities, and Substance Use Disorder (General)
- Psychiatric Inpatient Services Facilities
- Intermediate Care Facilities for Individuals with Intellectual Disabilities
- All Health Services

---

## CHAPTER 4

### STATEMENT OF POLICIES

---

#### **Summary of Policy Changes for 2019**

Two new policies are incorporated into the North Carolina 2019 State Medical Facilities Plan by recommendation of the State Health Coordinating Council. **Policy LTC-3 (Certification of Beds for Special Assistance)** addresses requirements regarding State-County Special Assistance certification and projected utilization for new adult care home beds. **Policy ICF/IID-4 (Transfer of ICF/IID Beds from State Operated Developmental Centers Pursuant to Session Law 1983 House Bill 1395)** sets out the conditions for transferring beds from state operated developmental centers to community-based facilities. Policies LTC-1 and LTC-2 had minor changes as a result of revision of the adult care home methodology. Finally, Policy HH-3 had a minor change.

---

### **POLICIES APPLICABLE TO ACUTE CARE HOSPITALS (AC)**

---

#### **Policy AC-1: Use of Licensed Bed Capacity Data for Planning Purposes**

For planning purposes, the number of licensed beds shall be determined by the Division of Health Service Regulation in accordance with standards found in 10A NCAC 13B - Section .6200 and Section .3102 (d).

Licensed bed capacity of each hospital is used for planning purposes. It is the hospital's responsibility to notify the Division of Health Service Regulation promptly when any of the space allocated to its licensed bed capacity is converted to another use, including purposes not directly related to health care.

#### **Policy AC-3: Exemption from Plan Provisions for Certain Academic Medical Center Teaching Hospital Projects**

Projects for which certificates of need are sought by Academic Medical Center Teaching Hospitals may qualify for exemption from the need determinations of this document. The Healthcare Planning and Certificate of Need Section shall designate as an Academic Medical Center Teaching Hospital any facility whose application for such designation demonstrates the following characteristics of the hospital:

1. Serves as a primary teaching site for a school of medicine and at least one other health professional school, providing undergraduate, graduate and postgraduate education.
2. Houses extensive basic medical science and clinical research programs, patients and equipment.
3. Serves the treatment needs of patients from a broad geographic area through multiple medical specialties.

Exemption from the provisions of need determinations of the North Carolina State Medical Facilities Plan shall be granted to projects submitted by Academic Medical Center Teaching Hospitals designated prior to January 1, 1990 provided the projects are necessary to meet one of the following unique academic medical needs:

1. Necessary to complement a specified and approved expansion of the number or types of students, residents or faculty that are specifically required for an expansion of students or residents, as certified by the head of the relevant associated professional school; the applicant shall provide documentation that the project is consistent with any relevant standards, recommendations or guidance from specialty education accrediting bodies; or
2. With respect to the acquisition of equipment, is necessary to accommodate the recruitment or retention of a full-time faculty member who will devote a majority of his or her time to the combined activities of teaching (including teaching within the clinical setting), research, administrative or other academic responsibilities within the academic medical center teaching hospital or medical school; or
3. Necessary to accommodate patients, staff or equipment for a specified and approved expansion of research activities, as certified by the head of the entity sponsoring the research; and including, to the extent applicable, documentation pertaining to grants, funding, accrediting or other requirements, and any proposed clinical application of the asset; or
4. Necessary to accommodate changes in requirements of specialty education accrediting bodies, as evidenced by copies of documents issued by such bodies.

A project submitted by an Academic Medical Center Teaching Hospital under this policy that meets one of the above conditions shall demonstrate that the Academic Medical Center Teaching Hospital's teaching or research need for the proposed project cannot be achieved effectively at any non-Academic Medical Center Teaching Hospital provider which currently offers and has capacity within the service for which the exemption is requested and which is within 20 miles of the Academic Medical Center Teaching Hospital.

The Academic Medical Center Teaching Hospital shall include in its application an analysis of the cost, benefits and feasibility of engaging that provider in a collaborative effort that achieves the academic goals of the project as compared with the certificate of need application proposal. The Academic Medical Center Teaching Hospital shall also provide a summary of a discussion or documentation of its attempt to engage the provider in discussion regarding its analysis and conclusions.

The Academic Medical Center Teaching Hospital shall include in its application a discussion of any similar assets within 20 miles that are under the control of the applicant or the associated professional school and the feasibility of using those assets to meet the unique teaching or research needs of the Academic Medical Center Teaching Hospital.

For each of the first five years of operation the approved applicant shall submit to Certificate of Need a detailed description of how the project achieves the academic requirements of the appropriate section(s) of Policy AC-3, paragraph 2 [items 1 through 4] as proposed in the certificate of need application.

Applicants who are approved for Policy AC-3 projects after January 1, 2012 shall report those Policy AC-3 assets (including beds, operating rooms and equipment) on the appropriate annual license renewal application or registration form for the asset. The information to be reported for the Policy AC-3 assets shall include: (a) inventory or number of units of AC-3 Certificate of Need-approved assets (including all beds, operating rooms and equipment); (b) the annual volume of days, cases or procedures performed for the reporting year on the Policy AC-3 approved asset; and (c) the patient origin by county. Except for operating rooms, neither the assets under (a) above nor the utilization from (b) above shall be used in the annual State Medical Facilities Plan need determination formulas, but both the assets and the utilization will be available for informational purposes to users of the State Medical Facilities Plan. Operating rooms

approved under Policy AC-3 and their utilization shall be reported on the license renewal application and included in the inventory, regardless of the date of Certificate of Need approval.

This policy does not apply to a proposed project or the portion thereof that is based solely upon the inability of the State Medical Facilities Plan methodology to accurately project need for the proposed service(s), due to documented differences in patient treatment times that are attributed to education or research components in the delivery of patient care or to differences in patient acuity or case mix that are related to the applicant’s academic mission. However, the applicant may submit a petition pursuant to the State Medical Facilities Plan Petitions for Adjustments to Need Determinations process to meet that need or portion thereof.

Policy AC-3 projects are required to materially comply with representations made in the certificate of need application regarding academic based need. If an asset originally developed or acquired pursuant to Policy AC-3 is no longer used for research and/or teaching, the Academic Medical Center Teaching Hospital shall surrender the certificate of need.

**Policy AC-4: Reconversion to Acute Care**

Facilities that have redistributed beds from acute care bed capacity to psychiatric, rehabilitation, nursing care, or long-term care hospital use, shall obtain a certificate of need to convert this capacity back to acute care. Applicants proposing to reconvert psychiatric, rehabilitation, nursing care, or long-term care hospital beds back to acute care beds shall demonstrate that the hospital’s average annual utilization of licensed acute care beds as calculated using the most recent Truven Health Analytics Days of Care as provided to Healthcare Planning by The Cecil G. Sheps Center for Health Services Research at the University of North Carolina at Chapel Hill is equal to or greater than the target occupancies shown below, but shall not be evaluated against the acute care bed need determinations shown in Chapter 5 of the North Carolina State Medical Facilities Plan. In determining utilization rates and average daily census, only acute care bed “days of care” are counted.

<b>Facility Average Daily Census</b>	<b>Target Occupancy of Licensed Acute Care Beds</b>
1 – 99	66.7%
100 – 200	71.4%
Greater than 200	75.2%

**Policy AC-5: Replacement of Acute Care Bed Capacity**

Proposals for either partial or total replacement of acute care beds (i.e., construction of new space for existing acute care beds) shall be evaluated against the utilization of the total number of acute care beds in the applicant’s hospital in relation to utilization targets found below. For hospitals **not** designated by the Centers for Medicare & Medicaid Services as Critical Access Hospitals, in determining utilization of acute care beds, only acute care bed “days of care” shall be counted. For hospitals designated by the Centers for Medicare & Medicaid Services as Critical Access Hospitals, in determining utilization of acute care beds, only acute care bed “days of care” **and** swing bed days (i.e., nursing facility days of care) shall be counted in determining utilization of acute care beds. Any hospital proposing replacement of acute care beds must clearly demonstrate the need for maintaining the acute care bed capacity proposed within the application. Additionally, if the hospital is a Critical Access Hospital and swing bed days are proposed to be counted in determining utilization of acute care beds, the hospital shall also propose to remain a Critical Access Hospital and must demonstrate the need for maintaining the swing bed capacity proposed within the application. If the Critical Access Hospital does not propose to remain a Critical Access Hospital, only

acute care bed “days of care” shall be counted in determining utilization of acute care beds and the hospital must clearly demonstrate the need for maintaining the acute care bed capacity proposed within the application.

<b>Facility Average Daily Census</b>	<b>Target Occupancy of Licensed Acute Care Beds</b>
1 – 99	66.7%
100 – 200	71.4%
Greater than 200	75.2%

**Policy AC-6: Heart-Lung Bypass Machines for Emergency Coverage**

To protect cardiac surgery patients, who may require emergency procedures while scheduled procedures are underway, a need is determined for one additional heart-lung bypass machine whenever a hospital is operating an open heart surgery program with only one heart-lung bypass machine. The additional machine is to be used to assure appropriate coverage for emergencies and in no instance shall this machine be scheduled for use at the same time as the machine used to support scheduled open heart surgery procedures. A certificate of need application for a machine acquired in accordance with this provision shall be exempt from compliance with the performance standards set forth in 10A NCAC 14C .1703.

**POLICIES APPLICABLE TO TECHNOLOGY AND EQUIPMENT (TE)**

**Policy TE-1: Conversion of Fixed Pet Scanners to Mobile Pet Scanners**

Facilities with an existing or approved fixed PET scanner may apply for a Certificate of Need (CON) to convert the existing or approved fixed PET scanner to a mobile PET scanner if the applicant(s) demonstrates in the CON application that the converted mobile PET scanner:

1. Shall continue to operate as a mobile PET scanner at the facility, including satellite campuses, where the fixed PET scanner is located or was approved to be located.
2. Shall be moved at least weekly to provide services at two or more host facilities<sup>1</sup>.
3. Shall not serve any mobile host site that is not owned by the PET certificate holder or an entity related to the PET certificate holder such as a parent or subsidiary that is located in the county where any existing or approved fixed PET scanner is located, except as required by subpart (1).

There will be one certificate of need application filing opportunity each calendar year.

<sup>1</sup> The council recommended the revision of the current East and West service areas to a statewide service area to allow flexibility in servicing mobile PET sites.

**Policy TE-2: Intraoperative Magnetic Resonance Scanners**

Qualified applicants may apply for an intraoperative Magnetic Resonance Scanner (iMRI) to be used in an operating room suite.

To qualify, the health service facility proposing to acquire the iMRI scanner shall demonstrate in its certificate of need application that it is a licensed acute care hospital which:

1. Performed at least 500 inpatient neurosurgical cases during the 12 months immediately preceding the submission of the application; and
2. Has at least two neurosurgeons that perform intracranial surgeries currently on its Active Medical Staff; and
3. Is located in a metropolitan statistical area as defined by the US Census Bureau with at least 350,000 residents.

The iMRI scanner shall not be used for outpatients and may not be replaced with a conventional MRI scanner.

The performance standards in 10A NCAC 14C .2703 would not be applicable.

Intraoperative procedures and inpatient procedures performed on the iMRI shall be reported separately on the Hospital License Renewal Application.

These scanners shall not be counted in the inventory of fixed MRI scanners; the procedures performed on the iMRI will not be used in calculating the need methodology and will be reported in a separate table in Chapter 9.

**Policy TE-3: Plan Exemption for Fixed Magnetic Resonance Imaging Scanners**

Qualified applicants may apply for a fixed magnetic resonance imaging scanner (MRI).

To qualify, the health service facility proposing to acquire the fixed MRI scanner shall demonstrate in its certificate of need application that it is a licensed North Carolina acute care hospital with emergency care coverage 24 hours a day, seven days a week and that does not currently have an existing or approved fixed MRI scanner as reflected in the inventory in the applicable State Medical Facilities Plan.

The applicant shall demonstrate that the proposed fixed MRI scanner will perform at least 850 weighted MRI procedures during the third full operating year.

The performance standards in 10A NCAC 14C .2703 would not be applicable.

The fixed MRI scanner must be located on the hospital's "main campus" as defined in G.S. 131E-176-(14n)a.

---

## **POLICIES APPLICABLE TO NURSING CARE FACILITIES (NH)**

---

**Policy NH-2: Plan Exemption for Continuing Care Retirement Communities**

Qualified continuing care retirement communities may include from the outset or add or convert bed capacity for nursing care without regard to the nursing care bed need shown in Chapter 10: Nursing Care Facilities. To qualify for such exemption, applications for certificates of need shall show that the proposed nursing care bed capacity:

1. Will only be developed concurrently with or subsequent to construction on the same site of facilities for both of the following levels of care:
  - a. independent living accommodations (apartments and homes) for people who are able to carry out normal activities of daily living without assistance; such accommodations may be in the form of apartments, flats, houses, cottages and rooms;
  - b. licensed adult care home beds for use by people who, because of age or disability, require some personal services, incidental medical services and room and board to assure their safety and comfort.
2. Will be used exclusively to meet the needs of people with whom the facility has continuing care contracts (in compliance with the North Carolina Department of Insurance statutes and rules) who have lived in a non-nursing unit of the continuing care retirement community for a period of at least 30 days. Exceptions shall be allowed when one spouse or sibling is admitted to the nursing unit at the time the other spouse or sibling moves into a non-nursing unit, or when the medical condition requiring nursing care was not known to exist or be imminent when the individual became a party to the continuing care contract.
3. Reflects the number of nursing care beds required to meet the current or projected needs of residents with whom the facility has an agreement to provide continuing care after making use of all feasible alternatives to institutional nursing care.
4. Will not be certified for participation in the Medicaid program.

One hundred percent of the nursing care beds developed under this exemption shall be excluded from the inventory and the occupancy rate used to project nursing care bed need for the general population. Certificates of need issued under policies analogous to this policy in the North Carolina State Medical Facilities Plans subsequent to the 1985 State Medical Facilities Plan are automatically amended to conform to the provisions of this policy at the effective date of this policy. Certificates of need awarded pursuant to the provisions of Chapter 920, Session Laws 1983 or Chapter 445, Session Laws 1985 shall not be amended.

**Policy NH-5: Transfer of Nursing Facility Beds from State Psychiatric Hospital Nursing Facilities to Community Facilities**

Beds in state psychiatric hospitals that are certified as nursing facility beds may be relocated to licensed nursing facilities. However, before nursing facility beds are transferred out of the state psychiatric hospitals, services shall be available in the community. State psychiatric hospital nursing facility beds that are relocated to licensed nursing facilities shall be closed within 90 days following the date the transferred beds become operational in the community.

Licensed nursing facilities proposing to operate transferred nursing facility beds shall commit to serve the type of residents who are normally placed in nursing facility beds at the state psychiatric hospitals. To help ensure that relocated nursing facility beds will serve those people who would have been served by state psychiatric hospitals in nursing facility beds, a certificate of need application to transfer nursing facility beds from a state hospital shall include a written memorandum of agreement between the director of the applicable state psychiatric hospital, the director of the North Carolina Division of State Operated Healthcare Facilities, the secretary of the North Carolina Department of Health and Human Services, and the person submitting the proposal.

This policy does not allow the development of new nursing care beds. Nursing care beds transferred from state psychiatric hospitals to the community pursuant to Policy NH-5 shall be excluded from the inventory.

**Policy NH-6: Relocation of Nursing Facility Beds**

Relocations of existing licensed nursing facility beds are allowed. Certificate of need applicants proposing to relocate licensed nursing facility beds shall:

1. Demonstrate that the proposal shall not result in a deficit, or increase an existing deficit in the number of licensed nursing facility beds in the county that would be losing nursing facility beds as a result of the proposed project, as reflected in the North Carolina State Medical Facilities Plan in effect at the time the certificate of need review begins; and
2. Demonstrate that the proposal shall not result in a surplus, or increase an existing surplus of licensed nursing facility beds in the county that would gain nursing facility beds as a result of the proposed project, as reflected in the North Carolina State Medical Facilities Plan in effect at the time the certificate of need review begins.

**Policy NH-8: Innovations in Nursing Facility Design**

Certificate of need applicants proposing new nursing facilities and replacement nursing facilities shall pursue innovative approaches in environmental design that address quality of care and quality of life needs of the residents. These plans could include innovative design elements that encourage less institutional, more home-like settings, privacy, autonomy and resident choice, among others.

---

**POLICIES APPLICABLE TO ADULT CARE HOMES (LTC)**

---

**Policy LTC-1: Plan Exemption for Continuing Care Retirement Communities – Adult Care Home Beds**

Qualified continuing care retirement communities may include from the outset or add or convert bed capacity for adult care without regard to the adult care home bed need shown in Chapter 11: Adult Care Homes. To qualify for such exemption, applications for certificates of need shall show that the proposed adult care home bed capacity:

1. Will only be developed concurrently with, or subsequent to, construction on the same site of independent living accommodations (apartments and homes) for people who are able to carry out normal activities of daily living without assistance; such accommodations may be in the form of apartments, flats, houses, cottages, and rooms.
2. Will provide for the provision of nursing services, medical services or other health related services as required for licensure by the North Carolina Department of Insurance.
3. Will be used exclusively to meet the needs of people with whom the facility has continuing care contracts (in compliance with the North Carolina Department of Insurance statutes and rules) who have lived in a non-nursing or adult care unit of the continuing care retirement community for a period of at least 30 days. Exceptions shall be allowed when one spouse or sibling is admitted to the adult care home unit at the time the other spouse or sibling moves into a non-nursing or adult care unit, or when the medical condition requiring nursing or adult care home care was not known to exist or be imminent when the individual became a party to the continuing care contract.

4. Reflects the number of adult care home beds required to meet the current or projected needs of residents with whom the facility has an agreement to provide continuing care after making use of all feasible alternatives to institutional adult care home care.
5. Will not participate in the Medicaid program or serve State-County Special Assistance recipients.

One hundred percent of the adult care home beds developed under this exemption shall be excluded from the inventory used to project adult care home bed need for the general population. Certificates of need issued under policies analogous to this policy in the North Carolina State Medical Facilities Plans subsequent to the North Carolina 2002 State Medical Facilities Plan are automatically amended to conform with the provisions of this policy at the effective date of this policy.

**Policy LTC-2: Relocation of Adult Care Home Beds**

Relocations of existing licensed adult care home beds are allowed to another service area. Certificate of need applicants proposing to relocate licensed adult care home beds to another service area shall:

1. Demonstrate that the proposal shall not result in a deficit, or increase an existing deficit in the number of licensed adult care home beds in the county that would be losing adult care home beds as a result of the proposed project, as reflected in the North Carolina State Medical Facilities Plan in effect at the time the certificate of need review begins; and
2. Demonstrate that the proposal shall not result in a surplus, or increase an existing surplus of licensed adult care home beds in the county that would gain adult care home beds as a result of the proposed project, as reflected in the North Carolina State Medical Facilities Plan in effect at the time the certificate of need review begins.

**Policy LTC-3: Certification of Beds for Special Assistance**

Certificate of need applicants proposing to develop new adult care home beds pursuant to a need determination shall demonstrate that the proposed beds will be certified for special assistance and that at least 5 percent of the projected days of care in the third full fiscal year of operation shall be provided to residents receiving State-County Special Assistance.

---

**POLICIES APPLICABLE TO HOME HEALTH SERVICES (HH)**

---

**Policy HH-3: Need Determination for Medicare-Certified Home Health Agency in a County**

When a county<sup>1</sup> has no Medicare-certified home health agency office physically located within the county's borders, and the county has a population of more than 20,000 people; or, if the county has a population of less than 20,000 people and there is not an existing Medicare-certified home health agency office located in a North Carolina county within 20 miles, need for a new Medicare-certified home health agency office in the county is thereby established through this policy. The need determination shall be reflected in the *next* annual North Carolina State Medical Facilities Plan that is published following determination that a county meets the criteria indicated above. (Population is based on population estimates/projections from the North Carolina Office of State Budget and Management for the plan year in which the need

determination would be made excluding active duty military for any county with more than 500 active duty military personnel. The measurement of 20 miles will be in a straight line from the closest point on the county line of the county in which an existing agency office is located to the county seat of the county in which there is no agency.)

---

## **POLICIES APPLICABLE TO END-STAGE RENAL DISEASE DIALYSIS SERVICES (ESRD)**

---

### **Policy ESRD-2: Relocation of Dialysis Stations**

Relocations of existing dialysis stations are allowed only within the host county and to contiguous counties. Certificate of need applicants proposing to relocate dialysis stations to a contiguous county shall:

1. Demonstrate that the facility losing dialysis stations or moving to a contiguous county is currently serving residents of that contiguous county; and
2. Demonstrate that the proposal shall not result in a deficit, or increase an existing deficit in the number of dialysis stations in the county that would be losing stations as a result of the proposed project, as reflected in the most recent North Carolina Semiannual Dialysis Report, and
3. Demonstrate that the proposal shall not result in a surplus, or increase an existing surplus of dialysis stations in the county that would gain stations as a result of the proposed project, as reflected in the most recent North Carolina Semiannual Dialysis Report.

---

## **POLICIES APPLICABLE TO ALL MENTAL HEALTH, DEVELOPMENTAL DISABILITIES AND SUBSTANCE USE DISORDER FACILITIES (MH)**

---

### **Policy MH-1: Linkages between Treatment Settings**

An applicant for a certificate of need for psychiatric, substance use disorder or intermediate care facilities for individuals with intellectual disabilities (ICF/IID) beds shall document that the affected local management entity-managed care organization has been contacted and invited to comment on the proposed services.

---

## **POLICIES APPLICABLE TO PSYCHIATRIC INPATIENT SERVICES FACILITIES (PSY)**

---

### **Policy PSY-1: Transfer of Beds from State Psychiatric Hospitals to Community Facilities**

Beds in the state psychiatric hospitals used to serve short-term psychiatric patients may be relocated to community facilities through the certificate of need process. However, before beds are transferred out of the state psychiatric hospitals, services and programs shall be available in the community. State psychiatric

hospital beds that are relocated to community facilities shall be closed within 90 days following the date the transferred beds become operational in the community.

Facilities proposing to operate transferred beds shall submit an application to Certificate of Need of the North Carolina Department of Health and Human Services and commit to serve the type of short-term patients normally placed at the state psychiatric hospitals. To help ensure that relocated beds will serve those people who would have been served by the state psychiatric hospitals, a proposal to transfer beds from a state hospital shall include a written memorandum of agreement between the local management entity-managed care organization serving the county where the beds are to be located, the secretary of the North Carolina Department of Health and Human Services, and the person submitting the proposal.

---

## **POLICIES APPLICABLE TO INTERMEDIATE CARE FACILITIES FOR INDIVIDUALS WITH INTELLECTUAL DISABILITIES (ICF/IID)**

---

### **Policy ICF/IID-1: Transfer of ICF/IID Beds from State Operated Developmental Centers to Community Facilities for Medically Fragile Children**

Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID) beds in state operated developmental centers may be relocated to community facilities through the certificate of need process for the establishment of community ICF/IID facilities to serve children ages birth through six years who have severe to profound developmental disabilities and are medically fragile. This policy allows for the relocation or transfer of beds only and does not provide for transfer of residents with the beds. State operated developmental center ICF/IID beds that are relocated to community facilities shall be closed upon licensure of the transferred beds.

Facilities proposing to operate transferred beds shall submit an application to Certificate of Need demonstrating a commitment to serve children ages birth through six years who have severe to profound developmental disabilities and are medically fragile. To help ensure the relocated beds will serve these residents such proposal shall include a written agreement with the following representatives: director of the local management entity/managed care organization serving the county where the group home is to be located, the director of the applicable state operated developmental center, the director of the North Carolina Division of State Operated Healthcare Facilities, the secretary of the North Carolina Department of Health and Human Services and the operator of the group home.

### **Policy ICF/IID-2: Transfer of ICF/IID Beds from State Operated Developmental Centers to Community Facilities for Individuals Who Currently Occupy the Beds**

Existing certified Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID) beds in state operated developmental centers may be transferred through the certificate of need process to establish ICF/IID group homes in the community to serve people with complex behavioral challenges and/or medical conditions for whom a community ICF/IID placement is appropriate, as determined by the individual's treatment team and with the individual/guardian being in favor of the placement. This policy requires the transfer of the individuals who currently occupy the ICF/IID beds in the developmental center to the community facility when the beds are transferred. The beds in the state operated developmental center shall be closed upon certification of the transferred ICF/IID beds in the community facility. Providers proposing to develop transferred ICF/IID beds, as those beds are described in this policy, shall submit an application to Certificate of Need that demonstrates their clinical experience in treating individuals with complex behavioral challenges or medical conditions in a residential ICF/IID setting. To ensure the transferred beds will be used to serve these individuals, a written agreement between the following parties

shall be obtained prior to development of the group home: director of the local management entity-managed care organization serving the county where the group home is to be located, the director of the applicable developmental center, the director of the North Carolina Division of State Operated Healthcare Facilities, the secretary of the North Carolina Department of Health and Human Services and the operator of the group home.

**Policy ICF/IID-3: Transfer of ICF/IID Beds from State Operated Developmental Centers to Community Facilities for Adults with Severe to Profound Developmental Disabilities**

Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID) beds in state operated developmental centers may be relocated to existing community facilities through the certificate of need process for the replacement of Community Alternatives Program for Individuals with Intellectual and Developmental Disabilities (CAP I/DD) waiver slots lost as a result of the Centers for Medicaid and Medicare Services (CMS) policy designed to prohibit CAP I/DD waiver and ICF/IID beds from being located on the same campus. This policy allows for the relocation or transfer of beds only and does not provide for transfer of residents with the beds. State operated developmental center ICF/IID beds that are relocated to community facilities shall be closed upon licensure of the transferred beds.

Facilities proposing to operate transferred beds shall submit an application to Certificate of Need demonstrating a commitment to serve adults who have severe to profound developmental disabilities. This policy applies only to facilities that have lost waiver slots as a result of the CMS ruling and does not apply for expansion beyond the lost beds. To help ensure the relocated beds will serve these residents such proposal shall include a written agreement with the following representatives: director of the local management entity/managed care organization serving the county where the community-based facility is located, the director of the applicable state operated developmental center, the director of the North Carolina Division of State Operated Healthcare Facilities, the secretary of the North Carolina Department of Health and Human Services and the operator of the community-based facility.

**Policy ICF/IID-4: Transfer of ICF/IID Beds from State Operated Developmental Centers Pursuant to Session Law 1983 House Bill 1395**

Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID) beds in state operated developmental centers may be relocated to community facilities pursuant to Session Law 1983 House Bill 1395. The applicant shall include in its certificate of need application a signed written agreement with the Director of the state operated developmental center, the Division of Mental Health, Developmental Disabilities and Substance Abuse Services in the Department of Health and Human Services, and the Secretary of the Department of Health and Human Services. Certificate of need applicants shall demonstrate the following in the application:

1. The maximum number of beds in the facility upon completion of the project will not exceed 15 beds.
2. The projected per diem operating costs are no more than the per diem operating cost in the state operated developmental center.
3. All beds transferred from the state operated developmental center pursuant to this policy shall be utilized for a period of at least 12 months for the transfer of clients from the state operated developmental center to the community facility, after which fifty percent (50 percent) of the transferred beds may be utilized for non-institutional clients.

---

## **POLICIES APPLICABLE TO ALL HEALTH SERVICES (GEN)**

---

The policy statements below apply to all health services including acute care (hospitals, ambulatory surgical facilities, operating rooms, rehabilitation facilities, and technology); long-term care (nursing homes, adult care homes, Medicare-certified home health agencies, end-stage renal disease services and hospice services); mental health (psychiatric facilities, substance use disorder facilities, and ICF/IID) and services and equipment including bone marrow transplantation services, burn intensive care services, neonatal intensive care services, open heart surgery services, solid organ transplantation services, cardiac catheterization equipment, heart-lung bypass machines, gamma knives, linear accelerators, lithotripters, magnetic resonance imaging scanners, positron emission tomography scanners, simulators, major medical equipment as defined in G.S. 131E-176(14o), and diagnostic centers as defined in G.S. 131E-176(7a).

### **Policy GEN-1: Reallocations**

1. Reallocations shall be made only to the extent that the methodologies used in this Plan to make need determinations indicate that need exists after the inventories are revised and the need determinations are recalculated.
2. Beds or services which are reallocated once in accordance with this policy shall not be reallocated again. Rather, Healthcare Planning shall make any necessary changes in the next annual North Carolina State Medical Facilities Plan.
3. Dialysis stations that are withdrawn, relinquished, not applied for, decertified, denied, appealed, or pending the expiration of the 30-day appeal period shall not be reallocated. Instead, any necessary redetermination of need shall be made in the next scheduled publication of the North Carolina Semiannual Dialysis Report.
4. Appeals of Certificate of Need Decisions on Applications  
Need determinations of beds or services for which Certificate of Need decision to approve or deny the application has been appealed shall not be reallocated until the appeal is resolved.
  - a. Appeals resolved prior to August 17:  
If such an appeal is resolved in the calendar year prior to August 17, the beds or services shall not be reallocated by Certificate of Need; rather Healthcare Planning shall make the necessary changes in the next annual North Carolina State Medical Facilities Plan except for dialysis stations which shall be processed pursuant to Item 3.
  - b. Appeals resolved on or after August 17:  
If such an appeal is resolved on or after August 17 in the calendar year, the beds or services, except for dialysis stations, shall be made available for a review period to be determined by Certificate of Need, but beginning no earlier than 60 days from the date that the appeal is resolved. Notice shall be mailed by Certificate of Need to all people on the mailing list for the North Carolina State Medical Facilities Plan, no less than 45 days prior to the due date for receipt of new applications.
5. Withdrawals and Relinquishments  
Except for dialysis stations, a need determination for which a certificate of need is issued, but is subsequently withdrawn or relinquished, is available for a review period to be determined by Certificate of Need, but beginning no earlier than 60 days from:

- a. the last date on which an appeal of the notice of intent to withdraw the certificate could be filed if no appeal is filed;
- b. the date on which an appeal of the withdrawal is finally resolved against the holder; or
- c. the date that Certificate of Need receives from the holder of the certificate of need notice that the certificate has been voluntarily relinquished.

Notice of the scheduled review period for the reallocated services or beds shall be mailed by Certificate of Need to all people on the mailing list for the North Carolina State Medical Facilities Plan, no less than 45 days prior to the due date for submittal of the new applications.

6. Need Determinations for which No Applications are Received

- a. Services or beds with scheduled review in the calendar year on or before September 1: Certificate of Need shall not reallocate the services or beds in this category for which no applications were received, because Healthcare Planning will have sufficient time to make any necessary changes in the determinations of need for these services or beds in the next annual North Carolina State Medical Facilities Plan, except for dialysis stations.
- b. Services or beds with scheduled review in the calendar year after September 1: Except for dialysis stations, a need determination in this category for which no application has been received by the last due date for submittal of applications shall be available to be applied for in the second Category J review period in the next calendar year for the applicable Health Service Area. Notice of the scheduled review period for the reallocated beds or services shall be mailed by Healthcare Planning and Certificate of Need Section to all people on the mailing list for the North Carolina State Medical Facilities Plan, no less than 45 days prior to the due date for submittal of new applications.

7. Need Determinations not Awarded because Application Disapproved

- a. Disapproval in the calendar year prior to August 17:  
Need determinations or portions of such need for which applications were submitted but disapproved by Certificate of Need before August 17, shall not be reallocated by Certificate of Need. Instead Healthcare Planning shall make the necessary changes in the next annual North Carolina State Medical Facilities Plan if no appeal is filed, except for dialysis stations.
- b. Disapproval in the calendar year on or after August 17:  
Need determinations or portions of such need for which applications were submitted but disapproved by Certificate of Need on or after August 17, shall be reallocated by Certificate of Need, except for dialysis stations. A need in this category shall be available for a review period to be determined by Certificate of Need but beginning no earlier than 95 days from the date the application was disapproved, if no appeal is filed. Notice of the scheduled review period for the reallocation shall be mailed by the Healthcare Planning and Certificate of Need Section to all people on the mailing list for the North Carolina State Medical Facilities Plan no less than 80 days prior to the due date for submittal of the new applications.

8. Reallocation of Decertified Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID) Beds

If an ICF/IID facility's Medicaid certification is relinquished or revoked, the ICF/IID beds in the facility may be reallocated by the North Carolina Department of Health and Human Services, Division of Health Service Regulation, Healthcare Planning after consideration of recommendations from the North Carolina Division of Mental Health, Developmental Disabilities, and Substance Abuse Services. The North Carolina Department of Health and Human Services, Division of Health Service Regulation, Certificate of Need shall schedule reviews of applications for any reallocated beds pursuant to Section (5) of this policy.

**Policy GEN-2: Changes in Need Determinations**

1. The need determinations adopted in this document or in the Dialysis Reports shall be revised continuously throughout the calendar year to reflect all changes in the inventories of:
  - a. the health services listed at G.S. 131E-176 (16)f;
  - b. health service facilities;
  - c. health service facility beds;
  - d. dialysis stations;
  - e. the equipment listed at G.S. 131E-176 (16)f1;
  - f. mobile medical equipment;
  - g. operating rooms as defined in Chapter 6; and

as those changes are reported to Healthcare Planning. However, need determinations in this document shall not be reduced if the relevant inventory is adjusted upward 60 days or less prior to the applicable "Certificate of Need Application Due Date."

2. Inventories shall be updated to reflect:
  - a. decertification of Medicare-certified home health agencies or offices, ICF/IID and dialysis stations;
  - b. de-licensure of health service facilities and health service facility beds;
  - c. demolition, destruction, or decommissioning of equipment as listed at G.S. 131E-176(16)f1 and s;
  - d. elimination or reduction of a health service as listed at G.S. 131E-176(16)f;
  - e. addition or reduction in operating rooms as defined in Chapter 6;
  - f. psychiatric beds licensed pursuant to G.S. 131E-184(c);
  - g. certificates of need awarded, relinquished, or withdrawn, subsequent to the preparation of the inventories in the North Carolina State Medical Facilities Plan; and
  - h. corrections of errors in the inventory as reported to Healthcare Planning.
3. Any person who is interested in applying for a new institutional health service for which a need determination is made in this document may obtain information about updated inventories and need determinations from Healthcare Planning.
4. Need determinations resulting from changes in inventory shall be available for a review period to be determined by Certificate of Need, but beginning no earlier than 60 days from the date of the action identified in Subsection (2), except for dialysis stations which shall be determined by Healthcare Planning and published in the next North Carolina Semiannual Dialysis Report. Notice of the scheduled review period for the need determination shall be mailed by the Healthcare Planning and Certificate of Need Section

to all people on the mailing list for the North Carolina State Medical Facilities Plan no less than 45 days prior to the due date for submittal of the new applications.

**Policy GEN-3: Basic Principles**

A certificate of need applicant applying to develop or offer a new institutional health service for which there is a need determination in the North Carolina State Medical Facilities Plan shall demonstrate how the project will promote safety and quality in the delivery of health care services while promoting equitable access and maximizing healthcare value for resources expended. A certificate of need applicant shall document its plans for providing access to services for patients with limited financial resources and demonstrate the availability of capacity to provide these services. A certificate of need applicant shall also document how its projected volumes incorporate these concepts in meeting the need identified in the State Medical Facilities Plan as well as addressing the needs of all residents in the proposed service area.

**Policy GEN-4: Energy Efficiency and Sustainability for Health Service Facilities**

Any person proposing a capital expenditure greater than \$2 million to develop, replace, renovate or add to a health service facility pursuant to G.S. 131E-178 shall include in its certificate of need application a written statement describing the project's plan to assure improved energy efficiency and water conservation.

In approving a certificate of need proposing an expenditure greater than \$5 million to develop, replace, renovate or add to a health service facility pursuant to G.S. 131E-178, Certificate of Need shall impose a condition requiring the applicant to develop and implement an Energy Efficiency and Sustainability Plan for the project that conforms to or exceeds energy efficiency and water conservation standards incorporated in the latest editions of the North Carolina State Building Codes. The plan must be consistent with the applicant's representation in the written statement as described in paragraph one of Policy GEN-4.

Any person awarded a certificate of need for a project or an exemption from review pursuant to G.S. 131E-184 is required to submit a plan for energy efficiency and water conservation that conforms to the rules, codes and standards implemented by the Construction Section of the Division of Health Service Regulation. The plan must be consistent with the applicant's representation in the written statement as described in paragraph one of Policy GEN-4. The plan shall not adversely affect patient or resident health, safety or infection control.

# Chapter 5:

Acute Care Hospital Beds

---

## CHAPTER 5

# ACUTE CARE HOSPITAL BEDS

---

### Summary of Bed Supply and Utilization

As of fall 2018, there are 110 licensed acute care hospitals and 21,063 licensed acute care beds in North Carolina. Data provided by Truven Health Analytics indicated that 4,425,601 days of care were provided to patients in those hospitals during 2017, which represents an average annual occupancy rate of 57.6 percent. These numbers exclude beds in service for substance use disorders, psychiatry, rehabilitation, hospice and long-term care. In addition, across the state acute care bed capacity is expected to increase in certain markets by 870 pending beds and to decrease in other markets by 85 beds, for a net increase of 785 beds.

It is important to note that not all licensed beds were in service throughout the year. Some beds were permanently idled, while others were temporarily taken out of service due to staff shortages or to accommodate renovation projects.

### Changes from the Previous Plan

No substantive changes to the Acute Care Bed Need methodology have been incorporated into the North Carolina 2019 State Medical Facilities Plan.

The inventory has been updated and references to dates have been advanced by one year as appropriate.

### Basic Principles

#### A. Acute Care Hospital Goals

- 1. To facilitate continuing improvement in the state's acute care services.** Advances in medical practice frequently entail the development of new services, new facilities or both. The policy of the state is to encourage their development when cost effective and essential to assure reasonable accessibility to services.
- 2. To expand the availability of appropriate, adequate acute care service to the people of North Carolina.** Our improving highways and transportation systems have brought acute care services within reasonable geographic reach of all North Carolinians, but not within financial reach. Despite the expansion of the state's Medicaid Program, in 2004 17.5 percent of North Carolinians under the age of 65 were uninsured for a full year, according to a study by the Cecil G. Sheps Center for Health Services Research, at the University of North Carolina at Chapel Hill.
- 3. To protect the resource that the state's acute care hospitals represent.** The acute care hospitals are the providers of essential health care services, the state's third largest employer, the largest single investment of public funds in many communities, magnets for physicians deciding where to practice, and building blocks in the economic development of their communities. North Carolina must safeguard the future of its hospitals.

Even so, it is not the state's policy to guarantee the survival and continued operation of all the state's hospitals, or even any one of them. In a dynamic, fast-changing environment, which is moving away from inpatient hospital services, the survival and future activities of hospitals will be a function of many factors beyond the realm of state policy.

The state can, however, facilitate the survival of its hospitals and promote the development of needed health care services, acute and non-acute, by encouraging hospitals to convert unused acute care inpatient facilities to new purposes, to collaborate with other health care providers, and to develop health care delivery networks.

4. **To encourage the substitution of less expensive for more expensive services whenever feasible and appropriate.** The state supports continued and expanded use of programs which have demonstrated their capacity to reduce both the number and length of hospital admissions, including:
  - a. Development of health care delivery networks;
  - b. Increased use of ambulatory surgery;
  - c. Outpatient diagnostic studies;
  - d. Preadmission testing;
  - e. Preadmission certification;
  - f. Programs to reduce admission and readmission rates;
  - g. Timely scheduling of admissions;
  - h. Effective utilization review;
  - i. Discharge planning;
  - j. Appropriate use of alternative services such as home health services, hospice, adult care homes, nursing homes; and
  - k. Initiating new, or maximizing existing, preventive health services.
5. **To assure that substantial capital expenditures for the construction or renovation of health care facilities are based on demonstrated need.**
6. **To assure that applicants proposing to expand or replace acute care beds should provide careful analysis of what they have done to promote cost-effective alternatives to inpatient care and to reduce average length of stay.**

#### **B. Use of Swing Beds**

The North Carolina Department of Health and Human Services supports the use of swing beds in providing long-term nursing care services in rural acute care hospitals.

Section 1883 of the Social Security Act provides that certain small rural hospitals may use their inpatient facilities to furnish skilled nursing facility (SNF) services to Medicare and Medicaid beneficiaries and intermediate care facility (ICF) services to Medicaid beneficiaries.

Hospitals wishing to receive swing bed certification for Medicare patients must meet the eligibility criteria outlined in the law which include:

1. Have a certificate of need, or a letter from Certificate of Need indicating that no certificate of need review is required to provide swing bed services; and
2. Have a current valid Medicare provider agreement; and
3. Be located in an area of the state not designated as urbanized by the most recent official census; and

4. Have fewer than 100 hospital beds, excluding beds for newborns and beds in intensive type inpatient units; and
5. Not have in effect a 24-hour nursing waiver granted under 42 CFR 488.54I; and
6. Not have had a swing bed approval terminated within the two years previous to application; and
7. Meet the Swing Bed Conditions of Participation (see 42 CFR 482.66) on Resident Rights; Admission, Transfer, and Discharge Rights; Resident Behavior and Facility Practices; Patient Activities; Social Services; Discharge Planning; Specialized Rehabilitative Services; and Dental Services.

A certificate of need is not required if capital expenditures associated with the swing bed service do not exceed \$2 million, and there is no change in bed capacity.

**Sources of Data**

**Inventory of Acute Care Beds:**

The inventory of hospital facilities is maintained through the hospitals’ response to a state law that requires each facility to notify the North Carolina Department of Health and Human Services and receive appropriate approvals before construction, alterations or additions to existing buildings or any changes in bed capacities. Bed counts are revised in the state’s inventory as changes are reported and approved.

**Days of Care and Patient Origin Data for the Bed Need Methodology:**

The data source for annual days of care used in the methodology is Truven Health Analytics, a collector of hospital patient discharge information. The general acute care days of care by facility and data on patients’ county of residence were provided by the Sheps Center based on the Truven Health Analytics data. *(Note: The determination of whether a patient record was categorized as an “acute care/general discharge” was determined by the revenue code(s) for accommodation type, as submitted to Truven Health Analytics by facilities on the UB-04 form. Included in Column F, “Truven Health Analytics 2017 Acute Care Days” are records with revenue codes signifying an acute care/general accommodation type. Likewise, any records that are coded as substance abuse, psychiatric, or rehabilitation discharges are excluded from these figures.)*

**Basic Assumptions of the Methodology**

- Target occupancies of hospitals should encourage efficiency of operation, and vary with average daily census:

Average Daily Census	Target Occupancy of Licensed Acute Care Beds
ADC 1-99	66.7%
ADC 100-200	71.4%
ADC>200 and <=400	75.2%
ADC>400	78.0%

- In determining utilization rates and average daily census, only acute care bed days of care are counted.

- If a hospital has received approval to increase or decrease acute care bed capacity, this change is incorporated into the anticipated bed capacity regardless of the licensure status of the beds.

## **Application of the Methodology**

### **Step 1**

Counties that have at least one licensed acute care hospital are single county acute care bed service areas unless the county is grouped with a county lacking a licensed acute care hospital. When a county that has at least one licensed acute care hospital is grouped with a county lacking a licensed acute care hospital, a multicounty acute care bed service area is created.

All counties lacking a licensed acute care hospital are grouped with either one or two counties, each of which has at least one licensed acute care hospital. A multicounty acute care bed service area may consist of multiple counties lacking a licensed acute care hospital that are grouped with either one or two counties, each of which has at least one licensed acute care hospital.

The three most recent years of available acute care days, patient origin data are combined and used to create the multicounty acute care bed service areas. These data are updated and reviewed every three years. The multicounty acute care bed service areas are then updated, as indicated by the data. The first update occurred in the North Carolina 2011 State Medical Facilities Plan. The following decision rules are used to determine multicounty acute care bed service area groupings.

1. Counties lacking a licensed acute care hospital are grouped with the single county where the largest proportion of patients received inpatient acute care services, as measured by acute inpatient days, unless:
  - a. Two counties with licensed acute care hospitals each provided inpatient acute care services to at least 35 percent of the residents who received inpatient acute care services, as measured by acute inpatient days.
2. If 1.a. is true, then the county lacking a licensed acute care hospital is grouped with both the counties which provided inpatient acute care services to at least 35 percent of the residents who received inpatient acute care services, as measured by acute inpatient days.

A county lacking a licensed acute care hospital becomes a single county acute care bed service area upon licensure of an acute care hospital in that county. If a certificate of need is issued for development of an acute care hospital in a county lacking an acute care hospital, the acute care beds for which the certificate of need has been issued will be included in the inventory of beds in that county's multicounty acute care bed service area until those beds are licensed.

An acute care bed's service area is the acute care bed planning area in which the bed is located. The acute care bed planning areas are the single and multicounty groupings shown in Figure 5.1.

### **Step 2 (Columns D and E)**

Determine the number of acute care beds in the inventory by totaling:

#### **(Column D)**

- a. the number of licensed acute care beds at each hospital;

**(Column E)**

- b. the number of acute care beds for which certificates of need have been issued, but for which changes in the license have not yet been made (i.e., additions, reductions, and relocations); and
- c. the number of acute care beds for which a need determination in the North Carolina State Medical Facilities Plan is pending review or appeal.

**Step 3 (Column F)**

Determine the total number of acute inpatient days of care provided by each hospital based on the data contained in the above referenced report for Federal Fiscal Year 2017. *(Please see note in “Sources of Data” regarding identification of general acute days of care.)*

**Step 4 (Columns G and H)**

Calculate the projected inpatient days of care in Federal Fiscal Year 2021 as follows:

- a. For each county, determine the total annual number of acute inpatient days of care provided in North Carolina acute care hospitals during each of the last five federal fiscal years based on data provided by the Sheps Center.
- b. For each county, calculate the difference in the number of acute inpatient days of care provided from year to year.
- c. For each county, for each of the last four years, determine the percentage change from the previous year by dividing the calculated difference in acute inpatient days by the total number of acute inpatient days provided during the previous year. *(Example: (YR 2017 – YR 2016) / YR 2016; etc.)*

**(Column G)**

- d. For each county, total the annual percentages of change and divide by four to determine the average annual historical percentage change for each county. For positive annual percentages of change, add 1 and this becomes the County Growth Rate Multiplier. For negative annual percentages of change, subtract 1. If the County Growth Rate Multiplier is negative, Truven Health Analytics 2017 Acute Care Days are carried forward unchanged to Column H.
- e. For each county with a positive County Growth Rate Multiplier, calculate the compounded growth factor projected for the next four years by using the average annual historical percentage change (from d. above) in the first year and compounding the change each year thereafter at the same rate.

**(Column H)**

- f. For each hospital, multiply the acute inpatient days of care from Column F by the compounded county growth factor to project the number of acute inpatient days of care to be provided in Federal Fiscal Year 2021 at each hospital.

**Step 5 (Column I)**

Calculate the projected midnight average daily census for each hospital in Federal Fiscal Year 2021 by dividing the projected number of acute inpatient days of care provided at the hospital (from Column H) by 365 days.

**Step 6 (Column J)**

Multiply each hospital's projected midnight average daily census from Step 5 (Column I) by the appropriate target occupancy factor below:

Average Daily Census	Occupancy Factor
Average Daily Census less than 100	1.50
Average Daily Census 100-200	1.40
Average Daily Census greater than 200 and <=400	1.33
Average Daily Census greater than 400	1.28

**Step 7 (Column K)**

Determine the surplus or deficit of beds for each hospital by subtracting the inventory of beds in Step 2 (Column D plus Column E) from the number of beds generated in Step 6 (Column J). (*Note: Deficits will appear as positive numbers; surpluses, as negative numbers.*)

**Step 8 (Column L)**

The number of acute care beds needed in a service area is determined as follows:

- a. The threshold for a need determination for additional acute care beds is a projected deficit of 20 or more beds, or a projected deficit which equals or exceeds 10 percent of the total bed inventory for hospitals under common ownership.
- b. The threshold is applied individually to each hospital, and a need determination is generated irrespective of surpluses at other hospitals in the service area, unless there are other hospitals in the service area under common ownership.
- c. If two or more hospitals in the same service area are under common ownership, total the surpluses and deficits of beds for those hospitals to determine the surplus or deficit of beds for each owner of multiple hospitals in the service area.
- d. When the deficit of total acute care beds in the service area for any facility or owner equals or exceeds 20 beds or 10 percent of the inventory of acute care beds for that facility or owner, the deficits of all facilities and owners in the service area will be summed to determine the number of acute care beds needed in the service area.

**Qualified Applicants**

Any qualified applicant may apply for a certificate of need to acquire the needed acute care beds. A person is a qualified applicant if he or she proposes to operate the additional acute care beds in a hospital that will provide:

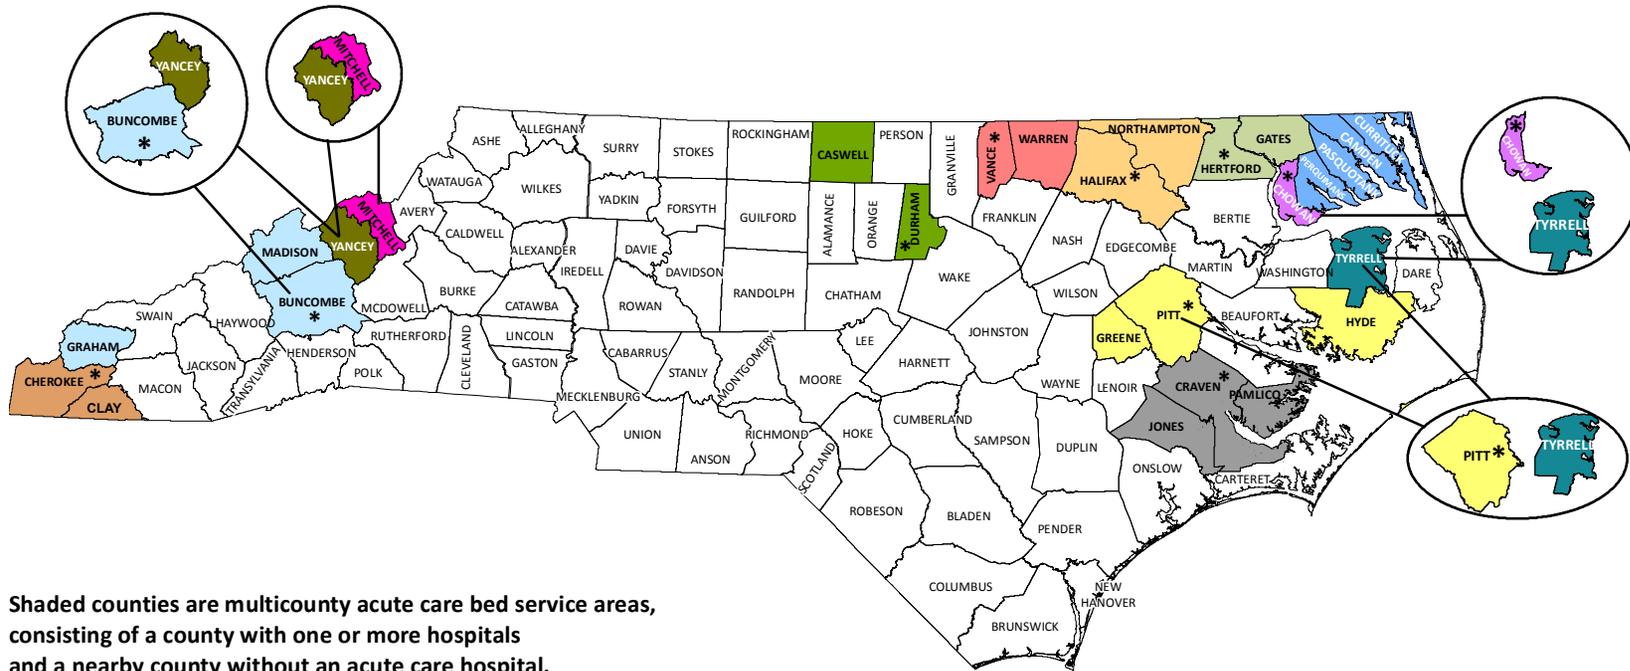

1. a 24-hour emergency services department,
2. inpatient medical services to both surgical and non-surgical patients, and
3. if proposing a new licensed hospital, medical and surgical services on a daily basis within at least five of the major diagnostic categories as recognized by the Centers for Medicare and Medicaid Services (CMS) as follows:

MDC 1: Diseases and disorders of the nervous system

MDC 2: Diseases and disorders of the eye

- MDC 3: Diseases and disorders of the ear, nose, mouth and throat
- MDC 4: Diseases and disorders of the respiratory system
- MDC 5: Diseases and disorders of the circulatory system
- MDC 6: Diseases and disorders of the digestive system
- MDC 7: Diseases and disorders of the hepatobiliary system and pancreas
- MDC 8: Diseases and disorders of the musculoskeletal system and connective tissue
- MDC 9: Diseases and disorders of the skin, subcutaneous tissue and breast
- MDC 10: Endocrine, nutritional and metabolic diseases and disorders
- MDC 11: Diseases and disorders of the kidney and urinary tract
- MDC 12: Diseases and disorders of the male reproductive system
- MDC 13: Diseases and disorders of the female reproductive system
- MDC 14: Pregnancy, childbirth and the puerperium
- MDC 15: Newborns/other neonates with conditions originating in the perinatal period
- MDC 16: Diseases and disorders of the blood and blood-forming organs and immunological disorders
- MDC 17: Myeloproliferative diseases and disorders and poorly differentiated neoplasms
- MDC 18: Infectious and parasitic diseases
- MDC 19: Mental diseases and disorders
- MDC 20: Alcohol/drug use and alcohol/drug-induced organic mental disorders
- MDC 21: Injury, poisoning and toxic effects of drugs
- MDC 22: Burns
- MDC 23: Factors influencing health status and other contacts with health services
- MDC 24: Multiple significant trauma
- MDC 25: Human immunodeficiency virus infections

**Figure 5.1: Acute Care Bed Service Areas**

Shaded counties are multicounty acute care bed service areas, consisting of a county with one or more hospitals and a nearby county without an acute care hospital.

\* For multicounty service areas, the asterisk denotes the county with at least one hospital.

Hospitals	Multicounty Service Area	Color Code
Duke University Hospital, Duke Regional Hospital, North Carolina Specialty Hospital	Durham, Caswell	
Erlanger Murphy Medical Center	Cherokee, Clay	
Mission Hospital	Buncombe, Graham, Madison, Yancey	
Maria Parham Medical Center	Vance, Warren	
Halifax Regional Medical Center	Halifax, Northampton	
Vidant Medical Center	Pitt, Greene, Hyde, Tyrrell	
CarolinaEast Medical Center	Craven, Jones, Pamlico	
Vidant Chowan Hospital	Chowan, Tyrrell	
Vidant Roanoke-Chowan Hospital	Hertford, Gates	
Sentara Albemarle Medical Center	Pasquotank, Camden, Currituck, Perquimans	
Blue Ridge Regional Hospital	Mitchell, Yancey	

**Table 5A: Acute Care Bed Need Projections**

2017 Utilization Data from Truven Health Analytics compiled by the Cecil B. Sheps Center for Health Services Research

Target Occupancy Rates: ADC 1-99: 66.7%, ADC 100-200: 71.4%, ADC > 200 and <=400: 75.2%, ADC>400: 78%

\* Acute care beds in the "Adjustments for CONs/Previous Need" column are to be converted to inpatient psychiatric beds. This conversion is exempt from certificate of need review, pursuant to G.S. 131E-184(c).

\*\* Truven Health Analytics acute days of care data and the Division of Health Service Regulation Hospital License Renewal Application days of care data have a greater than ± 5% discrepancy between the two data sources.

\*\*\* Duke University Hospital is licensed for 14 acute care beds under Policy AC-3. The 14 beds are not counted when determining acute care bed need.

\*\*\*\* The State Health Coordinating Council approved an adjusted need determination to remove the need for 33 beds in Moore County.

^ The Division of Health Service Regulation received notice on September 19, 2017 from Duke LifePoint Maria Parham Medical Center regarding designation of Franklin Medical Center as a legacy medical care facility. The facility has 36 months from the date of its notice to reopen the hospital.

^^ The Division of Health Service Regulation received notices from two different buyers regarding the designation of Vidant Pungo Hospital as a legacy medical care facility. The prospective buyers have 36 months from the date of their respective notices to reopen the hospital. One notice was effective on May 16, 2016, and the other was effective on June 14, 2016.

^^^ The Division of Health Service Regulation received notice on January 19, 2016 from Yadkin Valley Community Hospital regarding designation as a legacy medical care facility. The facility has 36 months from the date of its notice to reopen the hospital.

† One acute care bed was converted to a psychiatric bed on November 13, 2017, and has been removed from the acute care bed inventory.

†† Charles A. Cannon, Jr. Memorial Hospital received a grant from the Dorothea Dix Hospital Property Fund to convert 27 acute care beds to adult psychiatric beds. This project is exempt from certificate of need review and the beds are not yet accounted for in Table 5A.

††† Duke LifePoint Maria Parham Medical Center received a grant from the Dorothea Dix Hospital Property Fund to renovate and convert 33 acute care beds to adult psychiatric beds on the site of the closed Franklin Medical Center. This project is exempt from certificate of need review and the beds are not yet accounted for in Table 5A.

Projections based on four-year average county-specific growth rates, compounded annually over the next four years. Acute Care Days data from 2013, 2014, 2015, 2016 and 2017 were used to generate four-year growth rate.

(ADC= Average Daily Census)

**Table 5B: Acute Care Bed Need Determination**

<b>Service Area</b>	<b>Acute Care Bed Need Determination*</b>	<b>Certificate of Need Application Due Date**</b>	<b>Certificate of Need Beginning Review Date</b>
Durham/Caswell	34	June 17, 2019	July 1, 2019
Gaston	33	August 15, 2019	September 1, 2019
Mecklenburg	76	October 15, 2019	November 1, 2019
It is determined that there is no need anywhere else in the state and no other reviews are scheduled.			

\* Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).

\*\* Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date (see Chapter 3).

**Inventory of Long-Term Care Hospital Beds**

As a result of the August 2005 change in the certificate of need statute, which made “long-term care hospital beds” a separate category of health service facility beds, the bed days associated with long-term care hospitals have been removed from the acute care bed need determinations. Table 5C, based on 2017 data from the 2018 Hospital License Renewal Applications, shows long-term care hospital inventory data.

**Table 5C: Long-Term Care Hospital (LTCH) Bed Inventory**

<b>License Number</b>	<b>Facility Name</b>	<b>County</b>	<b>Licensed LTCH Beds</b>	<b>Adjustments for Certificates of Need and Previous Need</b>

# Chapter 6:

## Operating Rooms

---

## CHAPTER 6

# OPERATING ROOMS

---

### **Summary of Operating Room Inventory and Utilization**

“Operating room” is defined in G.S. 131E-76(6a) as “...a room used for the performance of surgical procedures requiring one or more incisions and that is required to comply with all applicable licensure codes and standards for an operating room.” In the fall of 2018, the combined inventory of operating rooms in hospitals and ambulatory surgical facilities in North Carolina consisted of 156 dedicated inpatient surgery rooms, including 96 dedicated C-Section rooms, 300 dedicated ambulatory surgery rooms and 926 shared operating rooms. Data from the 2018 Hospital and Ambulatory Surgical Facility License Renewal Applications indicated that of the total reported surgical cases, excluding C-Section cases, 72.2 percent of the cases were ambulatory cases and 27.8 percent of the cases were inpatient cases.

### **Changes from the Previous Plan**

One substantive change to the Operating Room methodology has been incorporated into the North Carolina 2019 State Medical Facilities Plan. The methodology eliminated consideration of a facility’s utilization rate. Therefore, facilities that previously were categorized as underutilized are now included in the methodology along with other facilities.

The inventory and case data have been updated and references to dates have been advanced by one year, as appropriate.

### **Assumptions of the Methodology**

For the purposes of the operating room methodology, a “health system” includes all licensed health service facilities with operating rooms located in the same service area that are owned or leased by:

1. the same legal entity (i.e., the same individual, trust or estate, partnership, corporation, hospital authority, or the State or political subdivision, agency or instrumentality of the State); or
2. the same parent corporation or holding company; or
3. a subsidiary of the same parent corporation or holding company; or
4. a joint venture in which the same parent, holding company, or a subsidiary of the same parent or holding company is a participant and has the authority to propose changes in the location or number of ORs in the health service facility.

A health system consists of one or more health service facilities. In the event that the relocation or transfer of operating rooms to a different health system generates a need, the need determination will not appear until the relocated or transferred operating rooms are licensed in their new location.

In the 2019 State Medical Facilities Plan, when an operating room need is calculated for a service area, the minimum need determination is set to two, after rounding and the maximum does not exceed six, regardless of the deficit calculated.

Certificate of Need applications for new operating rooms are not restricted to the entity(ies) that generated the deficits.

### **Sources of Data**

Data on the number of cases and procedures for the North Carolina 2019 State Medical Facilities Plan were taken from the “2018 Hospital License Renewal Application” and the “2018 Ambulatory Surgical Facility

License Renewal Application” as submitted to the Acute and Home Care Licensure and Certification Section of the Division of Health Service Regulation. *(Note: For the North Carolina 2019 State Medical Facilities Plan, one operating room for each Level I and Level II trauma center and one operating room for each designated burn intensive care unit are excluded in Table 6B.)*

Inventory data for the North Carolina 2019 State Medical Facilities Plan were compiled by staff based on License Renewal Applications, supplemented with data from the most recent licenses issued by the Acute and Home Care Licensure and Certification Section and with project approval letters from Certificate of Need.

Population data by county for 2017 and 2021 were obtained from the North Carolina Office of State Budget and Management.

### **Methodology for Projecting Operating Room Need**

The following narrative describes the assumptions and methodology used in determining the operating room inventory and in projecting need for additional operating room capacity. The objective of the methodology is to arrive at a reasonable assessment of the adequacy of current resources for performing surgery, compared with an estimate of need for additional capacity.

### **Step 1 – Delineation of Service Areas**

#### **Definitions:**

Single county operating room service area: A county with at least one licensed facility with one or more operating rooms.

Multicounty operating room service area: A group of counties including:

- one or two counties with at least one licensed facility with at least one operating room **and**;
- one or more counties with no licensed facility with at least one operating room.

All counties are either single county operating room service areas or are part of a multicounty operating room service area. A multicounty operating room service area may consist of multiple counties with no licensed facility with at least one operating room grouped with either one or two counties, each of which has at least one licensed facility that includes at least one operating room.

The three most recent years of available surgical patient origin data are combined and used to create the multicounty operating room service areas. These data are updated and reviewed every three years. The operating room service areas are then updated, as indicated by the data. The first update occurred in the North Carolina 2011 State Medical Facilities Plan. The following decision rules are used to determine multicounty operating room service area groupings:

- a. Counties with no licensed facility with at least one operating room are grouped with the single county where the largest proportion of patients had surgery, as measured by number of surgical cases, unless:
  - (1) Two counties with licensed facilities with at least one operating room each provided surgical services to at least 35 percent of the residents who received surgical services, as measured by number of surgical cases.

- b. If a.(1) is true, then the county with no licensed facility with at least one operating room is grouped with both the counties which provided surgical services to at least 35 percent of the residents who received surgical services, as measured by number of surgical cases.

A county lacking a licensed facility with at least one operating room becomes a single county operating room service area upon licensure of a facility with at least one operating room in that county. If a certificate of need is issued for development of a facility with at least one operating room in a county lacking a facility with at least one operating room, the operating room(s) for which the certificate of need has been issued will be included in the inventory of operating rooms in that county's multicounty operating room service area until those operating rooms are licensed.

In 2006, in response to an adjusted need determination petition, the State Health Coordinating Council added Swain County to the Jackson-Graham multicounty operating room service area. This created a multicounty operating room service area that included two counties that have licensed facilities with at least one operating room and one county lacking a licensed facility with at least one operating room.

An operating room's service area is the operating room planning area in which the operating room is located. The operating room planning areas are the single and multicounty groupings shown in Figure 6.1.

### **Step 2 – Inventory of Operating Rooms (Columns D through J, Table 6A)**

- a. In each operating room service area, list the number of operating rooms by type, and sum them for each health system by summing the following for all licensed hospitals and ambulatory surgical facilities:
  - (1) Number of Inpatient Operating Rooms (*Column D*)
  - (2) Number of Ambulatory Operating Rooms (*Column E*)
  - (3) Number of Shared Operating Rooms (*Column F*)
- b. For each facility:
  - (1) Exclude the number of dedicated C-Section operating rooms as summed from the Hospital License Renewal Application. (*Column G*)
  - (2) Exclude one operating room for each Level I and Level II Trauma Center and one additional operating room for each designated Burn Intensive Care Unit. (*Column H*)
  - (3) List the number of operating rooms (*Column I*) and C-Section operating rooms (*Column J*) for which certificates of need have been issued or settlement agreements signed but operating rooms were not licensed/delicensed as of September 30 of the reporting year. (*Columns I and J*)
- c. Enter placeholders for need determinations from previous plans that are pending certificate of need review. (*Columns I and Column J*)

### **Step 3 – Determine Each Facility's Adjusted Case Times**

- a. For each facility, compare the "Average 'Case Time' in Minutes" for inpatient and ambulatory cases on the annual License Renewal Application to its average case time used in the methodology in the previous year's State Medical Facilities Plan.
  - (1) If either the inpatient or ambulatory case time is more than 10 percent longer than the previous year's case time, then the "Adjusted Case Time" is the previous year's reported case time plus 10 percent.

- (2) If either the inpatient or ambulatory case time is more than 20 percent shorter than the previous year’s case time, then the Adjusted Case Time is the previous year’s reported case time minus 20 percent.
- (3) If neither of the above situations occurs, then the Adjusted Case Time is the average case time(s) reported on the License Renewal Application.

**Step 4 – Group Facilities (Columns K through M, Table 6A)**

- a. For each hospital, multiply the total inpatient surgical cases (excluding C-sections performed in dedicated C-Section operating rooms) reported in the “Surgical Cases by Specialty Area” table on the annual Hospital License Renewal Application by the inpatient average case time from Step 3. Then divide by 60 to obtain the total inpatient surgical hours.
- b. For each facility, multiply the total ambulatory cases reported in the Surgical Cases by Specialty Area table on the annual License Renewal Application by the ambulatory average case time from Step 3. Then divide by 60 to obtain the total ambulatory surgical hours.
- c. Add the total inpatient and ambulatory surgical hours together to obtain each facility’s “Total Surgical Hours for Grouping.” (Column K)
- d. Assign each facility to a group based on the following criteria (Column L):

Group	Facility Type
1	Academic Medical Center Teaching Hospitals
2	Hospitals reporting more than 40,000 surgical hours
3	Hospitals reporting 15,000 to 40,000 surgical hours
4	Hospitals reporting less than 15,000 surgical hours
5	Separately licensed ambulatory surgical facilities that perform at least 50 percent of their procedures in either ophthalmology or otolaryngology, or a combination of the two specialties.
6	All separately licensed ambulatory surgical facilities not in Group 5.

- e. For purposes of the State Medical Facilities Plan, the average operating room is anticipated to be staffed based on its group membership and utilized at least 75 percent of the available time. Assumptions regarding hours per day and days per year of availability are shown in the table below. Multiply the Hours per Day by the Days Per Year. Then multiply by 75 percent to obtain the “Standard Hours per Operating Room per Year.” (Column M)

Group	Hours per Day	Days per Year	Standard Hours per Operating Room per Year
1	10	260	1,950
2	10	260	1,950
3	9	260	1,755
4	8	250	1,500
5	7	250	1,312
6	7	250	1,312

**Step 5 – Project Future Operating Room Requirements Based on Growth of Operating Room Hours (Columns D through K, Table 6B)**

- a. For Groups 2 through 6, use the Adjusted Case Time (Step 3) to calculate the average (mean) inpatient and ambulatory case times for each group. If the Adjusted Case Time exceeds one standard deviation above the mean case time for its group, substitute the value equivalent to the mean plus one standard deviation of the Adjusted Case Time to obtain the “Final Inpatient Case Time” (Column E) and “Final Ambulatory Case Time” (Column G), as applicable. Otherwise use the Adjusted Case Time (Step 3). Facilities that perform no surgical procedures in the category being calculated are excluded from the calculations. The average Final Inpatient and Ambulatory Case Times for each group are as follows for the 2019 State Medical Facilities Plan:

Group	Average Final Inpatient Case Time		Average Final Ambulatory Case Time	
	in Minutes	in Hours	in Minutes	in Hours
1	221.0	3.68	127.7	2.13
2	194.3	3.24	114.7	1.91
3	179.5	2.99	109.7	1.83
4	112.5	1.88	71.7	1.20
5	--	--	40.6	0.68
6	--	--	76.6	1.28

- b. For each facility, multiply the inpatient surgical cases reported on the License Renewal Application (Column D) by the average inpatient case time in minutes from Step 5-a, and multiply the ambulatory surgical cases reported on the License Renewal Application (Column F) by the average ambulatory case time in minutes from Step 5-a. Sum these amounts for each facility to obtain the “Total Adjusted Estimated Surgical Hours.” (Column H)
- c. For purposes of these need projections, the number of surgical hours is anticipated to change in direct proportion to the change in the general population of the operating room service area. For each service area with a projected population increase, calculate the “Growth Factor” based on each service area’s projected population change between the “data year” (2017) and the “target year” for need projections (2021) using population figures from the North Carolina Office of State Budget and Management. (Column I:  $Growth\ Factor = \frac{2021\ Service\ Area\ Population - 2017\ Service\ Area\ Population}{2017\ Service\ Area\ Population}$ .) If the calculated population growth is negative, the Growth Factor is considered to be zero.
- d. Multiply each facility’s Total Adjusted Estimated Surgical Hours (Column H) for the most recent fiscal year by each service area’s Growth Factor (Column I). Then add the product to the Total Adjusted Estimated Surgical Hours to determine the “Projected Surgical Hours for 2021.” ( $[Column\ H \times Column\ I] + Column\ H = Column\ J$ )
- e. Divide each facility’s Projected Surgical Hours for 2021 by the Standard Hours per Operating Room per Year (based on group assignment) to determine the “Projected

Surgical Operating Rooms Required in 2021.” (Column J, Table 6B ÷ Column M, Table 6A = Column K, Table 6B)

**Step 6 – Determination of Health System Deficit/Surplus (Columns L - M, Table 6B)**

- a. Sum the operating rooms, adjustments, and exclusions for each facility to obtain the “Adjusted Planning Inventory.” (Column L)
- b. Subtract the Adjusted Planning Inventory from the Projected Surgical Operating Rooms Required in 2021 to obtain the surpluses and deficits for each facility. (Note: In Column M, projected deficits appear as positive numbers indicating that the methodology projects that more operating rooms will be needed in 2021 than are in the current inventory.) Then sum the deficits and surpluses for each facility in each health system to arrive at the “Projected Operating Room Deficit or Surplus.” (Column K – Column L = Column M)

**Step 7 – Determination of Service Area Operating Room Need (Column N, Table 6B)**

- a. Round the health system deficits according to the rounding rules, below:

If a health system located in an operating room service area with more than 10 operating rooms in the Adjusted Planning Inventory has a projected fractional deficit of 0.50 or greater, round the deficit to the next highest whole number. For each health system in an operating room service area with more than 10 operating rooms and a projected deficit less than 0.50 or in which there is a projected surplus, there is no need.

If a health system located in an operating room service area with six to 10 operating rooms in the Adjusted Planning Inventory has a projected fractional deficit of 0.30 or greater, round the deficit to the next highest whole number. For each health system in an operating room service area with six to 10 operating rooms and a projected deficit less than 0.30 or in which there is a projected surplus, there is no need.

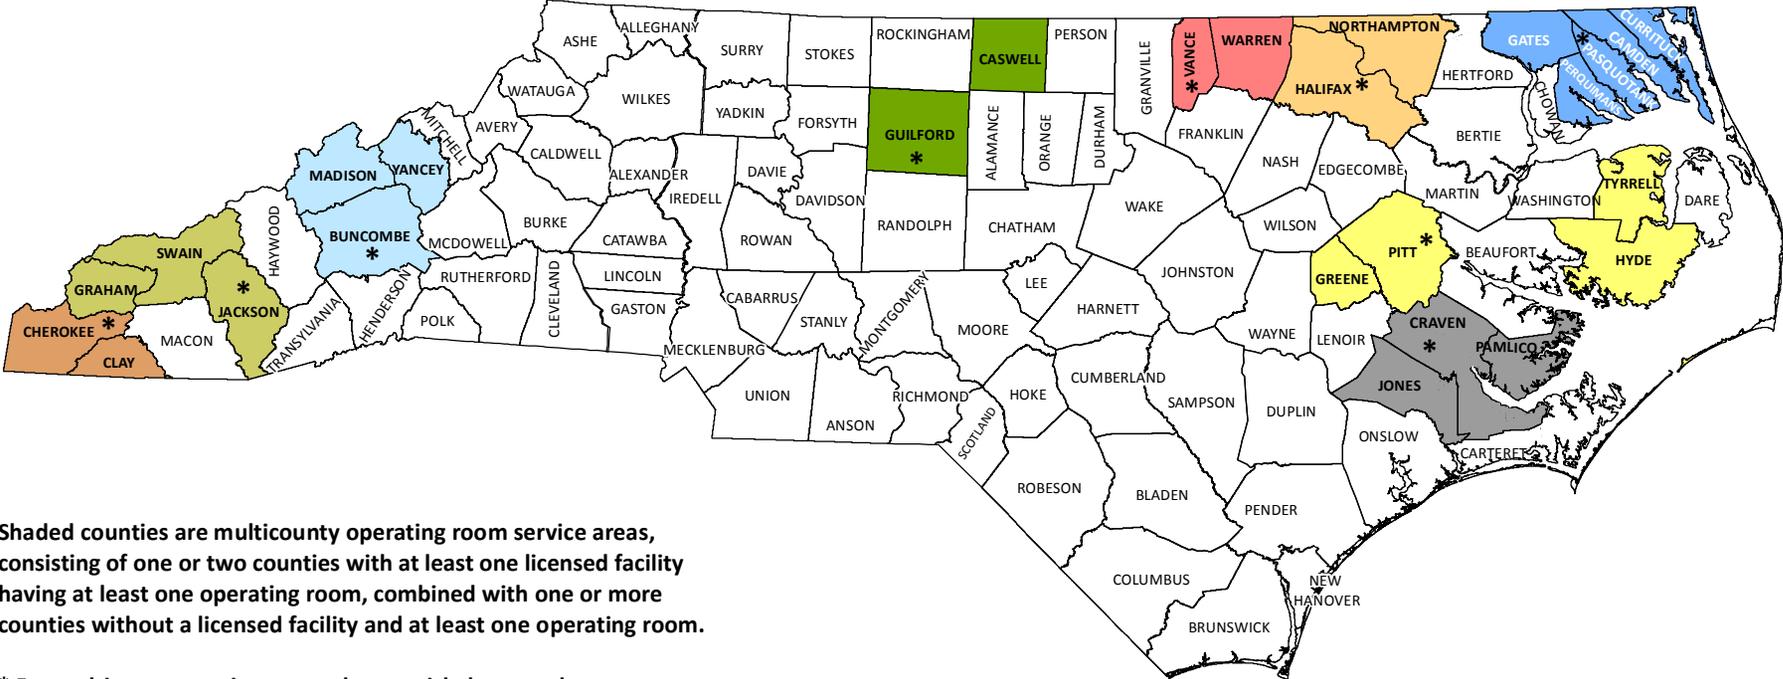

If a health system located in an operating room service area with five or fewer operating rooms in the Adjusted Planning Inventory has a projected fractional deficit of 0.20 or greater, round the deficit to the next highest whole number. For each health system in an operating room service area with five or fewer operating rooms and a projected deficit less than 0.20 or in which there is a projected surplus, there is no need.

- b. Add all rounded health systems deficits. Then adjust for any placeholders for need determinations in previous State Medical Facilities Plans to calculate the “Service Area Need.” (Column N)
- c. For the 2019 State Medical Facilities Plan, the Service Area Need must be at least two to show an Operating Room Need Determination in Table 6C.

**NOTE:** “Dedicated C-Section Operating Rooms” and associated cases are excluded from the calculation of need for additional operating rooms by the standard methodology; therefore, hospitals proposing to add a new operating room for use as a “Dedicated C-Section Operating Room” shall apply for a certificate of need without regard to the need determinations in Chapter 6 of this Plan. There are no other operating room exclusions for which this protocol is applicable.

A “Dedicated C-Section Operating Room” shall only be used to perform Cesarean Sections and other procedures performed on the patient in the same visit to the C-Section Operating Room, such that a patient receiving another procedure at the same time as the Cesarean Section would not need to be moved to a different operating room for the second procedure.

**Figure 6.1: Operating Room Service Areas**

Shaded counties are multicounty operating room service areas, consisting of one or two counties with at least one licensed facility having at least one operating room, combined with one or more counties without a licensed facility and at least one operating room.

\* For multicounty service areas, the asterisk denotes the county with at least one licensed facility having one or more operating rooms.

Hospitals	Multicounty Service Area	Color Code
Erlanger Murphy Medical Center	Cherokee, Clay	
Harris Regional Hospital and Swain Community Hospital	Jackson, Graham, Swain	
Mission Hospital	Buncombe, Madison, Yancey	
Maria Parham Medical Center	Vance, Warren	
Halifax Regional Medical Center	Halifax, Northampton	
Vidant Medical Center	Pitt, Greene, Hyde, Tyrrell	
CarolinaEast Medical Center	Craven, Jones, Pamlico	
Cone Health and High Point Regional Health	Guilford, Caswell	
Sentara Albemarle Medical Center	Pasquotank, Camden, Currituck, Gates, Perquimans

\* These facilities are legacy medical care facilities based on G.S. 131E-176-(14f).

\*\* Duke University Hospital has 16 licensed operating rooms (ORs) approved under Policy AC-3 (J-008030-07). North Carolina Baptist Hospital has a certificate of need (G-008460-10) for 7 ORs under Policy AC-3. These 23 ORs are counted when determining OR need.

\*\*\* This is an ambulatory surgery demonstration project that is in the inventory but is not included in the need determination calculations.

\*\*\*\* All ORs have been relocated from Plastic Surgery Center of NC to facility formerly identified as Clemmons Medical Park Ambulatory Surgical Center in previous SMFPs. New facility retains Plastic Surgery Center's license number. Procedures reported are for Plastic Surgery Center.

<b>Grand Total</b>			<b>256,617</b>		<b>666,204</b>								<b>21</b>

\* These facilities are legacy medical care facilities based on G.S. 131E-176-(14f).

\*\* Duke University Hospital has 16 licensed operating rooms (ORs) approved under Policy AC-3 (CON J-008030-07). North Carolina Baptist Hospital has a certificate of need (G-008460-10) for 7 ORs under Policy AC-3. These 23 ORs are counted when determining OR need.

\*\*\* This is a single-specialty ambulatory surgery demonstration project that is in the inventory but is not included in need determination calculations.

\*\*\*\* All ORs have been relocated from Plastic Surgery Center of NC to facility formerly identified as Clemmons Medical Park Ambulatory Surgical Center in previous SMFPs. New facility retains Plastic Surgery Center's license number. Procedures reported are for Plastic Surgery Center.

^ Inpatient case time substitution: Current year's reported case time is greater than 1 standard deviation (SD) above group average. Substituted average inpatient case time plus 1 SD for group.

^^ Ambulatory case time substitution: Current year's reported case time is greater than 1 SD above group average. Substituted average ambulatory case time plus 1 SD for group.

† Inpatient case time substitution: Current year's reported case time is greater than 110% of previous year. Substituted previous year's average inpatient case time plus 10%.

†† Inpatient case time substitution: Current year's reported case time is less than 80% of previous year. Substituted previous year's average inpatient case time minus 20%.

††† Ambulatory case time substitution: Current year's reported case time is greater than 110% of previous year. Substituted previous year's average ambulatory case time plus 10%.

†††† Ambulatory case time substitution: Current year's reported case time is less than 80% of previous year. Substituted previous year's average ambulatory case time minus 20%.

**Table 6C: Operating Room Need Determination**

<b>Operating Room Service Area</b>	<b>Operating Room Need Determination*</b>	<b>Certificate of Need Application Due Date**</b>	<b>Certificate of Need Beginning Review Date</b>
Mecklenburg	6	October 15, 2019	November 1, 2019

Orange	3	April 15, 2019	May 1, 2019
Wake	2	August 15, 2019	September 1, 2019
It is determined that there is no need anywhere else in the state and no other reviews are scheduled.			

- \* Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).
- \*\* Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date (see Chapter 3).
- \*\*\* The need determination based on the standard methodology is 10 operating rooms for New Hanover. However, the State Health Coordinating Council decided that the maximum need determination would be 6 operating rooms for any service area in the 2019 SMFP.

**Table 6D: Inventory for Single Specialty  
Ambulatory Surgery Demonstration Project**

Operating Room Service Area	Provider	ORs
Charlotte Area (Mecklenburg, Cabarrus, Union counties)	Mallard Creek Surgery Center	2
Triad Area (Guilford, Forsyth counties)	Piedmont Outpatient Surgery Center	2
Triangle Area (Wake, Durham, Orange counties)	Triangle Orthopaedics Surgery Center	2
<p>The North Carolina 2010 State Medical Facilities Plan included need determinations for a Single Specialty Ambulatory Surgery Demonstration Project, consisting of three facilities with two operating rooms each to be located in the Charlotte Area (Mecklenburg, Cabarrus, Union counties), Triad Area (Guilford, Forsyth counties), and the Triangle Area (Wake, Durham, Orange counties). On 9/28/2010, CON #G-008477-10 was awarded to Piedmont Outpatient Surgery Center LLC and Stratford Executive Associates LLC to develop a single-specialty ENT ambulatory surgical facility in the Triad area. Piedmont Outpatient Surgery Center received its license effective 2/6/2012. On 6/1/2011, CON #J-008616-10 was awarded to Triangle Orthopaedics Surgery Center to develop a single specialty (orthopaedic) ambulatory surgical facility in the Triangle Area. Triangle Orthopaedics Surgery Center received its license effective 2/25/2013. University Surgery Center, LLC (dba Mallard Creek Surgery Center) received CON #F-008543-10 on 7/18/2012 to develop a single specialty (orthopaedic) ambulatory surgical facility in the Charlotte Area and was licensed on May 1, 2014.</p>		

**Table 6E: Dental Single Specialty Ambulatory Surgical Facility Demonstration Project**

<b>Region</b>	<b>Provider</b>	<b>ORs</b>
Region 1: HSA IV	Surgical Center for Dental Professionals of Raleigh	2
Region 2: HSA III	Carolinas Center for Ambulatory Dentistry	2
Region 3: HSA V and HSA VI	Valleygate Dental Surgery Center of Fayetteville	2
Region 4: HSA I and HSA II	Valleygate Dental Surgery Center of the Triad	2
<p>The North Carolina 2016 State Medical Facilities Plan included need determinations for a Dental Single Specialty Ambulatory Surgical Facility Demonstration Project, consisting of four facilities with two operating rooms each to be located throughout the state. In Region 1, a Certificate of Need was awarded to the Surgical Center for Dental Professionals of Raleigh on March 1, 2017 (J-011170-16). In Region 2, a Certificate of Need was awarded to Carolinas Center for Ambulatory Dentistry in Charlotte on March 1, 2017 (F-011202-16). In Region 3, a Certificate of Need was awarded to Valleygate Dental Surgery Center of Fayetteville on March 6, 2017 (M-011176-16). In Region 4, a Certificate of Need was awarded to Valleygate Dental Surgery Center of the Triad on March 1, 2017 (G-011203-16).</p>		

**Inventory of Endoscopy Rooms in Licensed Facilities**

With the change in legislation which occurred in August 2005 (Session Law 2005-346), endoscopy rooms in licensed facilities are no longer defined as “operating rooms.” For information purposes only, a listing of endoscopy procedure rooms in licensed facilities is provided in Table 6F based on data from the 2018 Hospital and the 2018 Ambulatory Surgical Facility License Renewal Applications. The review schedule for endoscopy rooms in licensed facilities can be found in Chapter 3.

# Chapter 7:

## Other Acute Care Services

- Open Heart Surgery Services
- Burn Intensive Care Services
- Transplantation Services

---

## **CHAPTER 7**

### **OTHER ACUTE CARE SERVICES**

---

#### **Summary of Service Supply and Utilization**

During FY 2016-2017, 22 hospitals offered open-heart surgery services, providing a statewide total of 10,005 surgeries, which is an increase of 1.9 percent from the previous fiscal year.

There are two burn intensive care services located in North Carolina with a total of 29 existing Burn Intensive Care Unit beds, and eight additional beds for which certificates of need have been awarded. The reported days of care, using the capacity of 37 beds, indicated an overall average annual occupancy rate of 68.7 percent in FY 2016-2017.

There are five hospitals approved to offer both allogeneic and autologous bone marrow transplants. These facilities reported a total of 759 transplants performed during FY 2016-2017.

The Solid Organ Transplantation Services located at the five academic medical center teaching hospitals reported a total of 1,054 transplants performed during FY 2016-2017.

#### **Changes from the Previous Plan**

No substantive changes in basic principles and methodologies have been incorporated into the North Carolina 2019 State Medical Facilities Plan. Throughout the chapter, data have been revised to reflect services provided during FY 2016-2017, and dates have been advanced by one year, where appropriate.

### **OPEN-HEART SURGERY SERVICES**

#### **Definition**

“Open-heart surgery services,” as defined in G.S. 131E-176(18b), “means the provision of surgical procedures that utilize a heart-lung bypass machine during surgery to correct cardiac and coronary artery disease or defects.”

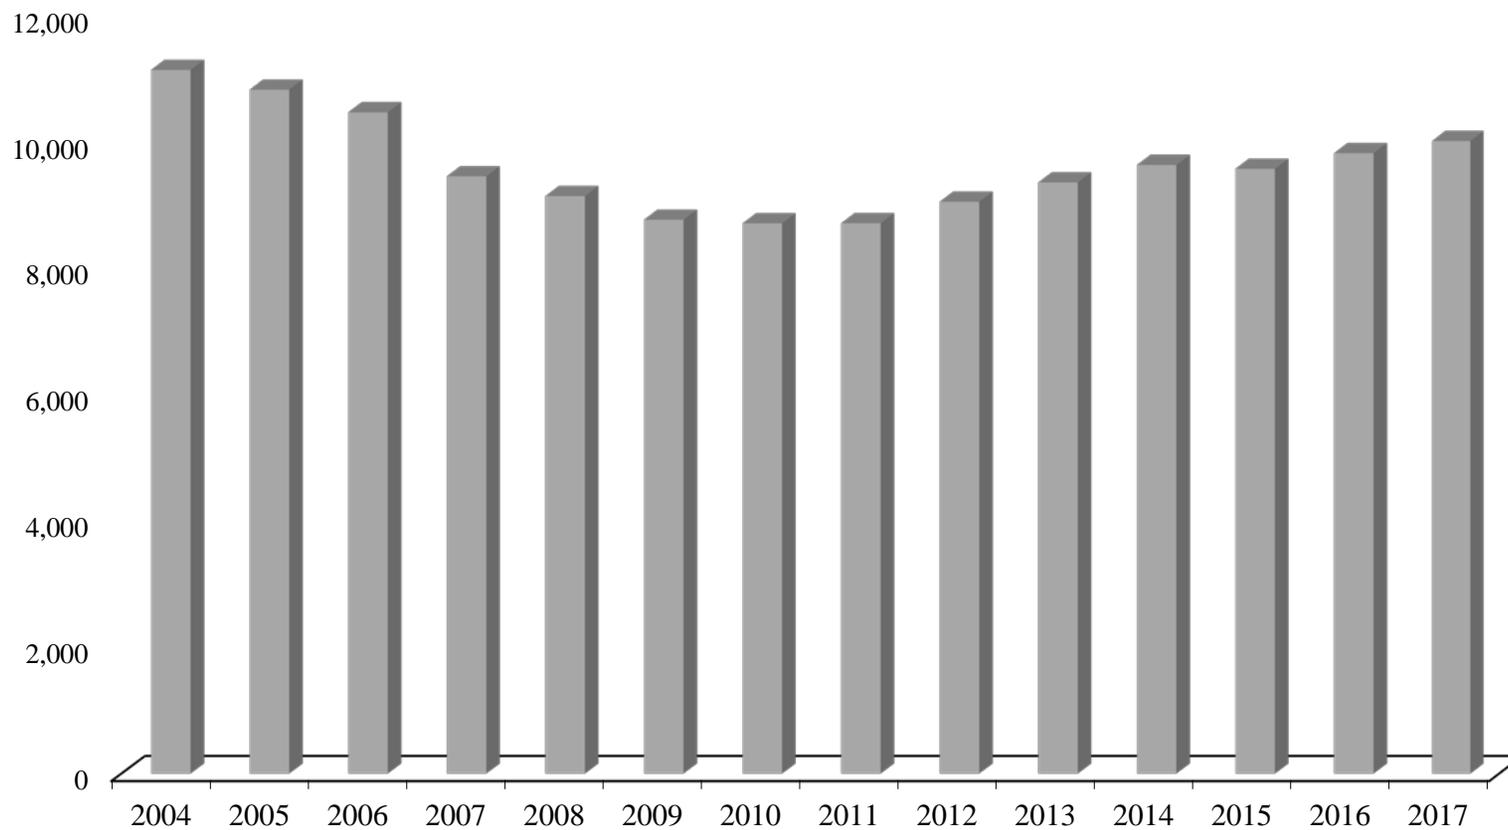

#### **Facility Inventory - Service Volume**

As the following Table 7A indicates, there were 22 open-heart surgery programs in North Carolina in 2017, providing a statewide total of 10,005 surgeries. In 2017, there was an increase in reported open-heart surgeries of 1.9 percent. Table 7A and the graph following the table show reported numbers for 2004-2017 of open-heart surgery performed using heart-lung bypass machines.

## **BURN INTENSIVE CARE SERVICES**

### **Definition**

“Burn intensive care services,” as defined in G.S. 131E-176(2b), are “services provided in a unit designed to care for patients who have been severely burned.”

### **Facility Inventory - Service Volume**

There are two designated burn intensive care services in North Carolina. A 21-bed unit is located at University of North Carolina Hospitals in Chapel Hill, and an eight-bed unit is located in Winston-Salem at North Carolina Baptist Hospital. Both hospitals received certificates of need for four new burn intensive care beds each. The reported numbers of licensed beds, census days of care, and average annual occupancy rates for the years ending 9/30/2013, 9/30/2014, 9/30/2015, 9/30/2016 and 9/30/2017 are shown in Table 7C. The percent utilization of burn intensive care services for 2013-2017 is shown on the graph following the table.

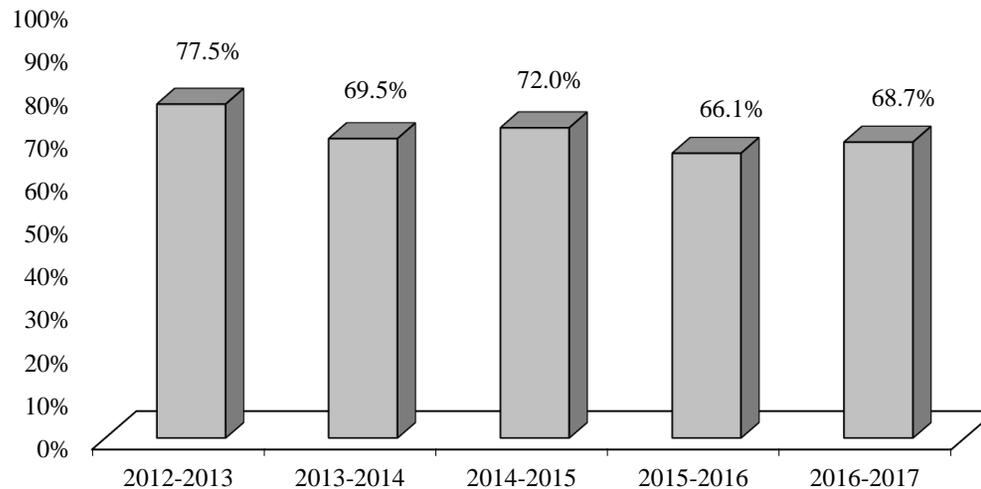

**Table 7C: Burn Intensive Care Services**

Days of care utilized by severely burned patients (DRGs 504-511) in the designated burn intensive care units

Facility	Licensed Beds	Adjustments for CONs	Total Beds	2012-2013 Total Days	2013-2014 Total Days	2014-2015 Total Days	2015-2016 Total Days	2016-2017 Total Days

<b>TOTAL</b>	29	8	37	77.5%	69.5%	72.0%	66.1%	68.7%

**Percentage Utilization Burn Intensive Care Services 2013-2017**

### **Burn Intensive Care Services Need Determination Methodology**

The need for new burn intensive care services is demonstrated when the existing burn intensive care services in the state report an overall average annual occupancy rate of at least 80 percent during the two fiscal years prior to development of the North Carolina 2019 State Medical Facilities Plan.

The determination of need for additional services in 2019 is calculated by dividing the total number of bed days utilized in 2016 by severely burned patients in the two units by the total number of burn intensive care beds in these units multiplied by 366 days. This procedure is repeated for the bed days utilized in 2017 by severely burned patients, using total existing and planned beds multiplied by 365 days.

$$\begin{aligned} \text{Percent Occupancy (average annual occupancy rate) for 2016} &= 66.1\% \\ [8,954 \text{ days of care} \div (37 \text{ beds} \times 366 \text{ days})] &= 66.1\% \end{aligned}$$

$$\begin{aligned} \text{Percent Occupancy (average annual occupancy rate) for 2017} &= 68.7\% \\ [9,303 \text{ days of care} \div (37 \text{ beds} \times 365 \text{ days})] &= 68.7\% \end{aligned}$$

If need for additional burn intensive care services in the state is determined, the number of beds needed is calculated as follows:

- Step 1: Calculate the state's four-year average annual growth rate for burn intensive care services days of care using the five most recent years of state data from Table 7C. *(Note: When calculating with a computer versus manually, rounding differences can occur. If calculating manually, the recommendation is to carry the rate out to at least four decimal places, recognizing that computer programs may use fractions with many more decimal places, resulting in slightly different projections.)*
- Step 2: Calculate the projected days of care in the state for one year from the latest data used by adding 1.00 to the four-year average annual growth rate calculated in Step 1, then multiplying by the state's most recent year's days of care. This will project days of care for 2018.
- Step 3: Determine, as shown below, how many additional beds are needed in the state such that the utilization rate for the sum of the state's total existing burn intensive care beds, and the additional beds, is 80 percent.

$$[(\text{Projected Days} \div 365) \div 0.8] - [\text{Total Existing Beds}] = \text{Additional Beds Needed}$$

**Table 7D: Burn Intensive Care Services Bed Need Determination**

Service Area	Burn Intensive Care Services Bed Need Determination*	Certificate of Need Application Due Date**	Certificate of Need Beginning Review Date
It is determined that there is no need anywhere in the state and no reviews are scheduled.			

\* Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).

\*\* Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date (see Chapter 3).

## TRANSPLANTATION SERVICES

### Bone Marrow Transplantation Services

#### Definition

“Bone Marrow Transplantation Services,” as defined in G.S. 131E-176(2a), “means the process of infusing bone marrow into people with diseases to stimulate the production of blood cells.”

Bone marrow transplants may be autologous (*using a patient’s own marrow, drawn early in the course of the disease*), or syngeneic (*using marrow from an identical twin*) or allogeneic (*using marrow from a relative other than an identical twin, or from an unrelated donor*). For allogeneic marrow transplants, the transplant service must have the ability to ascertain that a donor’s human leucocyte antigens (HLA) correspond to those of the transplant patient. Allogeneic-transplant patients are also more difficult to manage postoperatively than patients receiving autologous bone marrow transplants.

#### Facility Inventory - Service Volume

There are five Bone Marrow Transplantation Services operational in North Carolina located at Carolinas Medical Center, Duke University Hospital, North Carolina Baptist Hospital, University of North Carolina Hospitals and Vidant Medical Center. The reported numbers of transplants for the years ending 9/30/2014, 9/30/2015, 9/30/2016, and 9/30/2017 are shown in Table 7E. Total bone marrow transplants for 2014-2017 are shown on the graph following the table.

**Table 7E: Bone Marrow Transplants**

<b>Total</b>		693	757	739	759

**Total Bone Marrow Transplants: 2014 - 2017**

**Bone Marrow Transplantation Service Need Determination Methodology**

The need for a new Bone Marrow Transplantation Service is demonstrated when each of the existing services has performed at least 20 allogeneic transplants during the fiscal year prior to development of the North Carolina 2019 State Medical Facilities Plan. Allogeneic bone marrow transplants shall be provided only in facilities having the capability of doing HLA matching and of management of patients having solid organ transplants. At their present stage of development, it is determined that allogeneic bone marrow transplantation services shall be limited to academic medical center teaching hospitals.

**Table 7F: Bone Marrow Transplantation Services Need Determination**

Service Area	Bone Marrow Transplantation Services Bed Need Determination*	Certificate of Need Application Due Date**	Certificate of Need Beginning Review Date
It is determined that there is no need anywhere in the state and no reviews are scheduled.			

\* Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).

\*\* Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date (see Chapter 3).

**Solid Organ Transplantation Services**

**Definition**

“Solid Organ Transplantation Services,” as defined in G.S. 131E-176(24d), “means the provision of surgical procedures and the interrelated medical services that accompany the surgery to remove an organ from a patient and surgically implant an organ from a donor.”

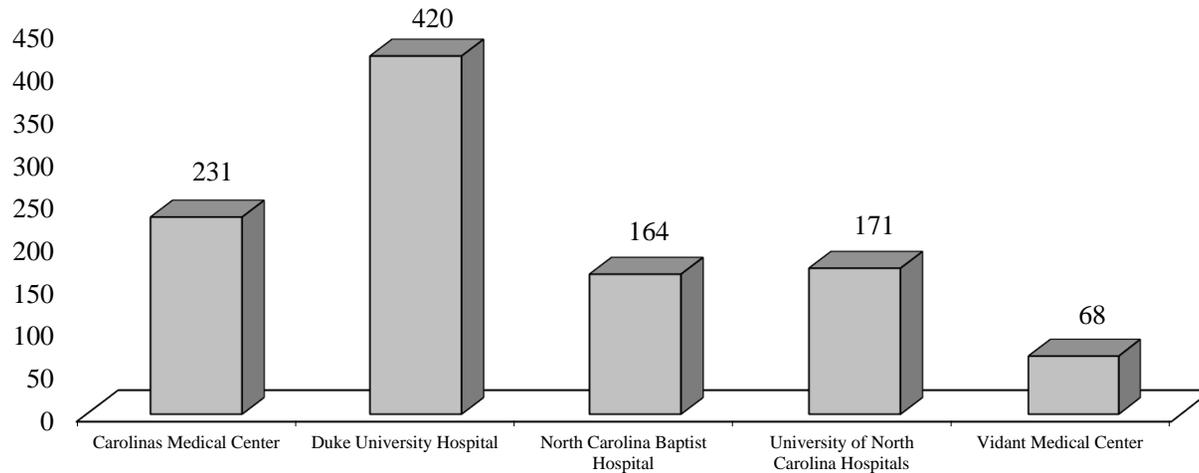

**Facility Inventory - Service Volume**

There are five Solid Organ Transplantation Services in North Carolina located at the five academic medical center teaching hospitals. The reported numbers of transplants performed at these five centers for the year ending 9/30/2017 are presented in Table 7G and on the graph following the table.

**Table 7G: Solid Organ Transplantation Services**

<b>Total</b>	231	420	164	171	68	1,054

**Solid Organ Transplants by Facility: Year Ending September 30, 2017**

**Solid Organ Transplantation Service Need Determination Methodology**

The offering of a solid organ (heart, heart/lung, kidney, liver and pancreas) transplant service is an organized, interrelated medical, diagnostic, therapeutic and/or rehabilitative activity that is integral to the prevention of disease or to the clinical management of a sick, injured, or disabled person.

In addition to the costs directly associated with transplant surgery, hospitals experience significant costs prior to and following the transplant procedure. A principal aspect of this cost is the immunological subspecialty skills and laboratory support required to assure immunosuppression levels that are sufficient to prevent graft rejection but which are not so great as to cause unnecessary hazards to the life of the patient. The average cost of care per patient in such programs elsewhere has been found to be inversely related to the volume of transplant procedures performed in a facility.

The scarcity of donor organs demands that the available organ resources be used as skillfully as possible. Such skills currently are found in transplant services of academic medical center teaching hospitals. Solid organ transplant services shall be limited to academic medical center teaching hospitals at this stage of the development of this service and availability of solid organs. Current volumes of procedures performed in existing solid organ transplant services in North Carolina are not sufficient to require that additional solid organ transplant services be developed. The introduction of a new solid organ transplantation program in a facility which already is performing other types of solid organ transplantation is not considered a new health service unless such addition requires a capital expenditure of \$2 million or more.

**Table 7H: Solid Organ Transplantation Services Need Determination**

<b>Service Area</b>	<b>Solid Organ Transplantation Services Need Determination*</b>	<b>Certificate of Need Application Due Date**</b>	<b>Certificate of Need Beginning Review Date</b>
It is determined that there is no need anywhere in the state and no reviews are scheduled.			

\* Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).

\*\* Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date (see Chapter 3).

# Chapter 8:

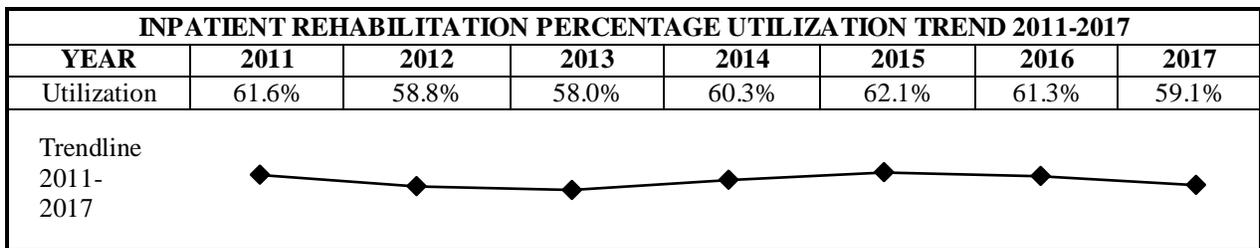

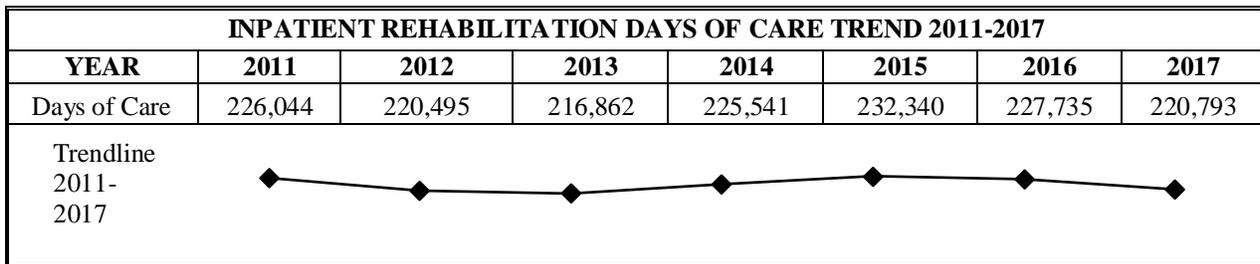

Inpatient Rehabilitation Services

## CHAPTER 8

# INPATIENT REHABILITATION SERVICES

### Summary of Bed Supply and Utilization

In the fall of 2018, there were 995 inpatient rehabilitation beds in 27 facilities strategically located throughout North Carolina. As shown on the tables below, from an historical perspective, the days of care decreased from 2011-2013, increased from 2013-2015, and then decreased from 2015-2017. The percentage utilization of inpatient rehabilitation beds follows a similar pattern.

Across the state, both the days of care and the percent utilization of the beds decreased during the most recent annual reporting period. Of the 27 facilities providing services during the reporting period, 13 facilities indicated increased utilization, and 13 facilities indicated decreased utilization. One facility was at zero percent utilization or did not report utilization figures.

### Changes from Previous Plans

No substantive changes in the inpatient rehabilitation bed need projection methodology were incorporated into the North Carolina 2019 State Medical Facilities Plan. The inpatient rehabilitation bed need determination methodology is based on historic utilization of beds over a two-year period.

### Basic Principles

The scope of services covered in this section of the North Carolina 2019 State Medical Facilities Plan is limited to rehabilitation services provided to people who are physically disabled. Physical rehabilitation services exclude mental health and substance use disorder services, but include those mental health services needed by individuals primarily suffering from physical injury or disease, and rehabilitation services provided to people who are cognitively disabled as a result of physical injury or disease.

The combination of component services required to meet the needs of the individual is provided using an interdisciplinary approach and continues as long as, within a reasonable period of time, significant and observable improvement toward established goals is taking place. Where necessary, these services are provided through a spectrum of care using a system of case management.

Inpatient rehabilitation beds include comprehensive (general), spinal cord, brain injury and pediatric beds.

Inpatient rehabilitation facilities' units/beds should be located in general acute care or rehabilitation hospitals or in nursing facilities to ensure that there is available medical back-up for medical emergencies.

### **Basic Assumptions of the Methodology**

- The Health Service Areas remain logical planning areas for inpatient rehabilitation beds even though many patients elect to enter rehabilitation facilities outside the region in which they reside.
- The bed need determination methodology is based upon the historic average annual utilization of inpatient rehabilitation beds.

### **Source of Data**

**Annual Hospital Licensure Applications** – The numbers of inpatient rehabilitation bed days of care were compiled from the 2017 and 2018 Hospital License Renewal Applications as submitted to the Division of Health Service Regulation of the North Carolina Department of Health and Human Services.

### **Inpatient Rehabilitation Bed Need Projection Methodology**

Need for additional inpatient rehabilitation beds in any of the six Health Service Areas is determined when the total number of existing and certificate of need-approved inpatient rehabilitation beds in a Health Service Area report an overall average, annual occupancy rate of 80 percent or higher during the two fiscal years prior to developing the North Carolina 2019 State Medical Facilities Plan.

The determination of need based on average annual occupancy rate for additional inpatient rehabilitation beds or facilities in a Health Service Area for Plan Year 2019 is calculated by dividing the total number of rehabilitation bed days of care reported in FY 2015-2016 in all units in the Health Service Area by the total number of licensed and certificate of need-approved rehabilitation beds in these units multiplied by 366 days, and the total number of rehabilitation bed days of care reported in FY 2016-2017 in all units in the Health Service Area by the total number of licensed and certificate of need-approved rehabilitation beds in these units multiplied by 365 days.

If need for additional inpatient rehabilitation beds in a Health Service Area is determined, the number of beds needed is calculated as follows:

Step 1: Calculate the Health Service Area's three-year average annual growth rate for inpatient rehabilitation days of care using the four most recent years of Health Service Area data.

Step 2: Calculate the projected days of care in the Health Service Area by multiplying the Health Service Area's most recent year's days of care by the three-year average annual rate of change calculated in Step 1, then adding this to the Health Service Area's most recent year's days of care.

Step 3: Determine, as shown below, how many additional beds are needed in the Health Service Area such that the utilization rate for the sum of the Health Service Area's total planning inventory (existing, certificate of need issued and pending development/review/appeal beds) and the additional beds is 80 percent.

$$[(\text{Projected Days} \div 365) \div .8] - [\text{Total Planning Inventory}] = \text{Additional Beds Needed}$$

**Table 8A: Inventory and Utilization of Inpatient Rehabilitation Beds**

# Chapter 9:

## Technology & Equipment

- Lithotripsy
- Gamma Knife
- Linear Accelerators
- Positron Emission Tomography Scanner
- Magnetic Resonance Imaging
- Cardiac Catheterization Equipment

---

## **CHAPTER 9**

# **TECHNOLOGY AND EQUIPMENT**

---

### **Summary of Service Supply and Utilization**

The number of lithotripsy procedures reported on lithotripters registered in North Carolina for 2016-2017 was 9,253. There were 15 lithotripsy units operated by eight providers.

The present gamma knife located at North Carolina Baptist Hospital in Health Service Area (HSA) II serves the western portion of the state (HSAs I, II, and III). During 2016-2017, 457 gamma knife procedures were reported. Vidant Medical Center received a certificate of need pursuant to a need determination in the North Carolina 2003 State Medical Facilities Plan for one gamma knife to serve the eastern portion of the state (HSAs IV, V and VI). Vidant Medical Center began offering service as of October 2005, and reported 164 gamma knife procedures provided during 2016-2017. The two gamma knives assure that the western and eastern portions of the state have equal access to gamma knife services.

Linear accelerators provided 603,450 Equivalent Simple Treatment Visit procedures that are counted for need determination purposes in 2016-2017. The average number of procedures statewide per linear accelerator as shown in Table 9G is 4,789. There are 126 linear accelerators in North Carolina that are operational, have a certificate of need, or for which there is a prior year need determination.

Twenty-two hospitals and two outpatient facilities reported a total of 40,685 procedures for fixed Positron Emission Tomography (PET) Scanners that were operational in the reporting period. Thirty-seven sites reported 7,265 procedures in total for mobile PET service.

In 1983, there were only two magnetic resonance imaging (MRI) programs in North Carolina, performing a total of 531 procedures. In 2016-2017, fixed and mobile scanners were reported as providing 872,498 procedures.

A total of 56 hospitals provided fixed cardiac catheterization services during fiscal year 2016-2017. Also, during fiscal year 2016-2017 mobile cardiac catheterization services were reported at four hospitals across the state.

### **Changes from the Previous Plan**

No substantive changes in basic principles and methodologies have been incorporated into the Technology and Equipment Chapter in the North Carolina 2019 State Medical Facilities Plan.

Throughout the chapter, data have been revised to reflect services provided during FY 2016-2017, and dates have been advanced by one year, where appropriate.

# LITHOTRIPSY

## Introduction

Lithotripsy is defined as the pulverization of urinary stones by means of a lithotripter. Extracorporeal lithotripsy is lithotripsy that occurs outside the body. Extracorporeal shock wave lithotripsy (ESWL) is the non-invasive procedure with which this section will concern itself.

A lithotripter is a device that uses shock waves to pulverize urinary stones, which can then be expelled in the urine. An emitter is placed in contact with the patient's abdomen and the shock waves are focused on the stone, which is shattered by the force.

A lithotripter's service area is the lithotripter planning area in which the lithotripter is located. The lithotripter planning area is the entire state.

## Lithotripter Utilization

Lithotripter utilization can be reasonably estimated by the incidence of urinary stone disease. Urinary stone disease, or urolithiasis, is a disease in which urinary tract stones or calculi are formed. The annual incidence of urinary stone disease is approximately 16 per 10,000 population<sup>1</sup>. Not all cases of urinary stone disease would be appropriately treated by lithotripsy. It has been estimated that 85 to 90 percent of kidney stone patients, when surgery is indicated, can be treated successfully by ESWL treatment. The annual treatment capacity of a lithotripter has been estimated to be 1,000 to 1,500 cases.

The number of lithotripsy procedures reported in North Carolina for the period of 2016-2017 was 9,253 procedures. There were 15 lithotripsy units operated by eight providers. Procedures were provided by a fixed unit at one facility, and by 14 mobile units operated by seven providers. The average number of procedures per lithotripter for the 2016-2017 fiscal year is 617.

## Access

Due to the mobility of lithotripter services, and the subsequent number of sites from which the service is provided, it may be concluded that geographic access is available to the maximum economically feasible extent.

## Lithotripsy Need Determination Methodology

North Carolina uses a methodology based on the incidence of urinary stone disease. The need is linked to the estimate of urinary stone disease cases and is based on the assumption that 90 percent could be treated by ESWL.

The standard methodology used for determining need for lithotripters is calculated as follows:

- Step 1: Divide the July 1, 2019 estimated population of the state, available from the North Carolina Office of State Budget and Management, by 10,000 and multiply the result by 16, which is the estimated incidence of urinary stone disease per 10,000 population.
- Step 2: Multiply the result from Step 1 by 90 percent to get the number of patients in the state who have the potential to be treated by lithotripsy in one year.

<sup>1</sup> Pahiri, J.J. & Razack, A.A. (2001) "Chapter 9: Nephrolithiasis." In *Clinical Manual of Urology*, by Philip M. Hanno, Alan J. Wein, & S. Bruce Malkowicz. McGraw-Hill Professional Publisher.

- Step 3: Divide the result of Step 2 by 1,000, which is the low range of the annual treatment capacity of a lithotripter, and round to the nearest whole number.
- Step 4: Sum the number of existing lithotripters in the state, lithotripters not yet operational but for which a certificate of need has been awarded, and lithotripter need determinations from previous years for which a certificate of need has yet to be awarded.
- Step 5: Subtract the result of Step 4 from the result of Step 3 to calculate the number of additional lithotripters needed in the state.

**Lithotripsy Services in North Carolina**

There are eight providers that offer lithotripsy services in North Carolina. On the following pages, Table 9A and Table 9B provide information on the number of procedures as well as the location of the facilities served by these eight providers.

## **GAMMA KNIFE**

### **Definition**

"Gamma Knife," as defined in General Statute § 131E-176(7c), means "equipment which emits photon beams from a stationary radioactive cobalt source to treat lesions deep within the brain and is one type of stereotactic radiosurgery."

Two types of equipment, both using photon beams, are available for performing this kind of radiosurgery. In one type, beams from a linear accelerator are focused from a device that rotates around the patient. The other type of equipment, gamma knife, emits 201 beams from stationary radioactive cobalt sources.

### **Facility Inventory-Service Volume**

Gamma knife fixed and movable equipment capital costs exceed \$3,500,000. There is one gamma knife that was approved for acquisition pursuant to Policy AC-3 of the North Carolina 1998 State Medical Facilities Plan. The approved unit is located at North Carolina Baptist Hospital and became operational effective September 1, 1999. During 2016-2017, as reported in the "2018 Hospital License Renewal Application," which reflects 2017 data, 457 gamma knife procedures were reported. Vidant Medical Center received a certificate of need pursuant to a need determination in the North Carolina 2003 State Medical Facilities Plan for one gamma knife to serve the eastern portion of the state (HSAs IV, V and VI). Vidant Medical Center began offering service as of October 2005. During 2016-2017, 164 gamma knife procedures were reported.

### **Gamma Knife Need Determination Methodology**

A gamma knife's service area is the gamma knife planning region in which the gamma knife is located. There are two gamma knife planning regions, the west region (HSAs I, II, and III) and the east region (HSAs IV, V, and VI). The gamma knife located at North Carolina Baptist Hospital in HSA II serves the western portion of the state (HSAs I, II, and III). The gamma knife located at Vidant Medical Center in HSA VI serves the eastern portion of the state (HSAs IV, V and VI). The two gamma knives assure that the western and eastern portions of the state have equal access to gamma knife services. There is adequate capacity and geographical accessibility for gamma knife services in the state.

**Table 9E: Gamma Knife Need Determination**

<b>Gamma Knife Planning Region</b>	<b>HSA</b>	<b>Gamma Knife Need Determination*</b>	<b>Certificate of Need Application Due Date**</b>	<b>Certificate of Need Beginning Review Date</b>
It is determined that there is no need anywhere in the state and no reviews are scheduled.				

\* Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).

\*\* Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date. (see Chapter 3).

## **LINEAR ACCELERATORS**

### **Introduction**

The methodology incorporates a geographic accessibility criterion (a population base of 120,000), a criterion aimed at assuring efficient use of megavoltage radiation facilities (when Equivalent Simple Treatment Visit (ESTV) procedures divided by 6,750 minus the number of present linear accelerators equals .25+), and a patient origin criterion that indicates when a service area has 45 percent or more of the patients coming from outside the service area. A need determination is generated when two of the three criteria are met within a service area.

Counties are the basic units for the formation of linear accelerator service areas, based on proximity, utilization patterns, and patient origin data. A small percentage of the population lives some distance from a linear accelerator, but the sparsity of population in and around these areas does not provide the population required to support a linear accelerator.

The statewide average number of procedures per accelerator as shown in Table 9G is 4,789.

### **Assessment -- Linear Accelerators**

Radiation therapy (megavoltage radiation) is used in the treatment of about half of all cancers. Its users seek to destroy cancer cells with ionizing radiation while limiting damage to non-cancerous tissue. Linear accelerators are now the instruments of choice because most are capable of producing either electron or photon beams at variable energy levels.

In the 2018 Hospital License Renewal Applications and Linear Accelerator Registration and Inventory Forms, which reflect 2017 data, 39 linear accelerators in 39 different locations in North Carolina are reported as being operational and providing stereotactic radiosurgery treatment: Alamance Regional Medical Center (91 procedures); CarolinaEast Health System (96 procedures); Carolinas HealthCare System NorthEast (374 procedures); Carolinas HealthCare System Union (57 procedures); Carolinas HealthCare System University (69 procedures); Carolinas Medical Center (657 procedures); CaroMont Regional Medical Center (226 procedures); Carteret General Hospital (107 procedures); Catawba Valley Medical Center (235 procedures); Cone Health (555 procedures); Duke Raleigh Hospital (83 procedures); Duke Regional Hospital (47 procedures); Duke University Hospital (1,797 procedures); First Health Moore Regional Hospital (250 procedures); Frye Regional Medical Center (69 procedures); High Point Regional Health (123 procedures); Iredell Memorial Hospital (30 procedures); Margaret R. Pardee Memorial Hospital (5 procedures); Mission Health (540 procedures); New Hanover Regional Medical Center (713 procedures); North Carolina Baptist Hospital (531 procedures); Novant Health Forsyth Medical Center (180 procedures); Novant Health Huntersville Medical Center (46 procedures); Novant Health Presbyterian Medical Center (306 procedures); Rex Hospital (262 procedures); Southeastern Regional Medical Center (31 procedures); UNC Lenoir Health Care (57 procedures); University of North Carolina Hospitals (749 procedures); and North Carolina Radiation Therapy Management Services locations in Asheville (80 procedures); Brevard (20 procedures); Forest City (45 procedures); Goldsboro (15 procedures); Greenville (685 procedures); Hendersonville (5 procedures); and Marion (17 procedures).

In recent years, radiation therapy has been offered increasingly in comprehensive oncology programs where medical oncologists and hematologists also offer chemotherapy. Most such programs are associated with general hospitals, but some are freestanding. Some programs offering only radiation therapy, or only chemotherapy, may refer to themselves as oncology centers. A new radiation oncology facility, with necessary equipment, usually costs in excess of \$2 million.

In addition to a linear accelerator, every radiation oncology program uses a treatment simulator to aid in treatment planning, a computer for calculating dosages, and devices for cutting blocks to protect non-targeted areas from radiation. One simulator, which is the most expensive of these additional items (\$200,000 - \$400,000), can serve a facility with three linear accelerators or serve multiple facilities with up to four linear accelerators total. The specialized staff who operate and maintain this equipment, including a required radiation physicist, are more efficiently utilized in facilities with more than one linear accelerator.

There are 70 hospitals and freestanding oncology treatment centers statewide in North Carolina with 126 linear accelerators that are operational, have a certificate of need in hand, or for which there is a prior year need determination.

The utilization methodology used calls for data gathering that is uniform. There are radiation treatments of varying complexity, and the concept of ESTV is used. ESTVs are recommended by the American College of Radiology. In addition, ESTVs were recommended as part of the comments during public hearings when the original methodology was developed.

The data gathering survey that Healthcare Planning sends out to providers asks for procedures by CPT codes; corresponding ESTV values are listed in Table 9F of the North Carolina 2019 State Medical Facilities Plan. Hospitals and free-standing centers have responded well in reporting procedures that can be calculated as ESTV totals.

#### **Basic Assumptions of the Methodology**

A linear accelerator's service area is the linear accelerator planning area in which the linear accelerator is located. Linear accelerator planning areas are the 28 multi-county groupings shown in Table 9I. In determining whether an additional linear accelerator is needed in a service area, three principal questions must be addressed:

1. Are the linear accelerators in a linear accelerator service area performing more than 6,750 procedures (ESTVs) per accelerator per year?
2. Is the population that lives in a linear accelerator service area sufficiently great to support the addition of another accelerator (population per accelerator greater than 120,000 - a figure suggested by the Inter-Society Council for Radiation Oncology)?
3. Does the patient origin data show that more than 45 percent of the patients come from outside the service area?

Patient origin data is requested in order to establish service areas, and the vast majority of facilities have responded with patient origin data.

To examine the second and third questions, linear accelerator service areas are delineated, including in each area the counties that are closest to a linear accelerator. Two exceptions were employed in applying this method:

- a. Where patient origin data indicate a county's primary use of a linear accelerator that is not the closest, the county is aligned with the linear accelerator county where most or a plurality of its citizens go for linear accelerator services. Example: Alleghany to Forsyth.
- b. When a linear accelerator county has a population too small to support it, that county is combined with an adjacent county to which a sizable percentage of patients go for linear

accelerator services, according to the base county's patient origin data. Example: Haywood to Buncombe.

Data regarding each of the linear accelerator service areas of North Carolina were organized so as to examine each of the questions noted above.

### **Linear Accelerator Methodology for Determining Need**

The methodology incorporates a geographic accessibility criterion (population base of 120,000), a criterion aimed at assuring efficient use of megavoltage radiation facilities (when ESTV procedures divided by 6,750 minus the number of present linear accelerators equals .25+), and a patient origin criterion (when a service area has more than 45 percent of the patients coming from outside the service area). A need determination is generated when two of the three criteria are met within a service area.

The standard methodology used for determining need for linear accelerators is calculated as follows:

#### **Criterion 1:**

- Step 1: Using the 2018 North Carolina population estimate obtained from the North Carolina Office of State Budget and Management, sum the population estimates for counties that comprise each linear accelerator service area to determine the population for linear accelerator service areas.
- Step 2: For each linear accelerator service area, sum the number of operational linear accelerators acquired in accordance with G.S. 131E-175, et. seq., the number of approved linear accelerators not yet operational but for which a certificate of need has been awarded, and the linear accelerator need determinations from previous years.
- Step 3: Divide the service area population by the result of Step 2 to determine the population residing in the service area per linear accelerator. If the result is greater than or equal to 120,000 per linear accelerator, Criterion 1 is satisfied.

#### **Criterion 2:**

- Step 4: Using patient origin data reported on the 2018 Hospital License Renewal Applications and Linear Accelerator Registration and Inventory Forms for linear accelerators, for each service area, count the number of patients who were served on linear accelerators located in the service area, and who reside in a county outside the service area.
- Step 5: For each service area, divide the results of Step 4 by the total number of patients served on linear accelerators located in the service area. If more than 45 percent of total patients served on linear accelerators located in a service area reside outside the service area, then Criterion 2 is satisfied.

#### **Criterion 3:**

- Step 6: For each linear accelerator service area, sum the number of ESTV procedures performed on the linear accelerators located in the service area as reported in each provider's "2018 Hospital License Renewal Application" or "2018 Registration and Inventory of Medical Equipment Form" of Linear Accelerators.
- Step 7: Divide the results of Step 6 by the number of linear accelerators in the service area which are counted in Step 2 to determine the average number of ESTV procedures performed per linear accelerator in each linear accelerator service area.

- Step 8: Divide the results of Step 7 by 6,750 ESTV procedures.
- Step 9: Subtract the number of linear accelerators in the service area counted in Step 2 from the results of Step 8. If the difference is greater than or equal to positive 0.25, Criterion 3 is satisfied.
- Step 10: If any two of the above three criteria are satisfied in a linear accelerator service area, a need is determined for one additional linear accelerator in that service area.

**Criterion 4:**

- Step 11: Regardless of the results of Steps 1-10 above, if a county has a population of 120,000 or more and there is not a linear accelerator counted in Step 2 for that county, a need is determined for one linear accelerator for that county. As a result, the county becomes a separate, new linear accelerator service area.

**Linear Accelerator CPT Codes**

It was suggested by some radiation oncologists in 2006 that CPT Code 77427, weekly radiation therapy management, not be counted in the totals of freestanding radiation oncology centers. The advice was accepted in 2006 for the North Carolina 2007 State Medical Facilities Plan, and procedure counts for CPT Code 77427 were removed from the totals. Procedure counts for CPT Code 77427 are not included in Table 9G in the North Carolina 2019 State Medical Facilities Plan.

**Note:**

The North Carolina 2009 State Medical Facilities Plan included a statewide need determination for one dedicated linear accelerator to be part of a demonstration project for a model multidisciplinary prostate health center focused on the treatment of prostate cancer, particularly in African American men. In response to that need determination, a certificate of need was issued to Parkway Urology, PA d/b/a Cary Urology, PA on 2/23/2011 to acquire one dedicated linear accelerator for a model multidisciplinary prostate health center focused on the treatment of prostate cancer, particularly in African American men. The linear accelerator was not counted in the regular inventory of linear accelerators for the duration of the demonstration. The demonstration has concluded and the linear accelerator is in the regular inventory for the 2019 SMFP.

**Table 9F: Linear Accelerator Treatment Data - Hospital and Free-Standing**

CPT Code	Description	ESTVs/ Procedures Under ACR
<i>Simple Treatment Delivery</i>		
77401	Radiation treatment delivery	1.00
77402	Radiation treatment delivery (<=5 MeV)	1.00
77403	Radiation treatment delivery (6-10 MeV)	1.00
77404	Radiation treatment delivery (11-19 MeV)	1.00
77406	Radiation treatment delivery (>=20 MeV)	1.00
<i>Intermediate Treatment Delivery</i>		
77407	Radiation treatment delivery (<=5 MeV)	1.00
77408	Radiation treatment delivery (6-10 MeV)	1.00
77409	Radiation treatment delivery (11-19 MeV)	1.00
77411	Radiation treatment delivery (>=20 MeV)	1.00
<i>Complex Treatment Delivery</i>		
77412	Radiation treatment delivery (<=5 MeV)	1.00
77413	Radiation treatment delivery (6-10 MeV)	1.00
77414	Radiation treatment delivery (11-19 MeV)	1.00
77416	Radiation treatment delivery (>= 20 MeV)	1.00
<i>Other CPT Codes</i>		
77417	Additional field check radiographs	.50
77418	Intensity modulated radiation treatment (IMRT) delivery	1.00
77371	Radiation treatment delivery, stereotactic radiosurgery (SRS), complete course of treatment of cranial lesion(s) consisting of 1 session; multisource Cobalt 60 based (Gamma Knife)	3.00
77372	Radiation treatment delivery, stereotactic radiosurgery (SRS), complete course of treatment of cranial lesion(s) consisting of 1 session; linear accelerator	3.00
77373	Stereotactic body radiation therapy, treatment delivery, per fraction to 1 or more lesions, including image guidance, entire course not to exceed 5 fractions	3.00
G0339	(Image-guided) robotic linear accelerator-based stereotactic radiosurgery in one session or first fraction	3.00
G0340	(Image-guided) robotic linear accelerator-based stereotactic radiosurgery, fractionated treatment, 2nd-5th fraction	3.00
	Total body irradiation	2.50
	Hemibody irradiation	2.00
	Intraoperative radiation therapy (conducted by bringing the anesthetized patient down to the linear accelerator)	10.00
	Neutron and proton radiation therapy	2.00
	Limb salvage irradiation	1.00
	Pediatric patient under anesthesia	1.50

Service Area 18***	1	April 15, 2019	May 1, 2019
It is determined that there is no need anywhere in the state and no other reviews are scheduled.			

- \* Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).
- \*\* Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date. (see Chapter 3).
- \*\*\* In response to a petition, the State Health Coordinating Council approved the adjusted need determination for one additional linear accelerator for Service Area 18, to be developed in Robeson County.

## POSITRON EMISSION TOMOGRAPHY SCANNER

### Definition

Positron Emission Tomography (PET) Scanner, as defined in General Statute § 131E-176(19a), means “Equipment that utilizes a computerized radiographic technique that employs radioactive substances to examine the metabolic activity of various body structures.”

From its introduction in the mid-1980s until the last few years, PET scanning was used more in research than clinical practice. Early clinical applications focused on the heart and the brain.

Now, the clinical uses of PET scanning include applications that involve the diagnosis of cancer. At North Carolina’s most active PET facilities, the diagnosis of cancer accounts for more than 80 percent of clinical studies.

A PET scanner is a device with multiple radiation detectors designed to detect the two simultaneous photons emitted from the body after positron annihilation. Positron annihilation occurs after a positron (a sub-atomic particle) is emitted from certain radioactive substances. Such events are recorded over the course of a scan and subsequently reconstructed via computerized techniques into images. These images represent the cross-sectional distribution of the radioactive (positron-emitting) tracer in the body. By measuring the distributions of certain radiotracers in the body sometime after they have been administered, PET can be used both to diagnose physical abnormalities and to study body functions in normal subjects.

PET differs from other nuclear medicine both in the type of radiation emitted and in the type of scanner required to detect it. The radioactive tracers used in PET imaging may be produced on-site with a cyclotron (or generator, for some tracers) and appropriate chemistry labs, or may be ordered from commercial distributors, even though all PET tracers are relatively short-lived (110 minutes is the longest half-life). Therefore, the capital costs associated with developing the equipment capable of PET scanning can range from a few hundred thousand dollars (for the gamma camera being upgraded with coincident circuitry to perform PET scans) to less than \$1 million (for a low-end scanner) to several million dollars for a high-end scanner, a cyclotron, and associated chemistry capabilities.

Coincidence cameras are “built” by adding electronic circuitry to gamma cameras. The coincident circuitry makes it a PET system. The coincidence camera is nuclear medicine equipment that is designed, built or modified to detect only the single photon emitted from nuclear events other than positron annihilation. This hybrid machine is used as a gamma camera 90-95 percent of the time to perform non-PET imaging; thus, coincidence cameras are non-dedicated PET scanners.

The first PET scanners were dedicated machines performing only that service, supported by cyclotrons on-site. However, PET scanners also include hybrid machines, performing a variety of nuclear medicine studies and supported by new tracer production facilities housing cyclotrons in stand-alone facilities.

All these machines are PET scanners as defined in G.S. § 131E-176(19a), but they vary widely in their capabilities. The less expensive hybrid devices are capable of disclosing the presence of lesions as small as 1.5 to 2 centimeters, while the better dedicated scanners can disclose lesions as small as 0.5 to 1 centimeter. Because they can provide definitive studies for many patients and because they cost less, hybrid devices have quickly found a market.

The leading impetus to hybridization is the fact that the technology is rapidly improving. As a result, less expensive devices are now better than their predecessors and higher-end dedicated scanners are being adapted to include computed tomography (CT) scanners, which will give them the capacity to perform,

more accurately, the range of studies now performed on hybrid machines. Additionally, mobile PET scanners are available, and the number in operation in the United States is growing.

Dedicated PET scanners can be fixed or mobile. Mobile PET scanner means a dedicated PET scanner and its transporting equipment that is moved to provide services at two or more host facilities.

The rapid improvements in the equipment are being driven both by the rate of technological advances and by the steady growth in the number of clinical studies for which the Centers for Medicare & Medicaid Services (CMS) authorizes reimbursement. Among oncologists, oncologic surgeons, and radiation oncologists, PET is already recognized as essential to the diagnosis and treatment of patients with melanoma, colorectal cancer, lung cancer and lymphoma. CMS has approved reimbursement for studies for patients with solitary pulmonary nodules, carcinoma of the lung (non-small cell), melanoma, colorectal cancer, lymphoma, head and neck tumors, esophageal cancer, breast cancer, refractory seizures, perfusion of the heart, and questions concerning myocardial viability.

### **Facility Inventory-Service Volume**

There are 30 approved or operational fixed dedicated PET scanners in North Carolina. Duke University Hospital acquired a cyclotron generated fixed dedicated PET scanner in 1985. During the following years, North Carolina Baptist Hospital, Carolinas Medical Center (CMC) and University of North Carolina (UNC) Hospitals also acquired a cyclotron generated fixed dedicated PET scanner each. Vidant Medical Center, Rex Hospital, Mission Hospital, New Hanover Regional Medical Center, Catawba Valley Medical Center/Frye Regional Medical Center (joint ownership), Cape Fear Valley Medical Center, FirstHealth Moore Regional Hospital, Novant Health Forsyth Medical Center, Cone Health, CaroMont Regional Medical Center, Carolinas HealthCare System (CHS) NorthEast, CarolinaEast Medical Center, Novant Health Presbyterian Medical Center, High Point Regional Health and Wake PET Services were approved for each entity to acquire one fixed dedicated PET scanner. Duke University Hospital, CMC and UNC Hospitals were also approved to acquire a second fixed dedicated PET scanner. There were three additional need determinations in the North Carolina 2006 State Medical Facilities Plan, one each in HSAs II, III, and VI. Alamance Regional Medical Center, Iredell Memorial Hospital, and Nash General Hospital were approved in 2007 to acquire fixed dedicated PET/CT scanners. In the 2008 State Medical Facilities Plan, there were two need determinations, one each in HSAs II and III. Novant Health Forsyth Medical Center was approved to acquire a second fixed PET/CT scanner and CHS Union was approved to acquire a fixed PET scanner. The 2013 State Medical Facilities Plan identified the need for one additional fixed dedicated PET scanner in HSA II. North Carolina Baptist Hospital was approved in 2014 to acquire a second dedicated PET/CT scanner. There was a need determination in the North Carolina 2017 State Medical Facilities Plan for one fixed PET scanner in HSA IV. The reported number of procedures performed on these fixed dedicated PET scanners for the years ending 9/30/2014, 9/30/2015, 9/30/2016 and 9/30/2017 are reflected in Table 9L. Table 9L is followed by Tables 9M(1) and 9M(2). Table 9M(2) reflects the reported number of procedures performed on mobile dedicated PET scanners for the years ending 9/30/2014, 9/30/2015, 9/30/2016 and 9/30/2017.

### **Fixed Dedicated PET Scanner Need Methodology**

A fixed PET scanner's service area is the HSA in which the scanner is located. The HSAs are the six multi-county groupings as defined in Appendix A of the North Carolina 2019 State Medical Facilities Plan.

A mobile PET scanner has a statewide service area.

One additional fixed dedicated PET scanner is needed for each existing fixed dedicated PET scanner that was utilized at or above 80 percent of capacity during the 12-month period reflected in the owner's "2018 Hospital License Renewal Application" or "2018 Registration and Inventory of Medical Equipment Form"

for PET scanners on file with the North Carolina Division of Health Service Regulation.<sup>1</sup> In the 2009 State Medical Facilities Plan, the North Carolina State Health Coordinating Council approved a change in the annual capacity for fixed dedicated PET scanners from 2,600 to 3,000 procedures. For the purposes of this determination, the annual capacity of a fixed dedicated PET scanner is 3,000 ( $3,000 \times .80 = 2,400$ ) procedures.

The standard methodology used to determine need for fixed PET scanners is calculated as follows:

**Methodology Part 1:**

- Step 1: Determine the planning inventory of all fixed PET scanners in the state, to include existing fixed PET scanners in operation, approved fixed PET scanners for which a certificate of need was issued but is pending development, and fixed PET scanners for which no certificate of need has been issued, because the decision on a need determination in a previous year is under review or appeal.
- Step 2: For each facility at which a PET scanner is operated, determine the total number of procedures performed on all fixed PET scanners located at each facility as reported for the 12-month period reflected in the Hospital License Renewal Application or Registration and Inventory of Equipment on file with the North Carolina Division of Health Service Regulation.
- Step 3: Multiply the number of fixed PET scanners at each facility by 3,000 procedures to determine the PET scanner capacity at each facility.
- Step 4: Divide the total number of PET scanner procedures performed at each facility, as determined in Step 2, by the capacity calculated in Step 3. Multiply the results by 100 to convert the numbers to a utilization percentage.
- Step 5: A need is determined for an additional fixed PET scanner if the utilization percentage is 80 percent or greater at a facility, except as provided in Step 8 for both parts of the methodology combined.

**Methodology Part 2:**

- Step 6: Identify each major cancer treatment facility, program or provider in the state, i.e., providers that operate two linear accelerators and performed over 12,500 ESTV procedures in the 12-month period reflected on the Hospital License Renewal Application or Equipment Registration and Inventory Form.
- Step 7: A need is determined for one additional fixed PET scanner if a major cancer treatment facility, program or provider identified in Step 6 is hospital-based and does not own or operate a fixed dedicated PET scanner, except as provided in Step 8 for both parts of the methodology combined.<sup>2</sup>

<sup>1</sup> The need generated by this part of the methodology may be met by any applicant, and not just the owner or operator of the scanner that has achieved the target utilization.

<sup>2</sup> The need generated by this part of the methodology may be met by any applicant, and not just a major cancer treatment facility, program, or provider that does not own or operate a fixed dedicated PET scanner.

Step 8: The maximum need determination for a single HSA in any one year will be no more than two additional fixed PET scanners regardless of the numbers generated individually by each part of the methodology.

# MAGNETIC RESONANCE IMAGING

## **Introduction**

Magnetic Resonance Imaging (MRI) technology is mobile and apparently is financially feasible at relatively small-volume mobile sites. Geographic accessibility is a significant planning issue, and it is important to assure that the rural areas of the state have the opportunity to access this important technology through both fixed and mobile scanners, as it has become the standard of care.

The methodology that is used allows the addition of a fixed MRI scanner at a fixed site within the same MRI service area.

## **The Technology**

Nuclei of atoms in various structures of the human body resonate differentially when exposed to a strong magnetic field. MRI devices register these differences in response as images for use in making diagnoses. Use of MRI technology has grown rapidly because it does not expose patients to ionizing radiation, and because of the quality of images it obtains. In 1983, there were only two MRI programs in North Carolina, performing a total of 531 procedures. In 2016-2017 fixed and mobile scanners were reported as providing 872,498 procedures.

An MRI procedure is defined as a single discrete MRI study of one patient (single CPT [current procedural terminology] coded procedure). An MRI study means one or more scans relative to a single diagnosis or symptom.

An MRI procedure is a single MRI procedure performed on one defined body part during one visit. Each MRI procedure must be directly linked to a single billable CPT code associated with an MRI procedure. For example, an MRI brain scan with and without contrast is a single procedure with a single CPT code.

For reporting verification, each reporting site will provide the number of scans performed annually for all CPT codes by volume on Hospital License Renewal Applications and Registration and Inventory of Medical Equipment Forms for Fixed (Non-Hospital) and Mobile MRI Providers.

Intraoperative Magnetic Resonance Imaging Scanners (iMRI) approved through Policy TE-2 shall not be counted in the inventory of fixed MRI scanners and the procedures performed on an iMRI will not be used in calculating the need methodology. Intraoperative procedures and inpatient procedures performed on an iMRI shall be reported separately by the certificate holder on the hospital license renewal application and will be reported in a separate table in Chapter 9 (Table 9Q(6)). An iMRI scanner shall not be used for outpatients and may not be replaced with a conventional MRI scanner.

## **Assessment**

### **Mobile MRI**

Because of the availability of mobile units, it appears that MRI technology is accessible within a reasonable distance and travel time to all of the population of North Carolina. Several mobile sites in operation all of 2016-2017 reported fewer than 100 procedures.

Mobile MRI scanner means an MRI scanner and transporting equipment that is moved at least weekly to provide services at two or more host facilities.

Some sites that initiated MRI service with mobile units have installed fixed scanners as volumes increased. Because of the need to house a unit in a specially constructed building or area of a building, the cost of each such new fixed facility may exceed \$2 million.

### **Fixed MRI Units**

Fixed MRI scanner means an MRI scanner that is not a mobile MRI scanner. The principal capital expenditure issue with respect to fixed MRI units is the volume of procedures, which warrants the acquisition of an additional magnet.

### **Definition of an MRI Service Area**

A fixed MRI service area is the same as an Acute Care Bed Service Area as defined in Chapter 5, Acute Care Beds, and shown in Figure 5.1. The fixed MRI service area is a single county, except where there is no licensed acute care hospital located within the county. Counties lacking a licensed acute care hospital are grouped with the single county where the largest proportion of patients received inpatient acute care services, as measured by acute inpatient days, unless two counties with licensed acute care hospitals each provided inpatient acute care services to at least 35 percent of the residents who received inpatient acute care services, as measured by acute inpatient days. In that case, the county lacking a licensed acute care hospital is grouped with both the counties which provided inpatient acute care services to at least 35 percent of the residents who received inpatient acute care services, as measured by acute inpatient days. The three most recent years of available acute care days patient origin data are combined and used to create the multicounty service areas. These data are updated and reviewed every three years, with the most recent update occurring in the North Carolina 2017 State Medical Facilities Plan.

### **Basic Assumptions of the Methodology**

1. Facilities that currently offer mobile MRI services, but have received the transmittal of a certificate of need for a fixed MRI scanner, are included in the inventory as a fixed MRI scanner in Table 9P.
2. A placeholder of one MRI scanner is placed in Table 9P for each new fixed MRI scanner for which a certificate of need has been issued even if the scanner is not operational. All procedures performed by a single licensed entity are counted as performed at a single site, even if MRI services are provided at more than one site.
3. The need determination for any one service area under the methodology for fixed MRI Scanner Utilization shall not exceed one MRI scanner per year, unless there is an adjusted need determination approved for a specific MRI service area.
4. A facility that offers MRI services on a full-time basis pursuant to a service agreement with an MRI provider is not precluded from applying for a need determination in the North Carolina 2019 State Medical Facilities Plan to replace the existing contracted service with a fixed MRI scanner under the applicant's ownership and control. It is consistent with the purposes of the Certificate of Need law and the State Medical Facilities Plan for a facility to acquire and operate an MRI scanner to replace such a contracted service, if the acquisition and operation of the facility's own MRI scanner will allow the facility to reduce the cost of providing the MRI service at that facility.

### **MRI Need Determination Methodology**

The methodology includes need thresholds arranged in tiers based on the number of scanners, weighting of procedures based on complexity, and a component addressing MRI service areas that have no fixed MRIs, but have mobile MRI scanners serving the area. The methodology for determining need is based on fixed and mobile procedures performed at hospitals and freestanding facilities with fixed MRI scanners and procedures performed on mobile MRI scanners at mobile sites in the MRI service areas. In addition, equivalent values for mobile scanners in MRI service areas are found in the column labeled Fixed Equivalent in Table 9P.

## MRI Tiered Planning Thresholds

Acute Care Bed Service Area Fixed Scanners	Inpatient and Contrast Adjusted Thresholds	Planning Threshold
4 and over	4,805 <sup>1</sup>	70.0%
3	4,462 <sup>2</sup>	65.0%
2	4,118 <sup>3</sup>	60.0%
1	3,775 <sup>4</sup>	55.0%
0	1,716 <sup>5</sup>	25.0%

The above tiering is based on the assumption that the time necessary to complete 1.0 MRI procedure (a basic outpatient procedure without contrast) is 30 minutes, or an average throughput of two procedures per hour on an MRI scanner. Capacity of a single MRI scanner is defined as that of an MRI scanner being available and staffed for use at least 66 hours per week, and 52 weeks per year. The resulting capacity of a fixed MRI scanner is defined below:

**Annual Maximum Capacity of a Single Fixed MRI Scanner =  
66 hours per week x 52 weeks x 2 procedures per hour = 6,864 procedures annually**

This definition of capacity represents 100 percent of the procedure volume the equipment is capable of completing, given perfect scheduling, no machine or room downtime, no cancellations, no patient transportation problems, no staffing or physician delays and no MRI procedures outside the norm. Procedure totals are from the “2018 Hospital License Renewal Application” or the “2018 Registration and Inventory of Medical Equipment Form” of MRI scanners as submitted to the North Carolina Division of Health Service Regulation concerning equipment registration and inventory, and number of procedures.

The table below indicates the weighting values assigned to the procedure type:

### Weighting System

Procedure Type	Base Weight	Inpatient Weight	Contrast Weight	Procedure Time Minutes
Outpatient/No Contrast/Sedation	1.0	0.0	0.0	30
Outpatient/With Contrast/Sedation	1.0	0.0	.4 (Add 12 minutes)	42
Inpatient/No Contrast/Sedation	1.0	.4 (Add 12 minutes)	0.0	42
Inpatient/With Contrast/Sedation	1.0	.4 (Add 12 minutes)	.4 (Add 12 minutes)	54

<sup>1</sup> 6,864 X 70% = 4,805

<sup>2</sup> 6,864 X 65% = 4,462

<sup>3</sup> 6,864 X 60% = 4,118

<sup>4</sup> 6,864 X 55% = 3,775

<sup>5</sup> 6,864 X 25% = 1,716

Procedures with contrast include those with sedation as reported in the annual Hospital Licensure Renewal Application and the annual MRI Registration and Inventory of Medical Equipment form.

The standard methodology used to determine need for fixed MRI scanners is calculated as follows:

Step 1: Determine the number of clinical fixed and mobile MRI scanners in each MRI service area by site to include: existing fixed or mobile MRI scanners in operation, approved fixed or mobile MRI scanners for which a certificate of need was issued but is pending development, and fixed MRI scanners for which no certificate of need has been issued because the decision regarding a need determination in a previous year is under review or appeal. The inventory shall exclude: MRI scanners used for research only, non-clinical MRI scanners, and MRI scanners awarded based on need determinations for a dedicated purpose or demonstration project.

Step 2: Convert the number of fixed and mobile MRI scanners to fixed equivalent magnets as follows:

- a. For each existing fixed MRI scanner, assign a value of one fixed equivalent magnet;
- b. For each approved fixed MRI scanner, assign a value of one fixed equivalent magnet, even though the site may be receiving mobile services temporarily until the fixed scanner is operational. [Note: The mobile services are not listed separately from the approved fixed MRI scanner if the mobile unit will no longer be used when the fixed MRI scanner is operational.]
- c. For each existing mobile MRI scanner site, calculate the fixed equivalent for each mobile site by dividing the number of MRI scans performed at each site by the threshold for the MRI service area, with the exception that the fixed equivalent shall be no greater than one; and
- d. For each approved mobile MRI scanner site, at which services have not started, calculate the days to be operated at the site as a fraction of the total days of service to be provided by the approved mobile MRI scanner. [For example, if a certificate of need has been awarded to a provider to serve six different sites in the state for one day per week at each site, the fixed equivalent for each approved site in the state is 0.17 ( $1/6=0.1666$ ). If the mobile is approved to serve two sites for three days per week at each site, the fixed equivalent for each site is 0.50 ( $3/6=0.50$ ).]

Step 3: Sum the number of fixed equivalent magnets for each MRI service area.

Step 4: Determine the total number of MRI scans performed at each site regardless of whether the MRI scanner is fixed or mobile, as reported in the “2018 Hospital License Renewal Applications” or “2018 Registration and Inventory of Medical Equipment Forms” of MRI scanners. If procedures are provided in a county that is part of more than one MRI service area, the procedures will be divided equally between the MRI service areas.

- Step 5: Of the total number of MRI scans performed, determine the number of MRI scans performed by type (i.e., inpatient, outpatient, with contrast or sedation, no contrast or sedation) as reported in the “2018 Hospital License Renewal Applications” or “2018 Registration and Inventory of Medical Equipment Forms” of MRI scanners.
- Step 6: For each site, multiply the number of inpatient MRI scans by 0.40 to calculate the inpatient adjustment.
- Step 7: For each site, multiply the number of contrast or sedation scans by 0.40 to calculate the contrast adjustment.
- Step 8: For each site, sum the total number of MRI scans performed (Step 4), the inpatient adjustment (Step 6), and the contrast adjustment (Step 7) to calculate the total number of adjusted MRI procedures for each site.
- Step 9: For each service area, sum the number of adjusted total MRI procedures for all sites in the MRI service area.
- Step 10: Calculate the average number of adjusted total MRI procedures per MRI scanner in the service area by dividing the adjusted total procedures for the service area (Step 9) by the sum of fixed equivalent magnets in the service area (Step 3).
- Step 11: Determine the utilization threshold for the service area based only on the number of existing, approved and pending fixed MRI scanners located in the service area as identified in Step 1:  
 4+ fixed MRI scanners – 4,805 threshold  
 3 fixed MRI scanners – 4,462 threshold  
 2 fixed MRI scanners – 4,118 threshold  
 1 fixed MRI scanner – 3,775 threshold  
 0 fixed MRI scanners – 1,716 threshold
- Step 12: Compare the area average procedures per fixed equivalent magnet (Step 10) with the threshold for the MRI service area (Step 11). If the area average procedure per magnet is greater than or equal to the service area threshold, a need is determined for one additional MRI scanner in the service area.

### Tables

The following tables are included in this section of the chapter: Table 9P: MRI Fixed and Mobile Procedures by MRI Service Area with Tiered Thresholds and Fixed Equivalents; Table 9Q (1): Inventory of MRI Scanners for Cardiovascular Clinical Research Use Pursuant to Policy AC-3 in the North Carolina 2001 State Medical Facilities Plan; Table 9Q (2): Inventory of Dedicated Breast MRI Scanners Pursuant to Adjusted Need Determination in the North Carolina 2002 and 2006 State Medical Facilities Plans; Table 9Q (3): Inventory of Dedicated Pediatric MRI Scanner Pursuant to Adjusted Need Determination in the North Carolina 2005 State Medical Facilities Plan; Table 9Q(4): Inventory of Demonstration Project for a Fixed Extremity MRI Scanner Pursuant to Adjusted Need Determination in the North Carolina 2006 State Medical Facilities Plan; Table 9Q (5): Inventory of MRI Scanners Dedicated for Radiation Oncology and Use in Operating Room Suite; and Table 9R: Fixed MRI Scanner Need Determination.

\*Due to a settlement agreement, a CON (F-001184-16) was issued for F-008237-08 making it a fixed MRI scanner at Novant Health Huntersville Medical Center.

**Table 9Q(1): Inventory of MRI Scanners for Cardiovascular Clinical Research Use Pursuant to Policy AC-3 in the North Carolina 2001 State Medical Facilities Plan**

Service Area	County	Provider	MRI Scanners
	Durham	Duke University Hospital	3
<p>A certificate of need (J-006511-01) was issued on April 30, 2002 to Duke University Hospital. The certificate of need states that Duke University Health Systems, Inc. shall, pursuant to Policy AC-3 in the 2001 SMFP, convert a research only MRI scanner to clinical research use and acquire a second MRI scanner for clinical research use by the Cardiovascular and Magnetic Resonance Center. These MRI scanners shall only be used for cardiovascular purposes and shall not be counted in the inventory of fixed MRI scanners.</p>			

**Table 9Q(2): Inventory of Dedicated Breast MRI Scanners Pursuant to Adjusted Need Determinations in the North Carolina 2002 and 2006 State Medical Facilities Plans**

Service Area	County	Provider	MRI Scanners
	Mecklenburg	Charlotte Radiology Breast Center	1
<p>A certificate of need (F-006725-02) was issued on September 24, 2003 to Charlotte Radiology, P.A. The certificate of need states that Charlotte Radiology, P.A., d/b/a Charlotte Radiology Breast Center, shall acquire a dedicated breast MRI scanner.</p>			
	Forsyth	Breast Clinic MRI, LLC	1
<p>A certificate of need (G-007601-06) was issued on November 27, 2006 to Breast MRI Clinic, LLC. The certificate of need states that the center shall acquire a dedicated breast MRI scanner.</p> <p>These MRI scanners shall be used exclusively in mammographic studies and shall not be counted in the inventory of fixed MRI scanners. These MRI scanners shall not be used for general diagnostic purposes, and the projected costs for procedures to patients and payors shall be lower than the costs associated with conventional MRI procedures.</p>			

**Table 9Q(3): Inventory of Dedicated Pediatric MRI Scanner Pursuant to Adjusted Need Determination in the North Carolina 2005 State Medical Facilities Plan**

Service Area	County	Provider	MRI Scanners
	Mecklenburg	Carolinas Medical Center	1
<p>A certificate of need (F-007219-05) was issued on August 23, 2005 to Carolinas Medical Center to locate a dedicated pediatric MRI scanner in Levine Children's Hospital. This MRI scanner shall be used exclusively in pediatric studies and shall not be counted in the inventory of fixed MRI scanners. This MRI scanner shall not be used for adult patients, and the projected costs for procedures to patients and payors shall be lower than the costs associated with conventional MRI procedures.</p>			

**Table 9Q(4): Inventory of Demonstration Project for a Fixed Extremity MRI Scanner Pursuant to Adjusted Need Determination in the North Carolina 2006 State Medical Facilities Plan**

Service Area	County	Provider	MRI Scanners
	Wake	Bone & Joint Surgery Clinic, LLP	1
<p>A certificate of need (J-007605-06) was issued on March 28, 2007 to The Bone and Joint Surgery Clinic, LLP to locate a demonstration project for a fixed extremity MRI scanner. The fixed extremity MRI scanner shall not be counted in the regular inventory of MRI scanners and shall not be used for whole body procedures. In addition, the demonstration project shall be conducted as an organized research study to determine the convenience, cost effectiveness and improved access provided by a fixed extremity MRI scanner. The project shall include a comparative analysis of “total dollars received per procedure” performed on extremity MRI scanners and “total dollars received per procedure” for similar procedures performed on fixed whole body MRI scanners. The purpose of this aspect of the study is to demonstrate any cost savings to the patient or third party payer of the extremity MRI scanner. A mechanism to ensure cost savings must be included in the demonstration project. The recipient of the certificate of need must provide annual reports demonstrating cost savings for a three-year reporting period from the date of installation.</p>			

**Table 9Q(5): Inventory of MRI Scanners Dedicated For Radiation Oncology and Use in Operating Room Suite**

Service Area	County	Provider	MRI Scanners
	Durham	Duke University Hospital	one MRI scanner in operating room suite
	Durham	Duke University Hospital	one MRI scanner dedicated for radiation oncology
	Forsyth	North Carolina Baptist Hospital	one MRI scanner dedicated for radiation oncology
<p>A certificate of need (J-006295-00) was issued to Duke University Hospital for one MRI scanner and another certificate of need (G-006816-03) was issued to North Carolina Baptist Hospital for one MRI, both to be used exclusively for radiation oncology and not be counted in the inventory of fixed MRI scanners. These MRI scanners shall not be used for conventional MRI procedures. In addition, a certificate of need (J-8030-07) was also issued to Duke University Hospital for one MRI to be used in an operating room suite and shall not be used for clinical diagnostic purposes.</p>			

Note: The two fixed multi-position MRI scanners that were previously dedicated for demonstration projects in Table 9Q(6) of the 2017 SMFP (projects J-008107-08 and F-008106-08), are now included in both the need determination calculation and Table 9P.

**Table 9R: Fixed MRI Scanner Need Determination**

<b>Services Areas</b>	<b>Fixed MRI Scanners Need Determination*</b>	<b>Certificate of Need Application Due Date**</b>	<b>Certificate of Need Beginning Review Date</b>
Forsyth	1	October 15, 2019	November 1, 2019
Mecklenburg	1	August 15, 2019	September 1, 2019
Wake	1	November 15, 2019	December 1, 2019
It is determined that there is no need anywhere else in the state and no other reviews are scheduled. ***/****			

\* Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).

\*\* Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date. (see Chapter 3).

\*\*\* The need determination in the Davie County service area for one fixed MRI scanner was removed in response to a petition approved by the State Health Coordinating Council.

\*\*\*\*The need determination in the Pasquotank/Camden/Currituck/Perquimans County service area for one fixed MRI scanner was removed in response to a petition approved by the State Health Coordinating Council.

## **CARDIAC CATHETERIZATION EQUIPMENT**

### **Definitions**

“Cardiac catheterization equipment,” as defined in G.S. §131E-176(2f), “means the equipment used to provide cardiac catheterization services.”

“Cardiac catheterization services,” as defined in G.S. §131E-176(2g), “means those procedures, excluding pulmonary angiography procedures, in which a catheter is introduced into a vein or artery and threaded through the circulatory system into the heart specifically to diagnose abnormalities in the motion, contraction, and blood flow of the moving heart or to perform surgical therapeutic interventions to restore, repair, or reconstruct the coronary blood vessels of the heart.”

A cardiac catheterization (fixed or shared) equipment's service area is the cardiac catheterization equipment planning area in which the equipment is located. The cardiac catheterization equipment planning areas are the same as the Acute Care Bed Service Areas defined in Chapter 5, Acute Care Beds, and shown in Figure 5.1. The cardiac catheterization equipment service area is a single county, except where there is no licensed acute care hospital located within the county. Counties lacking a licensed acute care hospital are grouped with the single county where the largest proportion of patients received inpatient acute care services, as measured by acute inpatient days, unless two counties with licensed acute care hospitals each provided inpatient acute care services to at least 35 percent of the residents who received inpatient acute care services, as measured by acute inpatient days. In that case, the county lacking a licensed acute care hospital is grouped with both the counties which provided inpatient acute care services to at least 35 percent of the residents who received inpatient acute care services, as measured by acute inpatient days. The three most recent years of available acute care days patient origin data are combined and used to create the multicounty service areas. These data are updated and reviewed every three years, with the most recent update occurring in the North Carolina 2017 State Medical Facilities Plan.

### **Facility Inventory-Service Volume**

There were 51 hospitals with fixed cardiac catheterization programs in North Carolina during fiscal year 2016-2017. The reported number of adult cardiac catheterization procedures for the years ending 9/30/2010 through 9/30/2017 is presented in Table 9S. Table 9T exhibits the reported number of pediatric cardiac catheterization procedures for the years ending 9/30/2010 through 9/30/2016. During 2017, there were two mobile cardiac catheterization vendors providing mobile cardiac catheterization services to patients at four hospitals across the state. The reported numbers of mobile cardiac catheterization procedures for the years ending 9/30/2010 through 9/30/2017 are shown in Table 9U. Mobile cardiac catheterization capacity and volume for reported procedures for the year ending 9/30/2017 is displayed in Table 9V. Table 9W presents information about percutaneous coronary interventional procedures for the years ending 9/30/2010 through 9/30/2017. Table 9X displays fixed cardiac catheterization equipment capacity and volume based on a capacity of 1,500 procedures.

### **Cardiac Catheterization Need Determination Methodology**

The North Carolina State Health Coordinating Council defines capacity of an item of cardiac catheterization equipment as 1,500 diagnostic-equivalent procedures per year, with the trigger of need at 80 percent of capacity. One therapeutic cardiac catheterization procedure is valued at 1.75 diagnostic-equivalent procedures. One cardiac catheterization procedure performed on a patient age 14 or younger is valued at two diagnostic-equivalent procedures. All other procedures are valued at one diagnostic-equivalent procedure. It is further determined that fixed and mobile cardiac catheterization equipment and services shall only be approved for development on hospital sites.

The standard methodologies used to determine need for additional fixed cardiac catheterization equipment are calculated as follows:

**Methodology 1:**

- Step 1: Determine the planning inventory for each facility that has fixed cardiac catheterization equipment, immediately prior to publication of the annual State Medical Facilities Plan, to include: existing equipment in operation, approved equipment for which a certificate of need was issued but is pending development, and pending equipment for which no certificate of need has been issued, because the decision on a need determination in a previous year is under review or appeal. For each cardiac catheterization equipment service area, calculate the total number of existing, approved and pending units of cardiac catheterization equipment located in the cardiac catheterization equipment service area.
- Step 2: Determine the number of adult and pediatric diagnostic and interventional procedures performed at each facility as reported for the 12-month period reflected in the “2018 Hospital License Renewal Application” or the “2018 Registration and Inventory of Medical Equipment Form” for Cardiac Catheterization equipment. If procedures are provided in a county that is part of more than one cardiac catheterization equipment service area, the procedures will be divided equally between the service areas.
- Step 3: For each facility, calculate the total weighted (diagnostic-equivalent) cardiac catheterization procedures by multiplying adult diagnostic procedures by 1.0, interventional cardiac catheterization procedures by 1.75, and pediatric procedures performed on patients age 14 or younger by 2.00.
- Step 4: For each facility, determine the number of units of fixed cardiac catheterization equipment required for the number of procedures performed by dividing the number of weighted (diagnostic-equivalent) cardiac catheterization procedures performed at each facility by 1,200 procedures (i.e., 80 percent of capacity, which is 1,500 procedures). (NOTE: Round the result to the nearest hundredth.)
- Step 5: Sum the number of units of fixed cardiac catheterization equipment required for all facilities in the same cardiac catheterization equipment service area as calculated in Step 4. (NOTE: The sum is rounded to the nearest whole number.)
- Step 6: Subtract the number of units of fixed cardiac catheterization equipment required in each cardiac catheterization equipment service area from the total planning inventory for each cardiac catheterization equipment service area. The difference is the number of units of fixed cardiac catheterization equipment needed.

**Methodology 2:**

For cardiac catheterization equipment service an area in which a unit of fixed cardiac catheterization equipment is not located, need exists for one shared fixed cardiac catheterization equipment (i.e., fixed equipment that is used to perform both cardiac catheterization procedures and angiography procedures) when:

- a. The number of cardiac catheterization procedures as defined in 10A NCAC 14C .1601(5) performed at any mobile site in the cardiac catheterization equipment service area exceeds 240 (300 procedures x 80 percent) procedures per year for each eight

hours per week the mobile equipment is operated at that site during the 12-month period reflected in the “2018 Hospital License Renewal Application” or the “2018 Registration and Inventory of Medical Equipment Form” for Cardiac Catheterization equipment on file with the North Carolina Division of Health Service Regulation; and

- b. No other fixed or mobile cardiac catheterization service is provided within the same cardiac catheterization equipment service area.

# Chapter 10:

## Nursing Care Facilities

---

## CHAPTER 10

# NURSING CARE FACILITIES

---

### Summary of Bed Supply and Utilization

In the fall of 2018, the nursing care bed inventory included 45,189 licensed beds in nursing homes and 1,021 licensed beds in hospitals for a total of 46,210 licensed nursing care beds. An additional 427 nursing care beds had received approval from Certificate of Need (CON), but were not yet licensed. In addition, 1,243 nursing care beds from currently licensed facilities will be transferred to CON-approved projects once completed. The “total inventory” of nursing care beds (*licensed + CON-approved – CON bed transfers*) was 46,600.

Exclusions from the inventory and occupancy rate have been retained for specialty care units (*beds in units designated exclusively for people with head injuries or ventilator dependency*), state operated facilities, for out-of-area placements in non-profit religious or fraternal facilities, for 100% of the qualified nursing care beds in continuing care retirement communities (*Policy NH-2 beds*), and for beds transferred from State Psychiatric Hospitals (*Policy NH-5 beds*). For the North Carolina 2019 State Medical Facilities Plan, the excluded beds total 3,051, resulting in an adjusted “planning inventory” of 43,549 nursing care beds.

### Changes from the Previous Plan

There have been no substantial changes in the application of the nursing care need methodology from that used in the 2018 State Medical Facilities Plan.

### Basic Assumptions of the Method

1. Need should be projected three years beyond the plan year because that is the least amount of time required to bring a needed facility or expansion into service.
2. Any advantages to patients that may arise from competition will be fostered by policies which lead to the establishment of new provider institutions. Consequently, whenever feasible, allocations of 90 additional beds or more should be made. It is recognized, however, that such allocations do not always result in new entities.
3. Counties whose deficits represent a high proportion (10 percent or greater) of their total needs (deficit index) and who have an occupancy of licensed beds in the county, excluding continuing care retirement communities, that is 90 percent or greater based on utilization data reported on 2018 License Renewal Applications, should receive need determinations even though such increments may be of insufficient size to encourage establishment of new facilities.
4. To the extent that out-of-area patients are served by facilities operated by religious or fraternal organizations, beds so occupied will be excluded from a county’s inventory and the associated days of care will be removed from the occupancy rate calculation.
5. When nursing care beds have been converted to care for head injury or ventilator-dependent patients, the beds will be removed from the inventory and the associated days of care will be removed from the occupancy rate calculation.
6. One hundred percent of the nursing care beds developed pursuant to Policy NH-2 will be excluded from the inventory and the associated days of care will be removed from the occupancy rate calculation.

7. Nursing care beds transferred from state psychiatric hospitals to the community pursuant to Policy NH-5 shall be excluded from the inventory and the associated days of care will be removed from the occupancy rate calculation.
8. A goal of the planning process is a reasonable level of parity among citizens in their geographic access to nursing home facilities.
9. A county rate provides a more accurate utilization measure in determining needs. Bed rates are calculated per 1,000 population per county. Each county bed rate is calculated using a five year average annual change projected forward 36 months. For any county with an average annual change rate that is one-half of a standard deviation above or below the average change rate of all counties, the state change rate is substituted in the bed rate calculation.
10. Occupancy rates can be calculated using different techniques. The methodology chooses to use the higher of two different occupancy rate calculations such that the need determination in each county is calculated with the greatest advantage. The adjusted occupancy rate for each county is calculated using the higher of the median of all facilities' occupancy rates in a county or a countywide occupancy, whichever is higher. The equivalent days of care for the initial occupancy will be removed from calculations for beds that have been excluded from the inventory.

#### **Sources of Data**

##### **Population Data:**

Projected numbers of residents, by county and age group, for 2022 were obtained from the North Carolina Office of State Budget and Management.

Estimated active duty military population numbers were excluded from the county's population for any county with more than 500 active duty military personnel. These estimates were obtained from the category of "Employment Status – Armed Forces" in the "Selected Economic Characteristics" portion of the American Community Survey 2016 5-year Estimates.

### **Utilization Data**

Data on utilization of nursing facilities were compiled from the “2018 License Renewal Application to Operate a Nursing Home,” combined with data from the “Nursing Care Facility/Unit Beds: 2018 Annual Data Supplement to Hospital License Applications,” as submitted to the North Carolina Department of Health and Human Services, Division of Health Service Regulation.

### **Application of the Method**

The steps in applying the projection method are as follows:

- Step 1: Multiply the county bed use rates (*see “Assumptions”*) by each county’s corresponding projected civilian population (*in thousands*) for the target year (2022) to calculate the projected bed utilization.
- Step 2: For each county, divide the projected bed utilization by a 95% vacancy factor.
- Step 3: For each county, the planning inventory is determined based on licensed beds adjusted for: CON-Approved/License Pending beds, beds available in prior Plans that have not been CON-approved, and exclusions from the county’s inventory, if any. For each county, the projected bed utilization with applied vacancy factor derived in Step 2 is subtracted from the planning inventory. The result is the county’s surplus or deficit.
- Step 4:
- a. For a county with a deficit of 71 to 90 beds, if the adjusted occupancy of licensed beds in the county is 90 percent or greater based on utilization data reported on 2018 renewal applications, the need determination is 90 beds.
  - b. For a county with a deficit of 91 or more beds, if the adjusted occupancy of licensed beds in the county is 90 percent or greater based on utilization data reported on 2018 renewal applications, the need determination is the amount of the deficit rounded to 10\*. The maximum need determination for each county is 150 beds.
  - c. If any other county’s deficit is 10 percent or more of its projected utilization, and the adjusted occupancy of licensed beds in the county is 90 percent or greater based on utilization data reported on 2018 renewal applications, the need determination is the amount of the deficit rounded to 10\*. The maximum need determination for each county is 150 beds.

\* For purposes of rounding need determinations, numbers greater than 10 and ending in one to four would round to the next lower number divisible by 10, and numbers ending in five to nine would round to the next higher number divisible by 10.

A nursing care bed’s service area is the area in which the bed is located. Each of the 100 counties in the state is a separate nursing care bed planning area.

<b>Grand Totals</b>		45,189	1,021	46,210	427	0	-37	0	46,600	3,051	43,549

**Note: Methodology Inventory Identifiers**

\* State or federal facility

\*\* Facilities whose beds are licensed, but whose occupancy is reported as 0 due to renovation, replacement, and/or a decision not to delicense beds. These beds are counted in the planning inventory.

**Note: Methodology Planning Inventory Exclusion Reminders**

\* State and federal facilities excluded from planning inventory

-- Head injury beds, ventilator beds, bed transfers from state psychiatric hospitals, and a percentage of out-of-area placements in non-profit religious/fraternal facilities are excluded from the planning inventory.

- Continuing Care Retirement Communities (CCRCs) developed under policy NH-2 have 100% of their nursing home beds excluded from the planning inventory and occupancy calculation.

**Note: Methodology Occupancy Reminders**

\* State and federal facilities are not counted in occupancy calculations.

\*\* Facilities whose beds are licensed, but whose occupancy is reported as 0 due to renovation, replacement and/or a decision not to decertify beds, are counted in occupancy calculations.

\*\*\* Pursuant to policy AC-4, a total of 37 beds from two WakeMed nursing care facilities were approved for re-conversion to acute care beds at WakeMed Raleigh - 24 beds from WakeMed Cary Hospital's Fuquay-Varina Outpatient and Skilled Nursing Facility and 13 beds from WakeMed Zebulon/Wendell Outpatient and Skilled Nursing Facility. In addition, PruittHealth-Raleigh (formerly UniHealth Post-Acute Care) received approval to relocate 18 beds to its facility from these two WakeMed nursing care facilities - 12 beds from WakeMed Cary/Fuquay-Varina and 6 beds from WakeMed Zebulon/Wendell. After these re-conversions and transfers are complete, no beds will remain at WakeMed Cary/Fuquay-Varina (36) and WakeMed Zebulon/Wendell (19) nursing care facilities.

\*\*\*\* 51 of 60 beds have been transferred. 31 were transferred to Universal Healthcare/Fuquay-Varina and 20 beds were transferred to Universal Healthcare/North Raleigh.

\* Projected Bed Utilization with Vacancy Factor is calculated by dividing Projected Bed Utilization by 95%.

\*\* NH-2 beds are 100% excluded.

\*\*\* Calculated using higher of the median or weighted mean.

**Table 10D: Nursing Care Bed Need Determination**

<b>County</b>	<b>HSA</b>	<b>Nursing Care Bed Need Determination*</b>	<b>Certificate of Need Application Due Date**</b>	<b>Certificate of Need Beginning Review Date</b>
Davidson***	II	15	February 15, 2019	March 1, 2019
It is determined that there is no need anywhere else in the state and no other reviews are scheduled.				

- \* Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).
- \*\* Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the Application due date (see Chapter 3).
- \*\*\* The need determination in the Davidson County service area for 15 nursing home beds is in response to a petition that was approved by the State Health Coordinating Council.

# Chapter 11:

## Adult Care Homes

---

## CHAPTER 11

### ADULT CARE HOMES

---

#### **Summary of Bed Supply and Utilization**

An Adult Care Home is defined as a facility with seven or more beds licensed under G.S. 131D-2 or Chapter 131E of the General Statutes. These statutory citations refer to licensure of adult care homes, nursing homes and hospitals.

Prior to enactment of legislation (Senate Bill 937) in 2001 to regulate the development of Adult Care Homes under the Certificate of Need law, legislation ratified in 1997 (S. L. 1997-443) placed a statewide moratorium on the development of new adult care home beds. However, the 1997 legislation allowed for the development of additional adult care home beds under defined circumstances. Some of these beds remain eligible to be developed pursuant to settlements of contested cases. These “settlement” beds are also subject to conditions set out in the terms of the controlling settlement agreements. The planning inventory of adult care home beds included in the North Carolina 2019 State Medical Facilities Plan is subject to change based on whether conditions have been met to allow for development of the settlement beds. Changes in inventory may also be made as a result of litigation.

In the fall of 2018, the adult care home inventory included 41,367 licensed beds in adult care homes and nursing homes. An additional 790 beds had not yet been licensed. These 790 “CON Approved/License Pending” beds had either been exempted from the moratorium on the development of additional adult care home beds; had been determined to be in the pipeline for development prior to the moratorium; had been set out in the terms of settlement agreements; or had received approval from Certificate of Need (CON) but were not yet licensed. In addition, 1,853 adult care home beds from currently licensed facilities will be transferred to CON-approved projects once completed. The “total inventory” of adult care home beds (*licensed + license pending + previously allocated*) was 42,153.

#### **Changes from the Previous Plan**

The adult care home bed need methodology has been revised effective in the 2019 State Medical Facilities Plan. Compared to that used in the North Carolina 2018 State Medical Facilities Plan, the new methodology has the following changes:

- one use rate (no age groups) calculated by service area with an annual change rate projection of 36 months;
- vacancy factor of 95 percent applied to projected bed utilization for an adjusted projected bed utilization;
- for need determinations, use of the highest among the average or median occupancy rates based on either the one-day census or the annual days of care for all facilities in a service area;
- use of an occupancy rate of 80 percent as the threshold for determining bed need;
- alignment of all exclusions for bed inventory and occupancy;
- one hundred percent exclusion for Continuing Care Retirement Community beds (Policy LTC-1); and
- Hyde and Tyrrell Counties are no longer considered a combined service area.

References to dates in the methodology and in the policies have been advanced by one year, as appropriate.

### **Basic Assumptions of the Method**

1. Need should be projected three years beyond the Plan Year because at least that amount of time is required to bring a needed facility or expansion into service.
2. One hundred percent of the beds developed as part of a qualified continuing care retirement community, including those that were developed prior to the enactment of Policy LTC-1, are excluded from the inventory, and the associated days of care will be removed from the occupancy rate calculation.
3. A goal of the planning process is a reasonable level of parity among citizens in their geographic access to adult care home facilities.
4. A service area rate provides a more accurate utilization measure in determining needs. Bed rates are calculated per 1,000 population per service area. Each service area bed rate is calculated using a five-year average annual change rate projected forward 36 months. Any service area with an average annual change rate that exceeds the average plus one-half of a standard deviation of all service area rates will receive a rate equal to the average plus one half of a standard deviation of all service area rates.
5. Occupancy rates can be calculated using different techniques. The adult care methodology chooses to use the highest of four occupancy rate calculations such that the need determination in each service area is calculated using the highest of the average or the median of all facilities' occupancy rates based on a one-day census in a service area, or the average or median of all the facilities' occupancy rates based on annual days of care in a service area.

### **Sources of Data**

#### **Population Data:**

Projected numbers of residents, by service area and age group, for 2022 were obtained from the North Carolina Office of State Budget and Management.

Estimated active duty military population numbers for individuals under the age of 35 were excluded for any service area with more than 500 active duty military personnel. These estimates were obtained from the category of "Employment Status- Armed Forces" in the "Selected Economic Characteristics" portion of the American Community Survey 2016 5-year Estimates.

#### **Utilization Data:**

Data on utilization were compiled from the 2014 through 2018 "License Renewal Applications to Operate a Nursing Home," combined with data from the 2014 through 2018 "Nursing Care Facility/Unit Beds Annual Data Supplement to Hospital License Applications," combined with data from the 2014 through 2018 "License Renewal Applications for Adult Care Homes" as submitted to the North Carolina Department of Health and Human Services, Division of Health Service Regulation.

### **Application of the Method**

The steps in applying the projection method are as follows:

- Step 1: Multiply the service area use rates (*see under "Assumptions"*) by each service area's corresponding projected civilian population (*in thousands*) for the target year (2022) to calculate the projected bed utilization.

- Step 2: For each service area, divide the projected bed utilization by a 95% vacancy factor.
- Step 3: For each service area, the planning inventory is determined based on licensed beds adjusted for: license pending beds; beds available in prior Plans that have not been CON approved; and exclusions from the service area's inventory, if any.
- Step 4: For each service area, the projected bed utilization derived in Step 2 is subtracted from the planning inventory derived in Step 3. The result is the service area's surplus or deficit.
- Step 5: Determine each service area's bed occupancy rate by calculating occupancy according to the following four methods and by selecting the highest of the four rates:
1. compute the average occupancy rate using the one-day census for all facilities in the service area,
  2. compute the median occupancy rate using the one-day census for all facilities in the service area,
  3. compute the average occupancy rate using the annual days of care for all facilities in the service area, and
  4. compute the median occupancy rate using the annual days of care for all facilities in the service area.
- Step 6: If any service area's deficit is from 10 percent up to but not including 50 percent of its total projected bed need and the average occupancy of licensed beds in the service area, excluding continuing care retirement communities, is 80 percent or greater based on utilization data reported on 2018 License Renewal Applications, the need determination is the amount of the deficit rounded to the nearest 10. If any service area's deficit is 50 percent or more of its total projected bed need, the need determination is the amount of the deficit rounded to the nearest 10. For purposes of rounding need determinations, numbers greater than 10 and ending in one to four would round to the next lower number divisible by 10, and numbers ending in five to nine would round to the next higher number divisible by 10.

An adult care home bed's service area is the county in which the adult care home bed is located.

\* The 2017 patient data point for Hyde County is hypothetical and based on the proportion of the Hyde/Tyrrell service area 2017 population that was located in Hyde County (57.7%) of the total number of ACH patients served by Tyrrell House according to the 2017 facility census data (42). Therefore, the methodology assumes that 57.7% of the 42 patients in Tyrrell House were from Hyde County.

\*\* The 2017 patient data point for Tyrrell County is hypothetical and based on the proportion of the Hyde/Tyrrell service area 2017 population that was located in Tyrrell County (42.3%) of the total number of ACH patients served by Tyrrell House according to the 2017 facility census data (42). Therefore, the methodology assumes that 42.3% of the 42 patients in Tyrrell House were from Tyrrell County.

# Chapter 12:

Home Health Services

---

## CHAPTER 12

### HOME HEALTH SERVICES

---

#### Summary of Medicare-certified Home Health Agency Supply and Utilization

In the fall of 2018, the North Carolina Division of Health Service Regulation reported 208 Medicare-certified home health agencies in North Carolina.

Data from the “Home Health Agency 2018 Annual Data Supplements” indicated a total of 227,778 home health patients were served during 2017 (*FY 2016-2017*). This represents a 1.21 percent decrease in the reported number of patients from 2016. Compared to 2016 data, the average “State Use Rates per 1,000 Population” decreased in all categories.

Age Group	2016 Use Rate	2017 Use Rate
Under Age 18	1.48	1.18
Ages 18 – 64	10.83	9.90
Ages 65 – 74	61.62	60.01
Ages 75 & Over	163.32	161.62

#### Changes from the Previous Plan

No substantive changes have been made in the home health policy, assumptions or methodology. For the North Carolina 2019 State Medical Facilities Plan, references to dates have been advanced one year.

#### Basic Assumptions of the Method

Assumptions underlying the projection of need for new Medicare-certified home health agencies or offices are as follows:

1. The target for projections should be one year beyond the Plan year to allow time for completion of the certificate of need review cycles and for staffing of new agencies or offices.
2. Data aggregation and projections should be accomplished by four age groups (*Under Age 18, Ages 18-64, Ages 65-74, and Ages 75 and Over*) to allow more definitive examination of trends in services to children and to senior adults.
3. Current age-specific use rates are the most valid basis for projection of future “need.”
4. Because previous year’s data are used as the basis for projections, the average annual rate of change in “number of patients served” should be calculated over the previous three years for each age group in each Council of Governments (COG) region and applied to current reported total number of patients served from each county within each COG region, to project changes in the capacity of existing agencies to serve people from each county by the target year.
5. Likewise, the average annual rate of change in “use rates per 1,000 population” should be calculated over the previous three years for each age group in each COG region and applied to current “use rates per 1,000 population” for each county within each COG region to

project changes in the number of potential people needing home health services by the target year.

6. A new agency or office is needed if the projected unmet need in a single county is 325 patients or more.
7. When the need for additional agencies or offices is determined by the standard methodology or policy in the State Medical Facilities Plan, the three annual Plans following certification of the agencies or offices based on that need (*during the time when the new agencies or offices are being established and are developing their services*) should count the greater of 325 patients for each new agency office or the actual number of patients served by the new agency office as part of the total people served.
8. The North Carolina State Health Coordinating Council encourages home health applicants to:
  - a. provide an expanded scope of services (*including nursing, physical therapy, speech therapy, and home health aide service*);
  - b. provide the widest range of treatments within a given service;
  - c. have the ability to offer services on a seven days per week basis as required to meet patient needs; and
  - d. address special needs populations.

#### **Sources of Data**

##### **Population:**

County population projections by age group for 2020 were obtained from the North Carolina Office of State Budget and Management.

Estimated active duty military population numbers were excluded from the 18-64 age group for any county with more than 500 active duty military personnel. These estimates were obtained from the category of "Employment Status-Armed Forces" in the "Selected Economic Characteristics" portion of the American Community Survey 2016 5-year Estimates.

##### **Utilization:**

Patient origin data were compiled from "Home Health Agency 2018 Annual Data Supplement(s) to License Application" as submitted by Medicare-certified home health agencies to the North Carolina Department of Health and Human Services, Division of Health Service Regulation.

### **Application of the Standard Methodology**

Steps in applying the projection method are as follows:

- Step 1: For each COG region, for each age group, calculate the “Average Annual Rate of Change in Number of Home Health Patients” over the previous three years.
- Step 2: For each COG region, for each age group, calculate the “Average Annual Rate of Change in Use Rates per 1,000 Population” over the previous three years.
- Step 3: For each county, for each age group, total the number of home health patients served in 2017 as reported from agencies’ “Home Health Agency 2018 Annual Data Supplement(s) to License Application.”
- Step 4: For each county, multiply the “Average Annual Rate of Change in Number of Home Health Patients” for each age group from the affiliated COG region times, the number of patients for each age group from Step 3.
- Step 5: Multiply the product from Step 4 by three (*to advance by three years*) and add that product to the base figure from Step 3 for each age group. The result is the anticipated number of patients who might be served by existing agencies in 2020 for each age group.
- Step 6: For each county, for each age group, divide the number of patients served in 2017 by the county’s population (*in 1,000’s for each age group*). This produces use rates per 1,000 population for the county.
- Step 7: Multiply the “Average Annual Rate of Change in Use Rate per 1,000 Population” for each age group from the affiliated COG region times the county use rates per 1,000 population for each age group from Step 6.
- Step 8: Multiply the product from Step 7 by three (*to advance by three years*) and add that product to the base figure from Step 6 for each age group. The result is the anticipated use rate per 1,000 population in 2020 for each age group.
- Step 9: For each age group, multiply the anticipated use rate per 1,000 population for 2020 times the projected 2020 population. The result is the potential number of home health patients in 2020.
- Step 10: In counties for which additional home health agency office need determinations were made by the standard methodology or policy (*see the seventh “Basic Assumption”*), determine the difference between 325 and the number of patients actually served by each new agency in the county for which a need determination was made. If a new agency office served more than 325 clients, the agency’s reported number of patients is not adjusted. If a new agency office served fewer than 325 clients, an adjustment “placeholder” equal to the difference between the reported number of home health patients and 325 is used.

- Step 11: For each county, sum the anticipated number of patients who may be served in 2020 (*from Step 5*) across all four age groups and the adjustment placeholder (*from Step 10*), if applicable. The result is an “Adjusted Potential Total People Served” for each county for 2020.
- Step 12: For each county, sum the potential number of home health patients in 2020 (*from Step 9*) across all four age groups. The result is the “Projected Utilization in 2020.”
- Step 13: For each county, subtract the “Projected Utilization in 2020” from the “Adjusted Potential Total People Served.” The remainder is the projected additional number of home health patients who will need home health services in 2020 (unmet need shows as a negative number of patients, *i.e.*, a “patient deficit”). A remainder including fractions of 0.50 or greater is rounded to the next highest whole number and a remainder including fractions less than 0.50 is rounded to the next lowest whole number.
- Step 14: For each county, need for one new Medicare-certified agency office is determined for each projected deficit of 325 patients.

A Medicare-certified home health agency office’s service area is the Medicare-certified home health agency office planning area in which the office is located. Each of the 100 counties in the state is a separate Medicare-certified home health agency office planning area.

The Long-Term and Behavioral Health Committee and the State Health Coordinating Council will consider petitions for adjusted need determinations that are filed in accordance with provisions outlined in Chapter 2 of the State Medical Facilities Plan. Applicants for certificates of need are encouraged to contact Certificate of Need to arrange pre-application conferences prior to submission of applications.

\* Adjustments for active duty military personnel have been applied to the Ages 18-64 population. A projected deficit of 325 patients is the threshold for a new home health agency.

**Table 12E: Medicare-certified Home Health Agency or Office  
Need Determination**

<b>County</b>	<b>HSA</b>	<b>Home Health Agency/Office Need Determination*</b>	<b>Certificate of Need Application Due Date**</b>	<b>Certificate of Need Beginning Review Date</b>
It is determined that there is no need anywhere in the state and no reviews are scheduled.				

\* Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).

\*\* Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date (see Chapter 3).

# Chapter 13:

## Hospice Services

---

## CHAPTER 13

# HOSPICE SERVICES

---

### **Summary of Hospice Services and Supply**

In the fall of 2018, there were 238 hospice facilities (including hospice home care facilities, hospice inpatient and residential facilities) listed as being separately licensed in North Carolina according to the North Carolina Division of Health Service Regulation.

According to the hospice licensure law, as passed by the N.C. General Assembly in 1984, a hospice must provide home care services to terminally ill patients with a life expectancy generally not to exceed six months and their families, with provision for inpatient care or hospice residential care, as long as hospice inpatient is provided directly or through a contractual agreement. Data reported on the 2018 licensure renewal applications indicate that 46,763 hospice patients were served in 2016-2017.

There are 45 hospice inpatient facilities (comprising 481 licensed beds) in North Carolina, providing acute symptom control and pain management for hospice patients. Of the 45 facilities, 42 are free-standing hospice inpatient units in Alamance, Brunswick, Buncombe, Burke, Cabarrus, Caldwell, Carteret, Catawba, Chatham, Cleveland, Columbus, Davidson, Durham, Forsyth, Gaston, Guilford, Haywood, Henderson, Iredell, Johnston, Mecklenburg, Moore, New Hanover, Orange, Pitt, Randolph, Richmond, Rockingham, Rowan, Rutherford, Scotland, Surry, Union, Wake, Wayne and Yadkin counties. There are three hospitals that have hospice inpatient units as part of the hospital; two are in Mecklenburg County and the other is in Robeson County. Hospice inpatient facilities in Lincoln, Macon and Wake counties will be adding a total of 18 beds after licensing.

There are 27 hospice residential facilities (comprising 165 licensed beds) currently providing residential hospice care for patients who have frail and elderly caregivers or who live alone. These facilities are in Alamance, Buncombe, Burke, Cabarrus, Caldwell, Carteret, Catawba, Chatham, Cleveland, Davidson, Forsyth, Gaston, Guilford, Johnston, Randolph, Rockingham, Rowan, Rutherford, Scotland, Surry, Union, Wake, Wayne and Yadkin counties.

### **Changes from the Previous Plan**

For the North Carolina 2019 State Medical Facilities Plan, references to dates have been advanced one year.

### **Basic Assumptions of the Method**

#### **Hospice Home Care Offices:**

1. County mortality (death) rates for the most recent years (2012-2016) are used as the basis for hospice patient need projection. The five-year death rate for 2012-2016 is used as an indicator of deaths from all sites in each county and is not affected by changes in actual deaths from year to year.
2. Because previous years' data are used as the basis for projections, the two-year trailing average growth rate in statewide number of deaths served should be calculated over the previous three years and applied to the current reported number of deaths served to project changes in the capacity of existing agencies to serve deaths from each county by the target year. Hospice deaths served will not be projected to exceed 60 percent of total deaths.
3. Median projected hospice deaths is projected by applying a projected statewide median percent of deaths served by hospice to projected deaths in each county. Projected statewide

median percent of deaths served should be calculated by applying the two-year trailing average growth rate in the statewide median percent of deaths served over the previous three years to the current statewide median percent of deaths served.

4. An additional hospice is indicated if: 1) the county's deficit is 90 or more, and 2) the number of licensed hospice home care offices located in the county per 100,000 population is three or less.

**Hospice Inpatient Beds:**

1. Because previous years' data are used as the basis for projections, the two-year trailing average growth rate in statewide hospice admissions should be calculated over the previous three years and applied to the current reported number of hospice admissions to project total hospice admissions.
2. Total projected admissions and the lower of the statewide median average length of stay per admission and each county's average length of stay per admission are used as the basis for projecting estimated inpatient days for each county.
3. A two-year trailing average statewide inpatient utilization rate of the total estimated days of care in each county is used as a basis for estimating days of care in licensed inpatient hospice facility beds.

**Hospice Residential Beds:**

Rules for hospice residential beds were adopted by the Medical Care Commission in 1991. This category of beds does not have a methodology to project need and no need methodology was recommended for the North Carolina 2019 State Medical Facilities Plan.

**Sources of Data**

**Population:**

Estimates and projections of population were obtained from the North Carolina Office of State Budget and Management.

Estimated active duty military population numbers were excluded for any county with more than 500 active duty military personnel. These estimates were obtained from the category of "Employment Status-Armed Forces" in the "Selected Economic Characteristics" portion of the 2016 American Community Survey 5-year Estimates.

**Number of Deaths and Death Rates:**

Deaths and death rates are from "Selected Vital Statistics for 2016 and 2012-2016, Vol. 1" published by the North Carolina Department of Health and Human Services, State Center for Health Statistics.

**Utilization and Licensed Offices:**

Total reported hospice patient deaths, admissions, days of care and licensed offices by county were compiled from the "2018 Annual Data Supplement to Licensure Application" as submitted to the North Carolina Department of Health and Human Services, Division of Health Service Regulation by existing licensed hospices and by home care agencies and health departments who meet the requirements of the rules for hospice licensure.

**Application of the Standard Methodology**

The steps in applying the projection methods are as follows:

**Hospice Home Care Offices:**

- Step 1: The 2012-2016 death rate/1,000 population for each county is entered.
- Step 2: The estimated 2020 population of each county is entered with adjustments for the counties with more than 500 active duty military personnel.
- Step 3: Projected 2020 deaths for each county is calculated by multiplying the county death rate (Step 1) by the 2020 estimated population (Step 2) divided by 1,000.
- Step 4: The total number of reported hospice patient deaths, by county of patient residence, from annual data supplements to licensure applications is entered.
- Step 5: The “Two-Year Trailing Average Growth Rate in Statewide Number of Deaths Served” over the previous three years is calculated.

<b>Year</b>	<b>Statewide Number Deaths Served</b>	<b>Growth</b>
2015	39,164	
2016	40,438	3.3%
2017	41,685	3.1%
<b>Two-Year Trailing Average Growth Rate</b>		<b>3.2%</b>

- Step 6a: 2020 number of hospice deaths served at two-year trailing average growth rate is calculated by multiplying the number of reported hospice deaths (Step 4) by the statewide two-year trailing average growth rate for deaths served for three years (Step 5) (Number of reported deaths x 103.2 x 103.2 x 103.2).
- Step 6b: 2020 number of hospice deaths served limited to 60 percent is calculated by multiplying the projected 2020 deaths for each county (Step 2) by 60 percent.
- Step 6c: Projected 2020 number of hospice deaths served is determined to be the lower of:
  - a. Projected 2020 number of hospice deaths served at two-year trailing average growth rate (Step 6a), or;
  - b. Projected 2020 number of hospice deaths served limited to 60 percent (Step 6b).
- Step 7: The “Two-Year Trailing Average Growth Rate in Statewide Median Percent of Deaths Served” over the previous three years is calculated.

<b>Year</b>	<b>Median Percent of Deaths Served</b>	<b>Growth</b>
2015	41.36%	
2016	41.59%	0.6%
2017	41.05%	-1.3%
<b>Two Year Trailing Average Growth Rate</b>		<b>-0.4%</b>

- Step 8: The projected median statewide percent of deaths served is calculated by multiplying the current statewide median percent of deaths served by the statewide two-year trailing average growth rate for median percent of deaths served (Step 7) for three years (statewide median percent of deaths served x -100.4 x -100.4 x -100.4).

- Step 9: Median projected 2020 hospice deaths is calculated by multiplying projected 2020 deaths (Step 3) by the projected statewide median percent of deaths served (Step 8).
- Step 10: In counties for which additional hospice home care office need determinations were made, determine the difference between 90 and the number of hospice patient deaths reported by each new office in the county for which a need determination was made. If a new office reports more than 90 hospice patient deaths in the county for which a need determination was made, the office's reported number of hospice patient deaths is not adjusted for that county. If a new office reported fewer than 90 hospice patient deaths in the county for which a need determination was made, an adjustment "placeholder" equal to the difference between the reported number of hospice patient deaths and 90 is used. The adjustment "placeholder" is made through the third annual Plan following either: a) issuance of the certificate of need if the approved applicant had a hospice home care office in the county prior to the issuance of the certificate; or, b) certification of the new office that received the certificate of need in the county for which a need determination was made if the approved applicant did not have an existing hospice home care office in the county prior to the issuance of the certificate.
- Step 11: Project the number of patients in need (deficit or surplus) by subtracting the median projected 2020 hospice deaths (Step 9) for each county from the projected 2020 number of hospice deaths served (Step 6c) plus any adjustment (Step 10).
- Step 12: The number of licensed hospice home care offices located in each county from annual data supplements to licensure applications is entered.
- Step 13: The number of licensed hospice home care offices per 100,000 population for each county is calculated by dividing the number of licensed hospice offices (Step 12) by the 2020 estimated population (Step 2) divided by 100,000.
- Step 14: A need determination would be made for a county if both of the following are true:
- a. The county's deficit (Step 11) is 90 or more, and;
  - b. The county's number of licensed hospice home care offices per 100,000 population (Step 13) is three or less.

A hospice office's service area is the hospice planning area in which the hospice office is located. Each of the 100 counties in the state is a separate hospice planning area.

**Hospice Inpatient Beds:**

- Step 1: The total number of reported hospice admissions, by county of patient residence, from annual data supplements to licensure applications is entered.
- Step 2: The total number of days of care, by county of patient residence, from annual data supplements to licensure applications is entered.
- Step 3: The average length of stay per admission (ALOS) is calculated by dividing total days of care (Step 2) by total admissions (Step 1).

Step 4: The “Two-Year Trailing Average Growth Rate in Statewide Number of Admissions” over the previous three years is calculated.

Year	Statewide Hospice Admissions	Growth
2015	44,246	
2016	45,538	2.9%
2017	46,763	2.7%
<b>Two-Year Trailing Average Growth Rate</b>		<b>2.8%</b>

Step 5: Total 2022 admissions is calculated for each county by multiplying the total admissions (Step 1) by the statewide two-year trailing average growth rate for hospice admissions (Step 4) for five years (total admissions x 102.8 x 102.8 x 102.8 x 102.8 x 102.8).

Step 6a: 2022 days of care at the county ALOS is calculated by multiplying the total admissions (Step 5) by the ALOS per admission for each county (Step 3).

Step 6b: 2022 days of care at the statewide ALOS is calculated by multiplying the total admissions (Step 5) by the statewide median ALOS per admission.

Step 6c: Projected 2022 days of care for inpatient estimates is determined to be the lower of:

- a. 2022 days of care at the county ALOS (Step 6a), or;
- b. 2022 days of care at the statewide ALOS (Step 6b).

Step 7: Projected 2022 inpatient days is calculated for each county by multiplying the projected 2022 days of care for inpatient estimates (Step 6c) by the two-year trailing average statewide inpatient utilization rate.

Year	General Inpatient Days of Care	Statewide Total Days of Care	Two Year Trailing Average Statewide Inpatient Utilization Rate
2016	117,499	3,380,346	
2017	110,072	3,489,295	
Totals	227,571	6,869,641	<b>3.31%</b>

Step 8: Projected inpatient hospice beds is calculated by dividing 2022 projected inpatient days (Step 7) by 365 days and then dividing by 0.85 to adjust for a targeted 85 percent occupancy.

Step 9: Adjust the projected inpatient hospice beds (Step 8) by the number of licensed hospice beds in each county, certificate of need approved/licensure pending beds, and beds available in previous Plans.

Step 10: Calculate occupancy rates of existing hospice inpatient facilities based on 2018 annual data supplements to licensure application.

Step 11: Adjust projected beds in Step 9 for occupancy rates of existing facilities in counties (Step 10) that are not at 85 percent occupancy. Indicate for such counties either zero

or the deficit indicated in Step 9, whichever is greater. Further adjustments are made for certificate of need approved closures.

Step 12: For single counties with a projected deficit of six or more hospice inpatient beds, applications for single county Hospice Inpatient Units will be considered. The single county need equals the projected deficit.

A hospice inpatient facility bed's service area is the hospice inpatient facility bed planning area in which the bed is located. Each of the 100 counties in the state is a separate hospice inpatient facility bed planning area.

The Long-Term and Behavioral Health Committee and the State Health Coordinating Council will consider petitions for adjusted need determinations that are filed in accordance with provisions outlined in Chapter 2 of the State Medical Facilities Plan. Applicants for certificates of need are encouraged to contact Certificate of Need to arrange pre-application conferences prior to submission of applications.

# Chapter 14:

End-Stage Renal Disease Dialysis Facilities

---

## CHAPTER 14

# END-STAGE RENAL DISEASE DIALYSIS FACILITIES

---

### Summary of Dialysis Station Supply and Utilization

Inventories of dialysis facilities and current utilization rates are presented twice a year in “Semiannual Dialysis Reports” required by this chapter. According to the “July 2018 North Carolina Semiannual Dialysis Report,” there were 210 End-Stage Renal Disease (ESRD) dialysis facilities certified and operating in North Carolina providing a total of 5,113 dialysis stations. Certificates of need had been issued for an additional 296 dialysis stations, but the stations were not yet certified. Another 37 dialysis stations had been requested, but had not completed the certificate of need review and appeals process. The number of facilities per county ranged from zero to 18.

For the July 2018 North Carolina Semiannual Dialysis Report, utilization data were based on reported numbers of patients obtained from certified dialysis providers. Of the 207 certified facilities operational on June 30, 2017, 101 were at or above 80 percent utilization (*i.e., operating with at least 3.2 patients per station*).

### Changes from the Previous Plan

No substantive changes to the dialysis need methodology have been incorporated into the North Carolina 2019 State Medical Facilities Plan. Dates have been advanced by one year, as needed to represent the time period for the 2019 Plan.

### Basic Principles

The principles underlying projection of need for additional dialysis stations are as follows:

1. Increases in the number of facilities or stations should be done to meet the specific need for either a new facility or an expansion.
2. New facilities must have a projected need for at least 10 stations (or 32 patients at 3.2 patients per station) to be cost effective and to assure quality of care.
3. Healthcare Planning will maintain a list of existing facilities and stations, utilization rates, and projected need by county that is updated semiannually. Updated projections will be available two times a year on a published schedule. Existing or potential providers interested in expanding in any area of the state may contact Healthcare Planning for projected need in the area of interest. (*Note: A dialysis station’s service area is the dialysis station planning area in which the dialysis station is located. Except for the Cherokee-Clay-Graham Multicounty Planning Area and the Avery-Mitchell-Yancey Multicounty Planning Area, each of the 94 remaining counties is a separate dialysis station planning area.*)
4. Updates of the projections may target counties that have developed sufficient need to warrant consideration for facility expansion or for establishment of a new facility. Actual numbers are not published in the Plan so they can be updated as appropriate by Healthcare Planning.
5. Home patients will not be included in the determination of need for new stations. Home patients include those that receive hemodialysis or peritoneal dialysis in their home.

6. No existing facility may expand unless its utilization is 80 percent or greater. Any facility at 80 percent utilization or greater may apply to expand.
7. Facilities reporting no patients to the Division of Health Service Regulation, Healthcare Planning and Certificate of Need Section for four consecutive Semiannual Dialysis Reports will be excluded from future inventories.
8. Quality of Care: All facilities should comply with Medicare and Medicaid regulations relating to the delivery and certification of ESRD services and with relevant North Carolina statutory provisions. An applicant already involved in the provision of end-stage renal disease services should provide evidence that care of high quality has been provided in the past.

The following are considered indicators of quality of care and existing providers proposing to expand their operations should include in their applications data which include, but are not limited to, the following:

- a. utilization rates;
  - b. morbidity and mortality rates;
  - c. number of patients that are home trained and patients on home dialysis;
  - d. number of patients receiving transplants;
  - e. number of patients currently on the transplant waiting list;
  - f. hospital admission rates; and
  - g. conversion rates for patients who have acquired hepatitis or AIDS.
9. Availability of Manpower and Ancillary/Support Services: The applicant should show evidence of the availability of qualified staff and other health manpower and management for the provision of quality ESRD services as well as the availability of a safe and adequate water supply, provision for treatment of wastewater discharge, and a standing electrical service with backup capabilities.
  10. Patient Access to In-Center ESRD Services: As a means of making ESRD services more accessible to patients, one of the goals of the N.C. Department of Health and Human Services is to minimize patient travel time to and from the center.

Therefore,

- a. End-stage renal disease treatment should be provided in North Carolina such that patients who require renal dialysis are able to be served in a facility no farther than 30 miles from the patients' homes.
  - b. In areas where it is apparent that patients are currently traveling more than 30 miles for in-center dialysis, favorable consideration should be given to proposed new facilities which would serve patients who are farthest away from existing, operational or approved facilities.
11. Transplantation Services: Transplantation services should be available to, and a priority for, all ESRD patients whose conditions make them suitable candidates for this treatment. New enrollees should meet with and have access to a transplantation representative to provide patient education and evaluation for transplantation.

12. Availability of Dialysis Care: The North Carolina State Health Coordinating Council encourages applicants for dialysis stations to provide or arrange for:
- a. Home training and backup for patients suitable for home dialysis in the ESRD dialysis facility or in a facility that is a reasonable distance from the patient's residence;
  - b. ESRD dialysis service availability at times that do not interfere with ESRD patients' work schedules;
  - c. Services in rural, remote areas.

**Sources of Data**

**Inventory Data:**

Data on the current number of dialysis facilities and stations shall be obtained from Certificate of Need and from the Acute and Home Care Licensure and Certification Section, Division of Health Service Regulation, N. C. Department of Health and Human Services.

**Dialysis Patient Data:**

Data on the dialysis population by county and by facility as of June 30, 2018 and as of December 31, 2018 shall be provided by End-Stage Renal Disease providers operating certified dialysis facilities to the Division of Health Service Regulation, Healthcare Planning and Certificate of Need Section.

**Method for Projecting New Dialysis Station Need**

Healthcare Planning shall determine need for new dialysis stations two times each calendar year, and shall make a report of such determinations available to all who request it. This report shall be called the North Carolina Semiannual Dialysis Report (SDR). Relocations of existing dialysis stations within a county shall be reviewed independently (*see Chapter 3, Category D*). The Semiannual Dialysis Reports will use facility, station and active patient data as of June 30, 2018 for the "January 2019 SDR" and as of December 31, 2018 for the "July 2019 SDR." A new five-year trend line will be established in the "July 2019 SDR" based on data as reported to the Division of Health Service Regulation, Healthcare Planning and Certificate of Need Section for the time period ending December 31, 2018. Need for new dialysis stations shall be determined as follows:

1. County Need (*for the January 2019 SDR – Using the trend line ending with 12/31/2017 data*)
  - a. The average annual rate (percent) of change in total number of dialysis patients resident in each county from the end of 2013 to the end of 2017 is multiplied by the county's June 30, 2018 total number of patients in the SDR, and the product is added to each county's most recent total number of patients reported in the SDR. The sum is the county's projected total June 30, 2019 patients.
  - b. The percent of each county's total patients who were home dialysis patients on June 30, 2018 is multiplied by the county's projected total June 30, 2019 patients, and the product is subtracted from the county's projected total June 30, 2019 patients. The remainder is the county's projected June 30, 2019 in-center dialysis patients.

- c. The projected number of each county's June 30, 2019 in-center patients is divided by 3.2. The quotient is the projection of the county's June 30, 2019 in-center dialysis stations.
  - d. From each county's projected number of June 30, 2019 in-center stations is subtracted the county's number of stations certified for Medicare, certificate of need-approved and awaiting certification, awaiting resolution of certificate of need appeals, and the number represented by need determinations in previous State Medical Facilities Plans or Semiannual Dialysis Reports for which certificate of need decisions have not been made. The remainder is the county's June 30, 2019 projected station surplus or deficit.
  - e. If a county's June 30, 2019 projected station deficit is 10 or greater and the January SDR shows that utilization of each dialysis facility in the county is 80 percent or greater, the June 30, 2019 county station need determination is the same as the June 30, 2019 projected station deficit. If a county's June 30, 2019 projected station deficit is 10 or greater and the January SDR shows the county has no dialysis facility located in the county, then the June 30, 2019 county station need determination is the same as the June 30, 2019 projected station deficit. If a county's June 30, 2019 projected station deficit is less than 10 or if the utilization of any dialysis facility in the county is less than 80 percent, the county's June 30, 2019 station need is zero.
2. County Need *(for the July 2019 SDR – Using a new trend line based on 12/31/2018 data)*
- a. The average annual rate (percent) of change in total number of dialysis patients resident in each county from the end of 2014 to the end of 2018 is multiplied by the county's December 31, 2018 total number of patients in the SDR, and the product is added to each county's most recent total number of patients reported in the SDR. The sum is the county's projected total December 31, 2019 patients.
  - b. The percent of each county's total patients who were home dialysis patients on December 31, 2018 is multiplied by the county's projected total December 31, 2019 patients, and the product is subtracted from the county's projected total December 31, 2019 patients. The remainder is the county's projected December 31, 2019 in-center dialysis patients.
  - c. The projected number of each county's December 31, 2019 in-center patients is divided by 3.2. The quotient is the projection of the county's December 31, 2019 in-center dialysis stations.
  - d. From each county's projected number of December 31, 2019 in-center stations is subtracted the county's number of stations certified for Medicare, certificate of need-approved and awaiting certification, awaiting resolution of certificate of need appeals, and the number represented by need determinations in previous State Medical Facilities Plans or Semiannual Dialysis Reports for which certificate of need decisions have not been made. The remainder is the county's December 31, 2019 projected station surplus or deficit.
  - e. If a county's December 31, 2019 projected station deficit is 10 or greater and the July SDR shows that utilization of each dialysis facility in the county is 80 percent

or greater, the December 31, 2019 county station need determination is the same as the December 31, 2019 projected station deficit. If a county's December 31, 2019 projected station deficit is 10 or greater and the July SDR shows the county has no dialysis facility located in the county, then the December 31, 2019 county station need determination is the same as the December 31, 2019 projected station deficit. If a county's December 31, 2019 projected station deficit is less than 10 or if the utilization of any dialysis facility in the county is less than 80 percent, the county's December 31, 2019 station need is zero.

### 3. Facility Need

A dialysis facility located in a county for which the result of the County Need methodology is zero in the current Semiannual Dialysis Report is determined to need additional stations to the extent that:

- a. Its utilization, reported in the current SDR, is 3.2 patients per station or greater.
- b. Such need, calculated as follows, is reported in an application for a certificate of need:
  - i. The facility's number of in-center dialysis patients reported in the previous Dialysis Report (SDR<sub>1</sub>) is subtracted from the number of in-center dialysis patients reported in the current SDR (SDR<sub>2</sub>). The difference is multiplied by 2 to project the net in-center change for one year. Divide the projected net in-center change for the year by the number of in-center patients from SDR<sub>1</sub> to determine the projected annual growth rate.
  - ii. The quotient from 3.b.i. is divided by 12.
  - iii. The quotient from 3.b.ii. is multiplied by 6 (*the number of months from June 30, 2018 until December 31, 2018*) for the January 2, 2019 SDR and by 12 (*the number of months from December 31, 2017 until December 31, 2018*) for the July 1, 2019 SDR.
  - iv. The product from 3.b.iii. is multiplied by the number of the facility's in-center patients reported in the current SDR and that product is added to such reported number of in-center patients.
  - v. The sum from 3.b.iv. is divided by 3.2, and from the quotient is subtracted the facility's current number of certified stations as recorded in the current SDR and the number of pending new stations for which a certificate of need application has been approved. The remainder is the number of stations needed.
- c. The facility may apply to expand to meet the need established in 3.b.v., up to a maximum of 10 stations.

*[NOTE: "Rounding" to the nearest whole number is allowed only in Step 1(c), Step 2(c) and Step 3(b)(v). In these instances, fractions of 0.5000 or greater shall be rounded to the next higher whole number.]*

Unless specific adjusted need determinations are recommended by the North Carolina State Health Coordinating Council, an application for a certificate of need for additional dialysis stations can be considered consistent with the need determinations of this Plan only if it demonstrates a need by utilizing one of the methods of determining need outlined in this chapter.

**Timeline**

The schedule for publication of the North Carolina Semiannual Dialysis Reports and for receipt of certificate of need applications based on each issue of that report in 2019 shall be as follows:

Data for Period Ending	Publication of Semi-annual Dialysis Report	Certificate of Need Application Due Dates	Certificate of Need Beginning Review Dates
June 30, 2018	January 2, 2019	March 15, 2019	April 1, 2019
December 31, 2018	July 1, 2019	September 16, 2019	October 1, 2019

Please be advised that 5:30 p.m. on the specified application due date is the filing deadline for any certificate of need application in response to these dialysis reports. The filing deadline is absolute.

# Chapter 15:

## Psychiatric Inpatient Services

---

## CHAPTER 15

# PSYCHIATRIC INPATIENT SERVICES

---

### **Background Information**

Certificates of need are required prior to the development of inpatient psychiatric beds identified as needed in the North Carolina 2019 State Medical Facilities Plan. In addition, community hospitals wishing to transfer beds from state psychiatric facilities must obtain a certificate of need prior to establishing these beds pursuant to Policy PSY-1. Further, community hospitals may develop psychiatric beds by converting acute care beds to psychiatric beds through a contract with the North Carolina Division of Mental Health, Developmental Disabilities and Substance Abuse Services or one or more of the local management entities-managed care organizations (LME-MCOs) (Area Mental Health, Developmental Disabilities and Substance Abuse Authorities) in accordance with G.S. §131E-184. If the hospital has executed such a contract, the conversion will be exempt from certificate of need requirements.

### **Changes from the Previous Plan**

One substantive change to the methodology has been incorporated into the North Carolina 2019 State Medical Facilities Plan. The service areas for need determinations were updated to reflect Columbus County's move from the Eastpointe LME-MCO to the Trillium LME-MCO, effective July 1, 2018.

Throughout the chapter, data have been revised to reflect services provided during FY 2016-2017, and dates have been advanced by one year, where appropriate. The base year is changed to 2017 and the base year utilization data is applied to Year 2021 population estimates.

### **Basic Principles**

Services for people with a mental disorder should be organized in such a way that a continuum of care is available. Because needs of people with a mental disorder vary greatly, they require access to a wide array of services including outpatient treatment, housing resources, day treatment services, residential treatment services and hospitalization. For most individuals in acute distress, admission to a community-based facility is preferable to admission to a regional, state operated facility because community-based treatment provides greater potential for reintegration into the community. The role of state facilities is to complement and supplement the community mental health system. State facilities should be the treatment setting of last resort and should provide services that cannot be economically provided in the community. Development of community programs may be accomplished through establishing appropriate treatment programs and support services in the community to avoid institutionalization of individuals in acute distress, and relocating people from state facilities to community programs to the extent appropriate services are developed in the community.

Inpatient psychiatric treatment of children and adolescents (which is more extensive than stabilization) shall occur in units which are separate and distinct from both adult psychiatric units and general pediatric units. In order to maximize efficiency and ensure the availability of a continuum of care, psychiatric beds for children and adolescents shall be developed in conjunction with outpatient treatment programs.

### **Summary of Bed Supply and Utilization**

Psychiatric inpatient services are provided by three state-owned regional hospitals, by specialty hospitals and by general acute care hospitals with designated psychiatric units. The non-state hospitals had 2,367 licensed beds and provided a total of 531,599 days of care during the 12-month period ending September 30, 2017, 20.1 percent of which were provided to patients younger than 18 years of age.

### **Methodology for Determining Psychiatric Bed Need**

The methodology used to project need for psychiatric beds focuses on short-term psychiatric beds only, i.e., those beds used primarily by patients with lengths of stay of 60 days or fewer. The methodology is based on Year 2017 utilization data obtained from Truven Health Analytics, a collector of hospital patient discharge information. The data were gathered from all acute care hospitals and specialty psychiatric hospitals in North Carolina. State hospital data are excluded because these hospitals are not subject to the certificate of need law. The data include days of care for all psychiatric patients by their county of residence and age group. Major Diagnostic Category (MDC) code 19 (Mental Diseases and Disorders) was used in the survey. Where data from Truven Health Analytics were not available, utilization data were obtained from the 2018 “Mental Health/Substance Abuse Hospital License Renewal Application” submitted to the North Carolina Department of Health and Human Services, Division of Health Service Regulation.

### **Basic Assumptions of the Methodology**

1. A psychiatric inpatient bed’s service area is the catchment area for the LME-MCO for mental health, developmental disabilities and substance use disorder services in which the bed is located. The counties comprising each of the seven LME-MCO catchment areas for mental health, developmental disabilities and substance use disorder services are listed in Table 15B.
2. Children and adolescents require psychiatric treatment in units that are programmatically and physically distinct from adult patient units.
3. Short-term psychiatric beds in the state psychiatric hospitals being used by residents of each psychiatric planning area program may be relocated to community facilities in accordance with Policy PSY-1.
4. Optimum occupancy of freestanding psychiatric hospitals and designated psychiatric units in acute care hospitals is considered to be 75 percent.
5. Bed need is projected two years in advance because that amount of time may be required to bring a needed facility or expansion into service. Need in the North Carolina 2019 State Medical Facilities Plan is projected for Year 2021.

### **Sources of Data**

#### **Inventory Data:**

North Carolina Department of Health and Human Services, Division of Health Service Regulation, Mental Health Licensure and Certification Section; Acute and Home Care Licensure and Certification Section; Certificate of Need; and the North Carolina Division of Mental Health, Developmental Disabilities and Substance Abuse Services.

#### **Population Data:**

North Carolina Office of State Budget and Management (OSBM).

**Utilization Data:**

Truven Health Analytics collected data for the period from October 1, 2016 through September 30, 2017 from the providers of psychiatric inpatient services and the Cecil G. Sheps Center for Health Services Research at the University of North Carolina at Chapel Hill distilled the data down to the individual counties. Where data from Truven Health Analytics were not available, utilization data were obtained from the 2018 “Mental Health/Substance Abuse Hospital License Renewal Application” submitted to the North Carolina Department of Health and Human Services, Division of Health Service Regulation.

**Application of the Methodology**

Each step explained below is applied to the seven LME-MCOs to arrive at bed surpluses/deficits in each LME-MCO.

**Part 1: Determining Projected Patient Days of Care and Bed Need for Children and Adolescents**

- Step 1: The estimated Year 2021 days of care for children/adolescents is determined by taking the actual 2017 days of care for the age group birth through 17, multiplying that number by the projected Year 2021 child/adolescent population and then dividing by the Year 2017 child/adolescent population.
- Step 2: The adjusted Year 2021 days of care is divided by 365 and then by 75 percent to arrive at the child/adolescent bed need in Year 2021, assuming 75 percent occupancy.
- Step 3: The planning inventory is determined based on licensed beds, adjusted for CON-Approved/License Pending beds and beds available in prior Plans that have not been CON-approved. The number of existing child/adolescent beds in the planning inventory is then subtracted from the bed need (from Step 2) in order to arrive at the Year 2021 unmet bed need for children and adolescents.

**Part 2: Determining Projected Patient Days of Care and Bed Need for Adults**

- Step 1: The estimated Year 2021 days of care for adults is determined by taking the actual Year 2017 days of care for the age group 18 and over, multiplying that number by the projected Year 2021 adult population and then dividing by the Year 2017 adult population.
- Step 2: The projected Year 2021 days of care is divided by 365 and then divided by 75 percent to arrive at the adult bed need in Year 2021, assuming 75 percent occupancy.
- Step 3: The planning inventory is determined based on licensed beds, adjusted for CON-Approved/License Pending beds and beds available in prior Plans that have not been CON-approved. The number of existing adult beds in the planning inventory is then subtracted from the bed need (from Step 2) in order to arrive at the Year 2021 unmet bed need for adults.

\* CON-approved projects that are Policy PSY-1 bed transfers from State Psychiatric Hospitals.

\*\* Duke Life Point Maria Parham Medical Center received a grant from the Dorothea Dix Hospital Property Fund to renovate and convert 33 acute care beds to adult psychiatric beds at the site of the closed Franklin Medical Center. This project is exempt from certificate of need review and the beds are not yet accounted for in Table 15A.

\*\*\* Southeastern Regional Medical Center was awarded a grant to develop 10 adult psychiatric inpatient beds. These beds do not require a certificate of need and are not yet accounted for in Table 15A.

\*\*\*\* Charles A. Cannon, Jr. Memorial Hospital received a grant from the Dorothea Dix Hospital Property Fund to convert 27 acute care beds to adult psychiatric beds. This project is exempt from certificate of need review and the beds are not yet accounted for in Table 15A.

# Chapter 16:

Substance Use Disorder Inpatient and Residential Services  
(Chemical Dependency Treatment Beds)

---

## **CHAPTER 16**

# **SUBSTANCE USE DISORDER INPATIENT AND RESIDENTIAL SERVICES (CHEMICAL DEPENDENCY TREATMENT BEDS)**

---

### **Summary of Bed Supply and Utilization**

Three state-operated Alcohol and Drug Abuse Treatment Centers are certified by the Centers for Medicare & Medicaid Services as acute inpatient psychiatric hospitals and provide substance use disorder/psychiatric stabilization and treatment.

### **Changes from the Previous Plan**

One substantive change to the methodology has been incorporated into the North Carolina 2019 State Medical Facilities Plan. The service areas for need determinations were updated to reflect Columbus County's move from the Eastpointe LME-MCO to the Trillium LME-MCO, effective July 1, 2018.

Throughout the chapter, data have been revised to reflect services provided during fiscal year 2016-2017, and dates have been advanced by one year, where appropriate. The base year is changed to 2017 and the base year utilization data is applied to Year 2021 population estimates.

### **Basic Principles**

Services for people with a substance use disorder should be organized in such a way that a continuum of care is available. Because their needs vary greatly, people with a substance use disorder require access to a wide array of services including outpatient treatment, housing resources, day treatment services, residential treatment services and hospitalization. For most individuals in acute distress, admission to a community-based facility is preferable to admission to a regional, state-operated facility because community-based treatment provides greater potential for reintegration into the community. The role of state facilities is to complement and supplement the community mental health system. State facilities should be the treatment setting of last resort and should provide services that cannot be economically provided in the community. Development of community programs may be accomplished through establishing appropriate treatment programs and support services in the community. This avoids institutionalization of individuals in acute distress and allows relocating people from state facilities to community programs to the extent appropriate services are developed in the community. Adolescents should receive substance use disorder treatment services that are distinct from services provided to adults.

It is essential that a continuum of services be available for the treatment of substance use disorders. Physical withdrawal from addicting substance(s) is accomplished through detoxification services. Hospitalization shall be considered the most restrictive form of therapeutic intervention or treatment and shall be used only when this level of 24-hour care and supervision is required to meet the patient's health care needs. Following detoxification, the individual should receive substance use disorder-related services addressing his/her physical, emotional, psychological and social needs.

In addition, individuals should have access to a continuum of appropriate services including periodic, day/night and residential/inpatient services. Support services (e.g., Alcoholics and Narcotics Anonymous, vocational rehabilitation) that help the individual remain in control of his/her life and prevent the possibility of relapse should also be available.

The 2003 Session of the General Assembly of North Carolina approved Session Law 2003-390, House Bill 815, which stated that it was:

“An act to amend the definition of chemical dependency treatment facility to provide that social setting detoxification facilities and medical detoxification facilities are not chemical dependency treatment facilities for the purposes of Certificate of Need requirements and to amend the definition of chemical dependency treatment bed to provide that beds licensed for detoxification are not chemical dependency treatment beds for the purposes of Certificate of Need requirements; and to provide that social setting detoxification facilities and medical detoxification facilities shall not deny admission or treatment to an individual on the basis of the individual's inability to pay.”

In response to House Bill 815, the detoxification-only beds for residential facilities were removed from the inventory in this chapter. Licenses for acute care hospitals were revised to change the existing licensed medical detoxification beds to licensed chemical dependency/substance use disorder treatment beds. See DFS Advisory in Appendix E.

### **Basic Assumptions of the Methodology**

1. Children and adolescents require treatment in units that are programmatically and physically distinct from adult patient units.
2. Target occupancy of substance use disorder treatment units in hospitals and residential facilities is considered to be 85 percent.
3. Bed need is projected two years in advance because that amount of time may be required to bring a needed facility or expansion into service. Need in the North Carolina 2019 State Medical Facilities Plan is projected for Year 2021.

### **Inventory Data:**

North Carolina Department of Health and Human Services, Division of Health Service Regulation, Mental Health Licensure and Certification Section; Acute and Home Care Licensure and Certification Section; Certificate of Need; and Division of State Operated Healthcare Facilities.

### **Population Data:**

North Carolina Office of State Budget and Management.

### **Utilization Data:**

Truven Health Analytics collected data for the period from October 2016 through September 2017 from hospital providers, and the Cecil G. Sheps Center for Health Services Research at the University of North Carolina at Chapel Hill distilled the data down to the individual counties. Where data from Truven Health Analytics were not available, utilization data were obtained from the 2018 “Mental Health/Substance Abuse Hospital License Renewal Application” and the “Substance Abuse Residential Treatment Data Collection Form,” as attached to the 2018 “License Renewal Application for MH/DD/SAS Facilities,” submitted to the North Carolina Department of Health and Human Services, Division of Health Service Regulation.

### **Methodology for Determining Chemical Dependency (Substance Use Disorder) Treatment Bed Need**

The methodology is based on 2017 hospital utilization data obtained from Truven Health Analytics, a collector of hospital patient discharge information. Data reflecting utilization of chemical dependency (substance use disorder) residential treatment facilities and mental health hospitals that did not submit data to Truven Health Analytics in 2017 were derived from the 2018 “Substance Abuse Residential Treatment Data Collection Form” and the 2018 “Mental Health/Substance Abuse Hospital License Renewal Application,” as submitted to the North Carolina Division of Health Service Regulation. The data collected and calculated include the days of care for all substance use disorder patients by their county of residence

and age group, for a one-year time period. Major Diagnostic Category (MDC) code 20 (Alcohol/Drug Use or Induced Mental Disorders) was used to identify records used in the methodology.

### **Application of the Methodology**

A chemical dependency treatment bed's service area is the mental health planning region in which the bed is located. The LME-MCOs comprising the three mental health planning regions are listed in Table 16B. The counties comprising each of the seven LME-MCO catchment areas for mental health, developmental disabilities and substance use disorder services are listed in Table 16B. Each step explained below is applied individually to the seven mental health LME-MCOs, and then bed surpluses/deficits in the LME-MCOs are combined to arrive at the total surpluses/deficits for the three mental health planning regions. Treatment utilization data from acute care and specialty hospitals and from residential treatment facilities were incorporated into the methodology.

### **Part 1: Determining Projected Patient Days of Care and Total Bed Need**

- Step 1: The estimated Year 2021 days of care for all age groups is determined by taking the actual Year 2017 days of care, multiplying that number by the projected Year 2021 population and then dividing by the Year 2017 population.
- Step 2: The Year 2021 days of care is divided by 365 and then by 85 percent to arrive at the total bed need in Year 2021, assuming an 85 percent occupancy. Eighty-five percent has been determined to be the target occupancy rate for chemical dependency (substance use disorder) treatment beds in hospitals and residential treatment facilities.

### **Part 2: Determining Projected Unmet Bed Need for Children and Adolescents and for Adults**

- Step 1: The planning inventory is determined based on licensed beds, adjusted for CON-Approved/License Pending beds and beds available in prior Plans that have not been CON-approved. The number of existing beds in the planning inventory is then subtracted from the total bed need (from Part 1, Step 2) in order to arrive at the Year 2021 unmet bed need for all age groups ("total bed surplus/deficit").
- Step 2: Nine percent of the total bed need is subtracted as the estimated Year 2021 bed need for children and adolescents, based on utilization patterns reflected in past data (nine percent of the days of care were for children and adolescents).
- Step 3: The child/adolescent planning inventory is subtracted from the child/adolescent bed need (from Part 2, Step 2) to arrive at the Year 2021 child/adolescent unmet bed need.
- Step 4: The adult bed need is then calculated by subtracting the child/adolescent bed "surplus/deficit" from the total bed "surplus/deficit."

<b>Eastern Region</b>	V, VI	2	May 15, 2019	June 1, 2019
<b>Central Region***</b>	II, III, IV, V	32	May 15, 2019	June 1, 2019
It is determined that there is no need anywhere else in the state and no other reviews are scheduled.				

\* Need determinations shown in this document may be increased or decreased during the year pursuant to Policy GEN-2 (see Chapter 4).

\*\* Application due dates are absolute deadlines. The filing deadline is 5:30 p.m. on the application due date (see Chapter 3).

\*\*\* The need determination in the Central Planning Region for 32 adult chemical dependency treatment beds is in response to a petition that was approved by the State Health Coordinating Council (SHCC). The SHCC has stipulated that Certificate of Need applicants must commit to establishing a contract with the Cardinal Innovations Healthcare Solutions LME-MCO to treat underserved populations, specifically the indigent and/or uninsured.

# Chapter 17:

Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID)

---

## CHAPTER 17

# INTERMEDIATE CARE FACILITIES FOR INDIVIDUALS WITH INTELLECTUAL DISABILITIES

---

### **Background Information**

Area mental health, developmental disability and substance use disorder authorities (G.S. 122C-117(a)(2)) have responsibility by law to ensure provision of services to people in need within their catchment areas. A certificate of need application for a new or expanded Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID) should contain written comments from the Local Management Entity/Managed Care Organization (LME-MCO) of the area authority relative to its endorsement of the project and involvement in the development of a client admission/discharge agreement. The LME-MCOs shall serve as the portals of entry and exit for the admission and discharge of clients in ICF/IID facilities (G.S. 122C-115.4) within the applicable Mental Health, Developmental Disabilities, and Substance Abuse Services (MH/DD/SAS) catchment areas. This involvement is essential to ensure that only clients in need of the intensive array of services provided in an ICF/IID program are admitted and served as close as possible to their own homes, and ensured coordination with services outside the facility.

The North Carolina Department of Health and Human Services is committed to the integration of people with intellectual disabilities/developmental disabilities into community living to the fullest extent possible. Community-based alternatives are encouraged, particularly through the transfer of ICF/IID beds from state developmental centers. Other alternatives may include small, community-based, non-ICF/IID residential options as well as other sites through the Medicaid Waiver Community Alternatives Program (CAP) - MR/DD Program.

Facilities proposing to transfer ICF/IID beds from state developmental centers to communities shall demonstrate that they are committed to serving the same type of residents normally served in state operated developmental centers. To ensure that relocated beds will serve those people, any certificate of need application for beds allocated under the above policy must meet the requirements of Chapter 858 of the 1983 Session Laws. The application for transferred beds shall include a written agreement by the applicant with the following representatives which outlines the operational aspects of the bed transfers: director of the LME-MCO serving the county where the program is to be located; the director of the applicable state developmental center; the director of the North Carolina Division of State Operated Healthcare Facilities; and the Secretary of the North Carolina Department of Health and Human Services.

Alternatively, notwithstanding the requirements of Chapter 858 of the 1983 Session Laws, facilities proposing to operate transferred beds shall submit an application to Certificate of Need demonstrating a commitment to serve children ages birth through six years who have severe to profound developmental disabilities and are medically fragile. To help ensure the relocated beds will serve these residents, such proposals shall include a written agreement with the following representatives: director of the LME-MCO serving the county where the program is to be located; the director of the applicable state developmental center; the director of the North Carolina Division of State Operated Healthcare Facilities; and the secretary of the North Carolina Department of Health and Human Services.

### **Changes from the Previous Plan**

One substantive change to the methodology has been incorporated into the North Carolina 2019 State Medical Facilities Plan. The service areas for need determinations were updated to reflect Columbus County's move from the Eastpointe LME-MCO to the Trillium LME-MCO, effective July 1, 2018. Also,

Chapter 4 now includes Policy ICF/IID-4, which clarifies the existing process by which ICF/IID beds can be transferred from state operated developmental centers to community facilities pursuant to Chapter 858 of the 1983 Session Laws.

### **Basic Principles**

People with conditions other than an intellectual disability (such as autism, cerebral palsy, epilepsy or related conditions) may be appropriate for placement in an ICF/IID setting if they are in need of the services the program is certified to provide. In the development of services for this population, the full continuum of services should be explored to determine the most appropriate level of care for their needs.

Services for people with a developmental disability should be organized in such a way that a continuum of care is available. For most individuals, admission to a community-based facility is preferable to admission to a regional, state operated facility because community-based treatment provides greater potential for reintegration into the community. The role of state facilities is to complement and supplement the community mental health system. State facilities should be the treatment setting of last resort and should provide services that cannot be economically provided in the community. Development of community programs may be accomplished through establishing appropriate treatment programs and support services in the community to avoid institutionalization of individuals with a developmental disability, and relocating people from state facilities to community programs to the extent appropriate services are developed in the community.

### **Summary of ICF/IID Bed Supply and Utilization**

Intermediate Care Facilities for Individuals with Intellectual Disabilities or developmental disabilities is a category of group home care designated by the federal-state Medicaid program. A total of 5,101 certified ICF/IID beds are in operation. This total includes four state facilities and their 2,317 beds. The beds located in state facilities are excluded from the regular bed inventory because such facilities are not subject to the state's certificate of need law.

### **Need Determination for ICF/IID Beds**

The service area for an ICF/IID bed is the catchment area for the LME-MCO for mental health, developmental disability and substance use disorder services in which the bed is located. LME-MCO catchment areas for mental health, developmental disability and substance use disorder services are listed in Table 17A: Inventory of ICF/IID Facilities and Beds.

In accordance with the Policy ICF/IID-2 (Transfer of ICF/IID Beds from State Operated Developmental Centers to Community Facilities for Individuals Who Currently Occupy the Beds) a proposal was submitted by the North Carolina Division of MH/DD/SAS to facilitate the downsizing of the state operated developmental centers.

The proposal indicated that the North Carolina Division of MH/DD/SAS will transfer existing adult certified ICF/IID beds in state operated developmental centers through the certificate of need process to establish ICF/IID group homes in the community to serve people with complex behavioral challenges and/or medical conditions for whom a community ICF/IID placement is appropriate, as determined by the individual's treatment team and with the individual/guardian being in favor of the placement.

### **Sources of Data**

North Carolina Department of Health and Human Services, Division of State Operated Healthcare Facilities; Division of Health Service Regulation, Mental Health Licensure and Certification Section and Division of Health Service Regulation, Healthcare Planning and Certificate of Need Section.

## Appendix B: Partial Listing of Healthcare Planning Acronyms/Terms

### Statute 131 E – 175 et. seq. – Certificate of Need Law

<u><b>Acronym / Term</b></u>	<u><b>Refers to / Meaning</b></u>
<b>AC</b>	Acute Care
<b>ACH</b>	Adult Care Home
<b>ACS</b>	Acute Care Services
<b>AIDS</b>	Acquired Immune Deficiency Syndrome
<b>APA</b>	Administrative Procedures Act
<b>ASC</b>	Ambulatory Surgery Center
<b>CAP MR/DD</b>	Community Alternatives Program for Mentally Retarded/Developmentally Disabled Persons (same as CAP/MR Waiver Program)
<b>CCRC</b>	Continuing Care Retirement Community
<b>CD</b>	Chemical Dependency
<b>CMS</b>	Centers for Medicare & Medicaid Services (Federal Agency)
<b>COG</b>	Council of Governments
<b>CON</b>	Certificate of Need
<b>CPT</b>	Current Procedural Terminology (code set maintained by the American Medical Association)
<b>C-Section</b>	Cesarean Section
<b>DD</b>	Developmental Disability
<b>DFS</b>	Division of Facility Services which has become the DHSR
<b>DHSR</b>	Division of Health Service Regulation
<b>DHHS</b>	Department of Health and Human Services
<b>DMA</b>	Division of Medical Assistance
<b>DMH/DD/SAS</b>	Division of Mental Health, Developmental Disabilities and Substance Abuse Services
<b>DRG</b>	Diagnosis Related Group
<b>DSM III R</b>	Diagnostic and Statistical Manual of Mental Disorders (revised)
<b>Endo</b>	Endoscopy
<b>ESRD</b>	End-Stage Renal Disease
<b>ESTV</b>	Equivalent Simple Treatment Visits
<b>ESWL</b>	Extracorporeal Shock Wave Lithotripsy
<b>GS</b>	General Statute(s)
<b>HCUP</b>	Healthcare Cost and Utilization Project
<b>HPCON</b>	Healthcare Planning and Certificate of Need Section (A section within DHSR that reviews applications and awards Certificates of Need)
<b>HIV+</b>	Infection with Human Immunodeficiency Virus
<b>HH</b>	Home Health
<b>HSA</b>	Health Service Area
<b>HUD</b>	Housing and Urban Development (Federal Agency)
<b>ICD</b>	International Classification of Diseases
<b>ICF/IID</b>	Intermediate Care Facility for Individuals with Intellectual Disabilities (new name for Intermediate Care Facility for the Mentally Retarded based on 2010 Rosa's Law)
<b>ICU</b>	Intensive Care Unit
<b>IP</b>	Inpatient
<b>LME</b>	Local Management Entity
<b>LRA</b>	License Renewal Application

<b>LTC</b>	Long-Term Care
<b>LTCH</b>	Long-Term Care Hospital
<b>MCO</b>	Managed Care Organization
<b>MDC</b>	Major Diagnostic Category
<b>MH</b>	Mental Health
<b>MRI</b>	Magnetic Resonance Imaging Scanner
<b>NCAC</b>	North Carolina Administrative Code (also known as: Rules)
<b>NH</b>	Nursing Home and Nursing Care Facilities
<b>OP</b>	Outpatient
<b>OR</b>	Operating Room
<b>PET</b>	Positron Emission Tomography Scanner
<b>Plan</b>	North Carolina State Medical Facilities Plan
<b>PSY</b>	Psychiatric
<b>QAV</b>	Quality, Access and Value
<b>SA</b>	Substance Abuse
<b>SDR</b>	Semiannual Dialysis Report (prepared by Healthcare Planning)
<b>SHCC</b>	State Health Coordinating Council (Official Title: North Carolina State Health Coordinating Council)
<b>SMFP</b>	State Medical Facilities Plan

---

## Appendix C: List of "Contiguous Counties"

---

For purposes of the State Medical Facilities Plan, Healthcare Planning defines contiguous groupings in relation to a base county and includes any North Carolina county that touches that base county.

ALAMANCE	ALEXANDER	ALLEGHANY	ANSON	ASHE	AVERY
Caswell	Caldwell	Ashe	Montgomery	Alleghany	Burke

## Appendix D: North Carolina Certificate of Need Statute

### Article 9 Certificate of Need

#### § 131E-175. Findings of fact.

The General Assembly of North Carolina makes the following findings:

- (1) That the financing of health care, particularly the reimbursement of health services rendered by health service facilities, limits the effect of free market competition and government regulation is therefore necessary to control costs, utilization, and distribution of new health service facilities and the bed complements of these health service facilities.
- (2) That the increasing cost of health care services offered through health service facilities threatens the health and welfare of the citizens of this State in that citizens need assurance of economical and readily available health care.
- (3) That, if left to the market place to allocate health service facilities and health care services, geographical maldistribution of these facilities and services would occur and, further, less than equal access to all population groups, especially those that have traditionally been medically underserved, would result.
- (3a) That access to health care services and health care facilities is critical to the welfare of rural North Carolinians, and to the continued viability of rural communities, and that the needs of rural North Carolinians should be considered in the certificate of need review process.
- (4) That the proliferation of unnecessary health service facilities results in costly duplication and underuse of facilities, with the availability of excess capacity leading to unnecessary use of expensive resources and overutilization of health care services.
- (5) Repealed.
- (6) That excess capacity of health service facilities places an enormous economic burden on the public who pay for the construction and operation of these facilities as patients, health insurance subscribers, health plan contributors, and taxpayers.
- (7) That the general welfare and protection of lives, health, and property of the people of this State require that new institutional health services to be offered within this State be subject to review and evaluation as to need, cost of service, accessibility to services, quality of care, feasibility, and other criteria as determined by provisions of this Article or by the North Carolina Department of Health and Human Services pursuant to provisions of this Article prior to such services being offered or developed in order that only appropriate and needed institutional health services are made available in the area to be served.
- (8) That because persons who have received exemptions under Section 11.9(a) of S.L. 2000-67, as amended, and under Section 11.69(b) of S.L. 1997-443, as amended by Section 12.16C(a) of S.L. 1998-212, and as amended by Section 1 of S.L. 1999-135, have had sufficient time to complete development plans and initiate construction of beds in adult care homes.
- (9) That because with the enactment of this legislation, beds allowed under the exemptions noted above and pending development will count in the inventory of adult care home beds available to provide care to residents in the State Medical Facilities Plan.
- (10) That because State and county expenditures provide support for nearly three-quarters of the residents in adult care homes through the State County Special Assistance program, and excess bed capacity increases costs per resident day, it is in the public interest to promote efficiencies in delivering care in those facilities by controlling and directing their growth in an effort to prevent underutilization and higher costs and provide appropriate geographical distribution.
- (11) That physicians providing gastrointestinal endoscopy services in unlicensed settings should be given an opportunity to obtain a license to provide those services to ensure the safety of patients and the provision of quality care.

- (12) That demand for gastrointestinal endoscopy services is increasing at a substantially faster rate than the general population given the procedure is recognized as a highly effective means to diagnose and prevent cancer.

**§ 131E-176. Definitions.**

As used in this Article, unless the context clearly requires otherwise, the following terms have the meanings specified:

- (1) "Adult care home" means a facility with seven or more beds licensed under G.S. 131D-2 or Chapter 131E of the General Statutes that provides residential care for aged or disabled persons whose principal need is a home which provides the supervision and personal care appropriate to their age and disability and for whom medical care is only occasional or incidental.
- (1a) "Air ambulance" means aircraft used to provide air transport of sick or injured persons between destinations within the State.
- (1b) "Ambulatory surgical facility" means a facility designed for the provision of a specialty ambulatory surgical program or a multispecialty ambulatory surgical program. An ambulatory surgical facility serves patients who require local, regional or general anesthesia and a period of post-operative observation. An ambulatory surgical facility may only admit patients for a period of less than 24 hours and must provide at least one designated operating room or gastrointestinal endoscopy room, as defined in Article 5 Part 1 and Article 6, Part 4 of this Chapter, and at least one designated recovery room, have available the necessary equipment and trained personnel to handle emergencies, provide adequate quality assurance and assessment by an evaluation and review committee, and maintain adequate medical records for each patient. An ambulatory surgical facility may be operated as a part of a physician or dentist's office, provided the facility is licensed under G.S. Chapter 131E, Article 6, Part D, but the performance of incidental, limited ambulatory surgical procedures which do not constitute an ambulatory surgical program as defined in subdivision (1c) of this section and which are performed in a physician's or dentist's office does not make that office an ambulatory surgical facility.
- (1c) "Ambulatory surgical program" means a formal program for providing on a same-day basis those surgical procedures which require local, regional or general anesthesia and a period of post-operative observation to patients whose admission for more than 24 hours is determined, prior to surgery or gastrointestinal endoscopy, to be medically unnecessary.
- (2) "Bed capacity" means space used exclusively for inpatient care, including space designed or remodeled for licensed inpatient beds even though temporarily not used for such purposes. The number of beds to be counted in any patient room shall be the maximum number for which adequate square footage is provided as established by rules of the Department except that single beds in single rooms are counted even if the room contains inadequate square footage. The term "bed capacity" also refers to the number of dialysis stations in kidney disease treatment centers, including freestanding dialysis units.
- (2a) "Bone marrow transplantation services" means the process of infusing bone marrow into persons with diseases to stimulate the production of blood cells.
- (2b) "Burn intensive care services" means services provided in a unit designed to care for patients who have been severely burned.
- (2c) "Campus" means the adjacent grounds and buildings, or grounds and buildings not separated by more than a public right-of-way, of a health service facility and related health care entities.
- (2d) "Capital expenditure" means an expenditure for a project, including but not limited to the cost of construction, engineering, and equipment which under generally accepted accounting principles is not properly chargeable as an expense of operation and maintenance. Capital expenditure includes, in addition, the fair market value of an acquisition made by donation, lease, or comparable arrangement by which a person obtains equipment, the expenditure for which would have been considered a capital expenditure under this Article if the person had acquired it by purchase.
- (2e) Repealed. 8-26-05

- (2f) "Cardiac catheterization equipment" means the equipment used to provide cardiac catheterization services.
- (2g) "Cardiac catheterization services" means those procedures, excluding pulmonary angiography procedures, in which a catheter is introduced into a vein or artery and threaded through the circulatory system into the heart specifically to diagnose abnormalities in the motion, contraction, and blood flow of the moving heart or to perform surgical therapeutic interventions to restore, repair, or reconstruct the coronary blood vessels of the heart.
- (3) "Certificate of need" means a written order which affords the person so designated as the legal proponent of the proposed project the opportunity to proceed with the development of such project.
- (4) Repealed.
- (5) "Change in bed capacity" means (i) any relocation of health service facility beds, or dialysis stations from one licensed facility or campus to another, or (ii) any redistribution of health service facility bed capacity among the categories of health service facility bed as defined in G.S. 131E-176(9c), or (iii) any increase in the number of health service facility beds, or dialysis stations in kidney disease treatment centers, including freestanding dialysis units.
- (5a) "Chemical dependency treatment facility" means a public or private facility, or unit in a facility, which is engaged in providing 24-hour a day treatment for chemical dependency or substance abuse. This treatment may include detoxification, administration of a therapeutic regimen for the treatment of chemically dependent or substance abusing persons and related services. The facility or unit may be:
- a. A unit within a general hospital or an attached or freestanding unit of a general hospital licensed under Article 5, Chapter 131E, of the General Statutes,
  - b. A unit within a psychiatric hospital or an attached or freestanding unit of a psychiatric hospital licensed under Article 1A of General Statutes Chapter 122 or Article 2 of General Statutes Chapter 122C,
  - c. A freestanding facility specializing in treatment of persons who are substance abusers or chemically dependent licensed under Article 1A of General Statutes Chapter 122 or Article 2 of General Statutes Chapter 122C; and may be identified as "chemical dependency, substance abuse, alcoholism, or drug abuse treatment units," "residential chemical dependency, substance abuse, alcoholism or drug abuse facilities," or by other names if the purpose is to provide treatment of chemically dependent or substance abusing persons, but shall not include social setting detoxification facilities, medical detoxification facilities, halfway houses or recovery farms.
- (5b) "Chemical dependency treatment beds" means beds that are licensed for the inpatient treatment of chemical dependency. Residential treatment beds for the treatment of chemical dependency or substance abuse are chemical dependency treatment beds. Chemical dependency treatment beds shall not include beds licensed for detoxification.
- (6) "Department" means the North Carolina Department of Health and Human Services.
- (7) To "develop" when used in connection with health services, means to undertake those activities which will result in the offering of institutional health service or the incurring of a financial obligation in relation to the offering of such a service.
- (7a) "Diagnostic center" means a freestanding facility, program, or provider, including but not limited to, physicians' offices, clinical laboratories, radiology centers, and mobile diagnostic programs, in which the total cost of all the medical diagnostic equipment utilized by the facility which cost ten thousand dollars (\$10,000) or more exceeds five hundred thousand dollars (\$500,000). In determining whether the medical diagnostic equipment in a diagnostic center costs more than five hundred thousand dollars (\$500,000), the costs of the equipment, studies, surveys, designs, plans, working drawings, specifications, construction, installation, and other activities essential to acquiring and making operational the equipment shall be included. The capital expenditure for the equipment shall be deemed to be the fair market value of the equipment or the cost of the equipment, whichever is greater.

- (7b) "Expedited review" means the status given to an application's review process when the applicant petitions for the review and the Department approves the request based on findings that all of the following are met:
- a. The review is not competitive.
  - b. The proposed capital expenditure is less than five million dollars (\$5,000,000).
  - c. A request for a public hearing is not received within the time frame defined in G.S. 131E-185.
  - d. The agency has not determined that a public hearing is in the public interest.
- (7c) "Gamma knife" means equipment which emits photon beams from a stationary radioactive cobalt source to treat lesions deep within the brain and is one type of stereotactic radiosurgery.
- (7d) "Gastrointestinal endoscopy room" means a room used for the performance of procedures that require the insertion of a flexible endoscope into a gastrointestinal orifice to visualize the gastrointestinal lining and adjacent organs for diagnostic or therapeutic purposes.
- (8),(9) Repealed.
- (9a) "Health service" means an organized, interrelated medical, diagnostic, therapeutic, and/or rehabilitative activity that is integral to the prevention of disease or the clinical management of a sick, injured, or disabled person. "Health service" does not include administrative and other activities that are not integral to clinical management.
- (9b) "Health service facility" means a hospital; long-term care hospital; psychiatric facility; rehabilitation facility; nursing home facility; adult care home; kidney disease treatment center, including freestanding hemodialysis units; intermediate care facility for the mentally retarded; home health agency office; chemical dependency treatment facility; diagnostic center; hospice office, hospice inpatient facility, hospice residential care facility; and ambulatory surgical facility.
- (9c) "Health service facility bed" means a bed licensed for use in a health service facility in the categories of (i) acute care beds; (ii) psychiatric beds; (iii) rehabilitation beds; (iv) nursing home beds; (v) intermediate care beds for the mentally retarded; (vi) chemical dependency treatment beds; (vii) hospice inpatient facility beds; (viii) hospice residential care facility beds; (ix) adult care home beds; and (x) long-term care hospital beds.
- (10) "Health maintenance organization (HMO)" means a public or private organization which has received its certificate of authority under Article 67 of Chapter 58 of the General Statutes and which either is a qualified health maintenance organization under Section 1310(d) of the Public Health Service Act or:
- a. Provides or otherwise makes available to enrolled participants health care services, including at least the following basic health care services: usual physician services, hospitalization, laboratory, X ray, emergency and preventive services, and out-of-area coverage;
  - b. Is compensated, except for copayments, for the provision of the basic health care services listed above to enrolled participants by a payment which is paid on a periodic basis without regard to the date the health care services are provided and which is fixed without regard to the frequency, extent, or kind of health service actually provided; and
  - c. Provides physicians' services primarily (i) directly through physicians who are either employees or partners of such organizations, or (ii) through arrangements with individual physicians or one or more groups of physicians organized on a group practice or individual practice basis.
- (10a) "Heart-lung bypass machine" means the equipment used to perform extra-corporeal circulation and oxygenation during surgical procedures.
- (11) Repealed
- (12) "Home health agency" means a private organization or public agency, whether owned or operated by one or more persons or legal entities, which furnishes or offers to furnish home health services. "Home health services" means items and services furnished to an individual by a home health agency, or by others under arrangements with such others made by the agency, on a visiting basis, and except for paragraph e. of this subdivision, in a place of temporary or permanent residence used as the individual's home as follows:

- a. Part-time or intermittent nursing care provided by or under the supervision of a registered nurse;
  - b. Physical, occupational or speech therapy;
  - c. Medical social services, home health aid [sic] services, and other therapeutic services;
  - d. Medical supplies, other than drugs and biologicals and the use of medical appliances;
  - e. Any of the foregoing items and services which are provided on an outpatient basis under arrangements made by the home health agency at a hospital or nursing home facility or rehabilitation center and the furnishing of which involves the use of equipment of such a nature that the items and services cannot readily be made available to the individual in his home, or which are furnished at such facility while he is there to receive any such item or service, but not including transportation of the individual in connection with any such item or service.
- (13) "Hospital" means a public or private institution which is primarily engaged in providing to inpatients, by or under supervision of physicians, diagnostic services and therapeutic services for medical diagnosis, treatment, and care of injured, disabled, or sick persons, or rehabilitation services for the rehabilitation of injured, disabled, or sick persons. The term includes all facilities licensed pursuant to G.S. 131E-77 of the General Statutes, except long-term care hospitals.
- (13a) "Hospice" means any coordinated program of home care with provision for inpatient care for terminally ill patients and their families. This care is provided by a medically directed interdisciplinary team, directly or through an agreement under the direction of an identifiable hospice administration. A hospice program of care provides palliative and supportive medical and other health services to meet the physical, psychological, social, spiritual and special needs of patients and their families, which are experienced during the final stages of terminal illness and during dying and bereavement.
- (13b) "Hospice inpatient facility" means a freestanding licensed hospice facility or a designated inpatient unit in an existing health service facility which provides palliative and supportive medical and other health services to meet the physical, psychological, social, spiritual, and special needs of terminally ill patients and their families in an inpatient setting. For purposes of this Article only, a hospital which has a contractual agreement with a licensed hospice to provide inpatient services to a hospice patient as defined in G.S. 131E-201(4) and provides those services in a licensed acute care bed is not a hospice inpatient facility and is not subject to the requirements in G.S. 131E-176(5)(ii) for hospice inpatient beds.
- (13c) "Hospice residential care facility" means a freestanding licensed hospice facility which provides palliative and supportive medical and other health services to meet the physical, psychological, social, spiritual, and special needs of terminally ill patients and their families in a group residential setting.
- (14) Repealed.
- (14a) "Intermediate care facility for the mentally retarded" means facilities licensed pursuant to Article 2 of Chapter 122C of the General Statutes for the purpose of providing health and habilitative services based on the developmental model and principles of normalization for persons with mental retardation, autism, cerebral palsy, epilepsy or related conditions.
- (14b) Repealed.
- (14c) Reserved for future codification.
- (14d) Repealed.
- (14e) "Kidney disease treatment center" means a facility that is certified as an end-stage renal disease facility by the Centers for Medicare and Medicaid Services, Department of Health and Human Services, pursuant to 42 C.F.R. § 405.
- (14f) "Legacy Medical Care Facility" means a facility that meets all of the following requirements:
- a. Is not presently operating.
  - b. Has not continuously operated for at least the past six months.
  - c. Within the last 24 months:
    - 1. Was operated by a person holding a license under G.S. 131E-77; and

2. Was primarily engaged in providing to inpatients or outpatients, by or under supervision of physicians, (i) diagnostic services and therapeutic services for medical diagnosis, treatment, and care of injured, disabled, or sick persons or (ii) rehabilitation services for the rehabilitation of injured, disabled, or sick persons.
- (14g) "Linear accelerator" means a machine used to produce ionizing radiation in excess of 1,000,000 electron volts in the form of a beam of electrons or photons to treat cancer patients.
- (14h) Reserved for future codification.
- (14i) "Lithotripter" means extra-corporeal shock wave technology used to treat persons with kidney stones and gallstones.
- (14j) Reserved for future codification.
- (14k) "Long-term care hospital" means a hospital that has been classified and designated as a long-term care hospital by the Centers for Medicare and Medicaid Services, Department of Health and Human Services, pursuant to 42 C.F.R. § 412.
- (14l) Reserved for future codification.
- (14m) "Magnetic resonance imaging scanner" means medical imaging equipment that uses nuclear magnetic resonance.
- (14n) "Main campus" means all of the following for the purposes of G.S. 131E-184(f) and (g) only:
- a. The site of the main building from which a licensed health service facility provides clinical patient services and exercises financial and administrative control over the entire facility, including the buildings and grounds adjacent to that main building.
  - b. Other areas and structures that are not strictly contiguous to the main building but are located within 250 yards of the main building.
- (14o) "Major medical equipment" means a single unit or single system of components with related functions which is used to provide medical and other health services and which costs more than seven hundred fifty thousand dollars (\$750,000). In determining whether the major medical equipment costs more than seven hundred fifty thousand dollars (\$750,000), the costs of the equipment, studies, surveys, designs, plans, working drawings, specifications, construction, installation, and other activities essential to acquiring and making operational the major medical equipment shall be included. The capital expenditure for the equipment shall be deemed to be the fair market value of the equipment or the cost of the equipment, whichever is greater. Major medical equipment does not include replacement equipment as defined in this section.
- (15) Repealed.
- (15a) "Multispecialty ambulatory surgical program" means a formal program for providing on a same-day basis surgical procedures for at least three of the following specialty areas: gynecology, otolaryngology, plastic surgery, general surgery, ophthalmology, orthopedic, or oral surgery.
- (15b) "Neonatal intensive care services" means those services provided by a health service facility to high-risk newborn infants who require constant nursing care, including but not limited to continuous cardiopulmonary and other supportive care.
- (16) "New institutional health services" means any of the following:
- a. The construction, development, or other establishment of a new health service facility.
  - b. Except as otherwise provided in G.S. 131E-184(e), the obligation by any person of a capital expenditure exceeding two million dollars (\$2,000,000) to develop or expand a health service or a health service facility, or which relates to the provision of a health service. The cost of any studies, surveys, designs, plans, working drawings, specifications, and other activities, including staff effort and consulting and other services, essential to the acquisition, improvement, expansion, or replacement of any plant or equipment with respect to which an expenditure is made shall be included in determining if the expenditure exceeds two million dollars (\$2,000,000).
  - c. Any change in bed capacity as defined in G.S. 131E-176(5).
  - d. The offering of dialysis services or home health services by or on behalf of a health service facility if those services were not offered within the previous 12 months by or on behalf of the facility.

- e. A change in a project that was subject to certificate of need review and for which a certificate of need was issued, if the change is proposed during the development of the project or within one year after the project was completed. For purposes of this subdivision, a change in a project is a change of more than fifteen percent (15%) of the approved capital expenditure amount or the addition of a health service that is to be located in the facility, or portion thereof, that was constructed or developed in the project.
- f. The development or offering of a health service as listed in this subdivision by or on behalf of any person:
  - 1. Bone marrow transplantation services.
  - 2. Burn intensive care services.
  - 2a. Cardiac catheterization services, except cardiac catheterization services provided on equipment furnished by a person authorized to operate such equipment in North Carolina pursuant to either a certificate of need issued for mobile cardiac catheterization equipment or a settlement agreement executed by the Department for provision of cardiac catheterization services.
  - 3. Neonatal intensive care services.
  - 4. Open-heart surgery services.
  - 5. Solid organ transplantation services.
- f1. The acquisition by purchase, donation, lease, transfer, or comparable arrangement of any of the following equipment by or on behalf of any person:
  - 1. Air ambulance.<sup>1</sup>
  - 2. Repealed.
  - 3. Cardiac catheterization equipment.
  - 4. Gamma knife.
  - 5. Heart-lung bypass machine.
  - 5a. Linear accelerator.
  - 6. Lithotripter.
  - 7. Magnetic resonance imaging scanner.
  - 8. Positron emission tomography scanner.
  - 9. Simulator.
- g.to k. Repealed.
- l. The purchase, lease, or acquisition of any health service facility, or portion thereof, or a controlling interest in the health service facility or portion thereof, if the health service facility was developed under a certificate of need issued pursuant to G.S. 131E-180.
- m. Any conversion of nonhealth service facility beds to health service facility beds.
- n. The construction, development or other establishment of a hospice, hospice inpatient facility, or hospice residential care facility;
- o. The opening of an additional office by an existing home health agency **or** hospice within its service area as defined by rules adopted by the Department; or the opening of any office by an existing home health agency or hospice outside its service area as defined by rules adopted by the Department.
- p. The acquisition by purchase, donation, lease, transfer, or comparable arrangement by any person of major medical equipment.
- q. The relocation of a health service facility from one service area to another.
- r. The conversion of a specialty ambulatory surgical program to a multispecialty ambulatory surgical program or the addition of a specialty to a specialty ambulatory surgical program.
- s. The furnishing of mobile medical equipment to any person to provide health services in North Carolina, which was not in use in North Carolina prior to the adoption of this provision, if such equipment would otherwise be subject to review in accordance with G.S. 131E-176(16)(f1.) or G.S. 131E-176(16)(p) if it had been acquired in North Carolina.

<sup>1</sup> Pursuant to an Order of Permanent Injunction issued by the United States District Court for the Eastern District of North Carolina Western Division on October 15, 2008, the North Carolina Department of Health and Human Services is prohibited from requiring that any person obtain a certificate of need before acquiring an air ambulance.

- t. Repealed.
  - u. The construction, development, establishment, increase in the number, or relocation of an operating room or gastrointestinal endoscopy room in a licensed health service facility, other than the relocation of an operating room or gastrointestinal endoscopy room within the same building or on the same grounds or to grounds not separated by more than a public right-of-way adjacent to the grounds where the operating room is or gastrointestinal endoscopy room is currently located.
  - v. The change in designation, in a licensed health service facility, of an operating room to a gastrointestinal endoscopy room or change in designation of a gastrointestinal endoscopy room to an operating room that results in a different number of each type of room than is reflected on the health service facility's license in effect as of January 1, 2005.
- (17) "North Carolina State Health Coordinating Council" means the Council that prepares, with the Department of Health and Human Services, the State Medical Facilities Plan.
- (17a) "Nursing care" means:
- a. Skilled nursing care and related services for residents who require medical or nursing care;
  - b. Rehabilitation services for the rehabilitation of injured, disabled, or sick persons; or
  - c. Health-related care and services provided on a regular basis to individuals who because of their mental or physical condition require care and services above the level of room and board, which can be made available to them only through institutional facilities.
- These are services which are not primarily for the care and treatment of mental diseases.
- (17b) "Nursing home facility" means a health service facility whose bed complement of health service facility beds is composed principally of nursing home facility beds.
- (18) To "offer," when used in connection with health services, means that the person holds himself out as capable of providing, or as having the means for the provision of, specified health services.
- (18a) Repealed. 8-26-05
- (18b) "Open-heart surgery services" means the provision of surgical procedures that utilize a heart-lung bypass machine during surgery to correct cardiac and coronary artery disease or defects.
- (18c) "Operating room" means a room used for the performance of surgical procedures requiring one or more incisions and that is required to comply with all applicable licensure codes and standards for an operating room.
- (19) "Person" means an individual, a trust or estate, a partnership, a corporation, including associations, joint stock companies, and insurance companies; the State, or a political subdivision or agency or instrumentality of the State.
- (19a) "Positron emission tomography scanner" means equipment that utilizes a computerized radiographic technique that employs radioactive substances to examine the metabolic activity of various body structures.
- (20) "Project" or "capital expenditure project" means a proposal to undertake a capital expenditure that results in the offering of a new institutional health service as defined by this Article. A project, or capital expenditure project, or proposed project may refer to the project from its earliest planning stages up through the point at which the specified new institutional health service may be offered. In the case of facility construction, the point at which the new institutional health service may be offered must take place after the facility is capable of being fully licensed and operated for its intended use, and at that time it shall be considered a health service facility.
- (21) "Psychiatric facility" means a public or private facility licensed pursuant to Article 2 of Chapter 122C of the General Statutes and which is primarily engaged in providing to inpatients, by or under the supervision of a physician, psychiatric services for the diagnosis and treatment of mentally ill persons.
- (22) "Rehabilitation facility" means a public or private inpatient facility which is operated for the primary purpose of assisting in the rehabilitation of disabled persons through an integrated program of medical and other services which are provided under competent, professional supervision.
- (22a) "Replacement equipment" means equipment that costs less than two million dollars (\$2,000,000) and is purchased for the sole purpose of replacing comparable medical equipment currently in use which will be sold or otherwise disposed of when replaced. In determining whether the replacement

equipment costs less than two million dollars (\$2,000,000), the costs of equipment, studies, surveys, designs, plans, working drawings, specifications, construction, installation, and other activities essential to acquiring and making operational the replacement equipment shall be included. The capital expenditure for the equipment shall be deemed to be the fair market value of the equipment or the cost of the equipment, whichever is greater.

- (23) Repealed.
- (24) Repealed.
- (24a) "Service area" means the area of the State, as defined in the State Medical Facilities Plan or in rules adopted by the Department, which receives services from a health service facility.
- (24b) "Simulator" means a machine that produces high quality diagnostic radiographs and precisely reproduces the geometric relationships of megavoltage radiation therapy equipment to the patient.
- (24c) Reserved for future codification.
- (24d) "Solid organ transplantation services" means the provision of surgical procedures and the interrelated medical services that accompany the surgery to remove an organ from a patient and surgically implant an organ from a donor.
- (24e) Reserved for future codification.
- (24f) "Specialty ambulatory surgical program" means a formal program for providing on a same-day basis surgical procedures for only the specialty areas identified on the ambulatory surgical facility's 1993 Application for Licensure as an Ambulatory Surgical Center and authorized by its certificate of need.
- (25) "State Medical Facilities Plan" means the plan prepared by the Department of Health and Human Services and the North Carolina State Health Coordinating Council, and approved by the Governor. In preparing the Plan, the Department and the State Health Coordinating Council shall maintain a mailing list of persons who have requested notice of public hearings regarding the Plan. Not less than 15 days prior to a scheduled public hearing, the Department shall notify persons on its mailing list of the date, time, and location of the hearing. The Department shall hold at least one public hearing prior to the adoption of the proposed Plan and at least six public hearings after the adoption of the proposed Plan by the State Health Coordinating Council. The Council shall accept oral and written comments from the public concerning the Plan.
- (26) Repealed.
- (27) Repealed.

**§ 131E-177. Department of Health and Human Services is designated State Health Planning and Development Agency; powers and duties.**

The Department of Health and Human Services is designated as the State Health Planning and Development Agency for the State of North Carolina, and is empowered to exercise the following powers and duties:

- (1) To establish standards and criteria or plans required to carry out the provisions and purposes of this Article and to adopt rules pursuant to Chapter 150B of the General Statutes, to carry out the purposes and provisions of this Article;
- (2) Adopt, amend, and repeal such rules and regulations, consistent with the laws of this State, as may be required by the federal government for grants-in-aid for health service facilities and health planning which may be made available by the federal government. This section shall be liberally construed in order that the State and its citizens may benefit from such grants-in-aid;
- (3) Define, by rule, procedures for submission of periodic reports by persons or health service facilities subject to agency review under this Article;
- (4) Develop policy, criteria, and standards for health service facilities planning; shall conduct statewide registration and inventories of and make determinations of need for health service facilities, health services as specified in G.S. 131E-176(16)f., and equipment as specified in G.S. 131E-176(16)f1., which shall include consideration of adequate geographic location of equipment and services; and develop a State Medical Facilities Plan;
- (5) Implement, by rule, criteria for project review;

- (6) Have the power to grant, deny, or withdraw a certificate of need and to impose such sanctions as are provided for by this Article;
- (7) Solicit, accept, hold and administer on behalf of the State any grants or bequests of money, securities or property to the Department for use by the Department in the administration of this Article; and
- (8) Repealed.
- (9) Collect fees for submitting applications for certificates of need.
- (10) The authority to review all records in any recording medium of any person or health service facility subject to agency review under this Article which pertain to construction and acquisition activities, staffing or costs and charges for patient care, including but not limited to, construction contracts, architectural contracts, consultant contracts, purchase orders, cancelled checks, accounting and financial records, debt instruments, loan and security agreements, staffing records, utilization statistics and any other records the Department deems to be reasonably necessary to determine compliance with this Article.

The Secretary of Health and Human Services shall have final decision-making authority with regard to all functions described in this section.

**§ 131E-178. Activities requiring certificate of need.**

- (a) No person shall offer or develop a new institutional health service without first obtaining a certificate of need from the Department; provided, however, no person who provides gastrointestinal endoscopy procedures in one or more gastrointestinal endoscopy rooms located in a nonlicensed setting, shall be required to obtain a certificate of need to license that setting as an ambulatory surgical facility with the existing number of gastrointestinal endoscopy rooms, provided that:
  - (1) The license application is postmarked for delivery to the Division of Health Service Regulation by December 31, 2006;
  - (2) The applicant verifies, by affidavit submitted to the Division of Health Service Regulation within 60 days of the effective date of this act, that the facility is in operation as of the effective date of this act or that the completed application for the building permit for the facility was submitted by the effective date of this act;
  - (3) The facility has been accredited by The Accreditation Association for Ambulatory Health Care, The Joint Commission on Accreditation of Healthcare Organizations, or The American Association for Accreditation of Ambulatory Surgical Facilities by the time the license application is postmarked for delivery to the Division of Health Service Regulation of the Department; and
  - (4) The license application includes a commitment and plan for serving indigent and medically underserved populations.

All other persons proposing to obtain a license to establish an ambulatory surgical facility for the provision of gastrointestinal endoscopy procedures shall be required to obtain a certificate of need. The annual State Medical Facilities Plan shall not include policies or need determinations that limit the number of gastrointestinal endoscopy rooms that may be approved.

- (b) No person shall make an acquisition by donation, lease, transfer, or comparable arrangement without first obtaining a certificate of need from the Department, if the acquisition would have been a new institutional health service if it had been made by purchase. In determining whether an acquisition would have been a new institutional health service, the capital expenditure for the asset shall be deemed to be the fair market value of the asset or the cost of the asset, whichever is greater.
- (c) No person shall incur an obligation for a capital expenditure which is a new institutional health service without first obtaining a certificate of need from the Department. An obligation for a capital expenditure is incurred when:
  - (1) An enforceable contract, excepting contracts which are expressly contingent upon issuance of a certificate of need, is entered into by a person for the construction, acquisition, lease or financing of a capital asset;

- (2) A person takes formal action to commit funds for a construction project undertaken as his own contractor; or
- (3) In the case of donated property, the date on which the gift is completed.
- (d) Where the estimated cost of a proposed capital expenditure, including the fair market value of equipment acquired by purchase, lease, transfer, or other comparable arrangement, is certified by a licensed architect or engineer to be equal to or less than the expenditure minimum for capital expenditure for new institutional health services, such expenditure shall be deemed not to exceed the amount for new institutional health services regardless of the actual amount expended, provided that the following conditions are met:
  - (1) The certified estimated cost is prepared in writing 60 days or more before the obligation for the capital expenditure is incurred. Certified cost estimates shall be available for inspection at the facility and sent to the Department upon its request.
  - (2) The facility on whose behalf the expenditure was made notifies the Department in writing within 30 days of the date on which such expenditure is made if the expenditure exceeds the expenditure minimum for capital expenditures. The notice shall include a copy of the certified cost estimate.
- (e) The Department may grant certificates of need which permit capital expenditures only for predevelopment activities. Predevelopment activities include the preparation of architectural designs, plans, working drawings, or specifications, the preparation of studies and surveys, and the acquisition of a potential site.

**§ 131E-179. Research activities.**

- (a) Notwithstanding any other provisions of this Article, a health service facility may offer new institutional health services to be used solely for research, or incur the obligation of a capital expenditure solely for research, without a certificate of need, if the Department grants an exemption. The Department shall grant an exemption if the health service facility files a notice of intent with the Department in accordance with rules promulgated by the Department and if the Department finds that the offering or obligation will not:
  - (1) Affect the charges of the health service facility for the provision of medical or other patient care services other than services which are included in the research;
  - (2) Substantially change the bed capacity of the facility; or
  - (3) Substantially change the medical or other patient care services of the facility.
- (b) After a health service facility has received an exemption pursuant to subsection (a) of this section, it shall not offer the new institutional health services, or use a facility acquired through the capital expenditure, in a manner which affects the charges of the facility for the provision of medical or other patient care services, other than the services which are included in the research and shall not charge patients for the use of the service for which an exemption has been granted, without first obtaining a certificate of need from the Department; provided, however, that any facility or service acquired or developed under the exemption provided by this section shall not be subject to the foregoing restrictions on its use if the facility or service could otherwise be offered or developed without a certificate of need.
- (c) Any of the activities described in subsection (a) of this section shall be deemed to be solely for research even if they include patient care provided on an occasional and irregular basis and not as a part of the research program.

**§ 131E-180. Repealed. 8-26-05**

**§ 131E-181. Nature of certificate of need.**

- (a) A certificate of need shall be valid only for the defined scope, physical location, and person named in the application. A certificate of need shall not be transferred or assigned except as provided in G.S. 131E-189(c).

- (b) A recipient of a certificate of need, or any person who may subsequently acquire, in any manner whatsoever permitted by law, the service for which that certificate of need was issued, is required to materially comply with the representations made in its application for that certificate of need. The Department shall require any recipient of a certificate of need, or its successor, whose service is in operation to submit to the Department evidence that the recipient, or its successor, is in material compliance with the representations made in its application for the certificate of need which granted the recipient the right to operate that service. In determining whether the recipient of a certificate of need, or its successor, is operating a service which materially differs from the representations made in its application for that certificate of need, the Department shall consider cost increases to the recipient, or its successor, including, but not limited to, the following:
  - (1) Any increase in the consumer price index;
  - (2) Any increased cost incurred because of Government requirements, including federal, State, or any political subdivision thereof; and
  - (3) Any increase in cost due to professional fees or the purchase of services and supplies.
- (c) Whenever a certificate of need is issued more than 12 months after the application for the certificate of need began review, the Department shall adjust the capital expenditure amount proposed by increasing it to reflect any inflation in the Department of Commerce's Construction Cost Index that has occurred since the date when the application began review; and the Department shall use this recalculated capital expenditure amount in the certificate of need issued for the project.
- (d) A project authorized by a certificate of need is complete when the health service or the health service facility for which the certificate of need was issued is licensed and certified and is in material compliance with the representations made in the certificate of need application.

**§ 131E-182. Application.**

- (a) The Department in its rules shall establish schedules for submission and review of completed applications. The schedules shall provide that applications for similar proposals in the same service area will be reviewed together. However, there shall not be a review schedule prior to February 1, 2006, for submission and review of certificate of need applications that propose an increase in the number of licensed gastrointestinal endoscopy rooms. An applicant for a certificate of need to establish a licensed gastrointestinal endoscopy room shall show that it is performing or reasonably projects to perform at least 1,500 gastrointestinal endoscopy procedures per gastrointestinal endoscopy room per year.
- (b) An application for a certificate of need shall be made on forms provided by the Department. The application forms, which may vary according to the type of proposal, shall require such information as the Department, by its rules deems necessary to conduct the review. An applicant shall be required to furnish only that information necessary to determine whether the proposed new institutional health service is consistent with the review criteria implemented under G.S. 131E-183 and with duly adopted standards, plans and criteria.
- (c) An application fee is imposed on an applicant for a certificate of need. An applicant must submit the fee with the application. The fee is not refundable, regardless of whether a certificate of need is issued. Fees collected under this section shall be credited to the General Fund as nontax revenue. The application fee is five thousand dollars (\$5,000) plus an amount equal to three-tenths of one percent (.3%) of the amount of the capital expenditure proposed in the application that exceeds one million dollars (\$1,000,000). In no event may the fee exceed fifty thousand dollars (\$50,000).

**§ 131E-183. Review criteria.**

- (a) The Department shall review all applications utilizing the criteria outlined in this subsection and shall determine that an application is either consistent with or not in conflict with these criteria before a certificate of need for the proposed project shall be issued.
  - (1) The proposed project shall be consistent with applicable policies and need determinations in the State Medical Facilities Plan, the need determination of which constitutes a determinative

limitation on the provision of any health service, health service facility, health service facility beds, dialysis stations, operating rooms, or home health offices that may be approved.

- (2) Repealed.
- (3) The applicant shall identify the population to be served by the proposed project, and shall demonstrate the need that this population has for the services proposed, and the extent to which all residents of the area, and, in particular, low income persons, racial and ethnic minorities, women, handicapped persons, the elderly, and other underserved groups are likely to have access to the services proposed.
- (3a) In the case of a reduction or elimination of a service, including the relocation of a facility or a service, the applicant shall demonstrate that the needs of the population presently served will be met adequately by the proposed relocation or by alternative arrangements, and the effect of the reduction, elimination or relocation of the service on the ability of low income persons, racial and ethnic minorities, women, handicapped persons, and other underserved groups and the elderly to obtain needed health care.
- (4) Where alternative methods of meeting the needs for the proposed project exist, the applicant shall demonstrate that the least costly or most effective alternative has been proposed.
- (5) Financial and operational projections for the project shall demonstrate the availability of funds for capital and operating needs as well as the immediate and long-term financial feasibility of the proposal, based upon reasonable projections of the costs of and charges for providing health services by the person proposing the service.
- (6) The applicant shall demonstrate that the proposed project will not result in unnecessary duplication of existing or approved health service capabilities or facilities.
- (7) The applicant shall show evidence of the availability of resources, including health manpower and management personnel, for the provision of the services proposed to be provided.
- (8) The applicant shall demonstrate that the provider of the proposed services will make available, or otherwise make arrangements for, the provision of the necessary ancillary and support services. The applicant shall also demonstrate that the proposed service will be coordinated with the existing health care system.
- (9) An applicant proposing to provide a substantial portion of the project's services to individuals not residing in the health service area in which the project is located, or in adjacent health service areas, shall document the special needs and circumstances that warrant service to these individuals.
- (10) When applicable, the applicant shall show that the special needs of health maintenance organizations will be fulfilled by the project. Specifically, the applicant shall show that the project accommodates:
  - a. The needs of enrolled members and reasonably anticipated new members of the HMO for the health service to be provided by the organization; and
  - b. The availability of new health services from non-HMO providers or other HMOs in a reasonable and cost-effective manner which is consistent with the basic method of operation of the HMO. In assessing the availability of these health services from these providers, the applicant shall consider only whether the services from these providers:
    1. Would be available under a contract of at least five years' duration;
    2. Would be available and conveniently accessible through physicians and other health professionals associated with the HMO;
    3. Would cost no more than if the services were provided by the HMO; and
    4. Would be available in a manner which is administratively feasible to the HMO.
- (11) Repealed
- (12) Applications involving construction shall demonstrate that the cost, design, and means of construction proposed represent the most reasonable alternative, and that the construction project will not unduly increase the costs of providing health services by the person

proposing the construction project or the costs and charges to the public of providing health services by other persons, and that applicable energy saving features have been incorporated into the construction plans.

- (13) The applicant shall demonstrate the contribution of the proposed service in meeting the health-related needs of the elderly and of members of medically underserved groups, such as medically indigent or low income persons, Medicaid and Medicare recipients, racial and ethnic minorities, women, and handicapped persons, which have traditionally experienced difficulties in obtaining equal access to the proposed services, particularly those needs identified in the State Health Plan as deserving of priority. For the purpose of determining the extent to which the proposed service will be accessible, the applicant shall show:
  - a. The extent to which medically underserved populations currently use the applicant's existing services in comparison to the percentage of the population in the applicant's service area which is medically underserved;
  - b. Its past performance in meeting its obligation, if any, under any applicable regulations requiring provision of uncompensated care, community service, or access by minorities and handicapped persons to programs receiving federal assistance, including the existence of any civil rights access complaints against the applicant;
  - c. That the elderly and the medically underserved groups identified in this subdivision will be served by the applicant's proposed services and the extent to which each of these groups is expected to utilize the proposed services; and
  - d. That the applicant offers a range of means by which a person will have access to its services. Examples of a range of means are outpatient services, admission by house staff, and admission by personal physicians.
- (14) The applicant shall demonstrate that the proposed health services accommodate the clinical needs of health professional training programs in the area, as applicable.
- (15) through (18) Repealed.
- (18a) The applicant shall demonstrate the expected effects of the proposed services on competition in the proposed service area, including how any enhanced competition will have a positive impact upon the cost effectiveness, quality, and access to the services proposed; and in the case of applications for services where competition between providers will not have a favorable impact on cost effectiveness, quality, and access to the services proposed, the applicant shall demonstrate that its application is for a service on which competition will not have a favorable impact.
- (19) Repealed.
- (20) An applicant already involved in the provision of health services shall provide evidence that quality care has been provided in the past.
- (21) Repealed.
- (b) The Department is authorized to adopt rules for the review of particular types of applications that will be used in addition to those criteria outlined in subsection (a) of this section and may vary according to the purpose for which a particular review is being conducted or the type of health service reviewed. No such rule adopted by the Department shall require an academic medical center teaching hospital, as defined by the State Medical Facilities Plan, to demonstrate that any facility or service at another hospital is being appropriately utilized in order for that academic medical center teaching hospital to be approved for the issuance of a certificate of need to develop any similar facility or service.
- (c) Repealed.

**§ 131E-184. Exemptions from review.**

- (a) Except as provided in subsection (b), the Department shall exempt from certificate of need review a new institutional health service if it receives prior written notice from the entity proposing the new

institutional health service, which notice includes an explanation of why the new institutional health service is required, for any of the following:

- (1) To eliminate or prevent imminent safety hazards as defined in federal, State, or local fire, building, or life safety codes or regulations.
  - (1a) To comply with State licensure standards.
  - (1b) To comply with accreditation or certification standards which must be met to receive reimbursement under Title XVIII of the Social Security Act or payments under a State plan for medical assistance approved under Title XIX of that act.
  - (2) Repealed.
  - (3) To provide data processing equipment.
  - (4) To provide parking, heating or cooling systems, elevators, or other basic plant or mechanical improvements, unless these activities are integral portions of a project that involves the construction of a new health service facility or portion thereof and that is subject to certificate of need review.
  - (5) To replace or repair facilities destroyed or damaged by accident or natural disaster.
  - (6) To provide any nonhealth service facility or service.
  - (7) To provide replacement equipment.
  - (8) To acquire an existing health service facility, including equipment owned by the health service facility at the time of acquisition. A facility not currently licensed as an adult care home that was licensed as an adult care home within the preceding 12 months is considered an existing health service facility for the purposes of this subdivision.
  - (9) To develop or acquire a physician office building regardless of cost, unless a new institutional health service other than defined in G.S. 131E-176(16)b. is offered or developed in the building.
- (b) Those portions of a proposed project which are not proposed for one or more of the purposes under subsection (a) of this section are subject to certificate of need review, if these non-exempt portions of the project are new institutional health services under G.S. 131E-176(16).
- (c) The Department shall exempt from certificate of need review any conversion of existing acute care beds to psychiatric beds provided:
- (1) The hospital proposing the conversion has executed a contract with the Department's Division of Mental Health, Developmental Disabilities, and Substance Abuse Services and/or one or more of the Area Mental Health, Developmental Disabilities, and Substance Abuse Authorities to provide psychiatric beds to patients referred by the contracting agency or agencies; and
  - (2) The total number of beds to be converted shall not be more than twice the number of beds for which the contract pursuant to subdivision (1) of this subsection shall provide.
- (d) In accordance with, and subject to the limitations of G.S. 148-19.1, the Department shall exempt from certificate of need review the construction and operation of a new chemical dependency or substance abuse facility for the purpose of providing inpatient chemical dependency or substance abuse services solely to inmates of the Department of Correction. If an inpatient chemical dependency or substance abuse facility provides services both to inmates of the Department of Correction and to members of the general public, only the portion of the facility that serves inmates shall be exempt from certificate of need review.
- (e) The Department shall exempt from certificate of need review a capital expenditure that exceeds the two million dollar (\$2,000,000) threshold set forth in G.S. 131E-176(16)b. if all of the following conditions are met:
- (1) The proposed capital expenditure would:
    - a. Be used solely for the purpose of renovating, replacing on the same site, or expanding an existing:
      1. Nursing home facility,
      2. Adult care home facility, or
      3. Intermediate care facility for the mentally retarded; and

- b. Not result in a change in bed capacity, as defined in G.S. 131E-176(5), or the addition of a health service facility or any other new institutional health service other than that allowed in G.S. 131E-176(16)b.
  - (2) The entity proposing to incur the capital expenditure provides prior written notice to the Department, which notice includes documentation that demonstrates that the proposed capital expenditure would be used for one or more of the following purposes:
    - a. Conversion of semiprivate resident rooms to private rooms.
    - b. Providing innovative, homelike residential dining spaces, such as cafes, kitchenettes, or private dining areas to accommodate residents and their families or visitors.
    - c. Renovating, replacing, or expanding residential living or common areas to improve the quality of life of residents.
- (f) The Department shall exempt from certificate of need review the purchase of any replacement equipment that exceeds the two million dollar (\$2,000,000) threshold set forth in G.S. 131E-176(22a) if all of the following conditions are met:
  - (1) The equipment being replaced is located on the main campus.
  - (2) The Department has previously issued a certificate of need for the equipment being replaced. This subdivision does not apply if a certificate of need was not required at the time the equipment being replaced was initially purchased by the licensed health service facility.
  - (3) The licensed health service facility proposing to purchase the replacement equipment shall provide prior written notice to the Department, along with supporting documentation to demonstrate that it meets the exemption criteria of this subsection.
- (g) The Department shall exempt from certificate of need review any capital expenditure that exceeds the two million dollar (\$2,000,000) threshold set forth in G.S. 131E-176(16)b. if all of the following conditions are met:
  - (1) The sole purpose of the capital expenditure is to renovate, replace on the same site, or expand the entirety or a portion of an existing health service facility that is located on the main campus.
  - (2) The capital expenditure does not result in (i) a change in bed capacity as defined in G.S. 131E-176(5) or (ii) the addition of a health service facility or any other new institutional health service other than that allowed in G.S. 131E-176(16)b.
  - (3) The licensed health service facility proposing to incur the capital expenditure shall provide prior written notice to the Department, along with supporting documentation to demonstrate that it meets the exemption criteria of this subsection.
- (h) The Department shall exempt from certificate of need review the acquisition or reopening of a Legacy Medical Care Facility. The person seeking to operate a Legacy Medical Care Facility shall give the Department written notice of all of the following:
  - (1) Its intention to acquire or reopen a Legacy Medical Care Facility within the same county and the same service area as the facility that ceased continuous operations. If the Legacy Medical Facility will become operational in a new location within the same county and the same service area as the facility that ceased continuous operations, then the person responsible for giving the written notice required by this section shall notify the Department, as soon as reasonably practicable and prior to becoming operational, of the new location of the Legacy Medical Care Facility. For purposes of this subdivision, "service area" means the service area identified in the North Carolina State Medical Facilities Plan in effect at the time the written notice required by this section is given to the Department.
  - (2) That the facility will be operational within 36 months of the notice.
 

The Department shall extend the time by which a facility must be operational in order to be exempt from certificate of need review under this subsection by one additional 36-month period if the person seeking to reopen or acquire the Legacy Medical Care Facility gives the Department written notice of extension within 36 months of the original notice of intent to acquire or reopen the Legacy Medical Care Facility. The written notice of extension must notify the Department

    - (i) that the person has undertaken all reasonable efforts to make the facility operational

- (ii) within 36 months of the notice of intent, that, despite these reasonable efforts, the person does not anticipate the facility will be operational within that time, and
- (iii) of its intention that the facility will be operational within 36 months of the notice of extension.

**§ 131E-185. Review process.**

- (a) Repealed.
- (a1) Except as provided in subsection (c) of this section, there shall be a time limit of 90 days for review of the applications, beginning on the day established by rule as the day on which applications for the particular service in the service area shall begin review.
  - (1) Any person may file written comments and exhibits concerning a proposal under review with the Department, not later than 30 days after the date on which the application begins review. These written comments may include:
    - a. Facts relating to the service area proposed in the application;
    - b. Facts relating to the representations made by the applicant in its application, and its ability to perform or fulfill the representations made;
    - c. Discussion and argument regarding whether, in light of the material contained in the application and other relevant factual material, the application complies with relevant review criteria, plans, and standards.
  - (2) No more than 20 days from the conclusion of the written comment period, the Department shall ensure that a public hearing is conducted at a place within the appropriate service area if one or more of the following circumstances apply; the review to be conducted is competitive; the proponent proposes to spend five million dollars (\$5,000,000) or more; a written request for a public hearing is received before the end of the written comment period from an affected party as defined in G.S. 131E-188(c); or the agency determines that a hearing is in the public interest. At such public hearing oral arguments may be made regarding the application or applications under review; and this public hearing shall include the following:
    - a. An opportunity for the proponent of each application under review to respond to the written comments submitted to the Department about its application;
    - b. An opportunity for any person, except one of the proponents, to comment on the applications under review;
    - c. An opportunity for a representative of the Department, or such other person or persons who are designated by the Department to conduct the hearing, to question each proponent of applications under review with regard to the contents of the application;The Department shall maintain a recording of any required public hearing on an application until such time as the Department's final decision is issued, or until a final agency decision is issued pursuant to a contested case hearing, whichever is later; and any person may submit a written synopsis or verbatim statement that contains the oral presentation made at the hearing.
  - (3) The Department may contract or make arrangements with a person or persons located within each service area for the conduct of such public hearings as may be necessary. The Department shall publish, in each service area, notice of the contracts that it executes for the conduct of those hearings.
  - (4) Within 15 days from the beginning of the review of an application or applications proposing the same service within the same service area, the Department shall publish notice of the deadline for receipt of written comments, of the time and place scheduled for the public hearing regarding the application or applications under review, and of the name and address of the person or agency that will preside.

- (5) The Department shall maintain all written comments submitted to it during the written comment stage and any written submissions received at the public hearing as part of the Department's file respecting each application or group of applications under review by it. The application, written comments, and public hearing comments, together with all documents that the Department used in arriving at its decision, from whatever source, and any documents that reflect or set out the Department's final analysis of the application or applications under review, shall constitute the Department's record for the application or applications under review.
- (a2) When an expedited review has been approved by the Department, no public hearing shall be held. The Department may contact the applicant and request additional or clarifying information, amendments to, or substitutions for portions of the application. The Department may negotiate conditions to be imposed on the certificate of need with the applicant.
- (b) Repealed.
- (c) The Department may extend the review period for a period not to exceed 60 days and provide notice of such extension to all applicants. For expedited reviews, the Department may extend the review period only if it has requested additional substantive information from the applicant.

**§ 131E-186. Decision.**

- (a) Within the prescribed time limits in G.S. 131E-185, the Department shall issue a decision to "approve," "approve with conditions," or "deny," an application for a new institutional health service. Approvals involving new or expanded nursing care or intermediate care for the mentally retarded bed capacity shall include a condition that specifies the earliest possible date the new institutional health service may be certified for participation in the Medicaid program. The date shall be set far enough in advance to allow the Department to identify funds to pay for care in the new or expanded facility in its existing Medicaid budget or to include these funds in its State Medicaid budget request for the year in which Medicaid certification is expected.
- (b) Within five business days after it makes a decision on an application, the Department shall provide written notice of all the findings and conclusions upon which it based its decision, including the criteria used by the Department in making its decision, to the applicant.

**§ 131E-187. Issuance of a certificate of need.**

- (a) Deleted. See Session Law 2009-373; SB 804.
- (b) Deleted. See Session Law 2009-373; SB 804.
- (c) The Department shall issue a certificate of need in accordance with the time line requirements of this section but only after all applicable conditions of approval that can be satisfied before issuance of the certificate of need have been met. The Department shall issue a certificate of need within:
  - (1) Thirty-five days of the date of the decision referenced in G.S. 131E-186, when no request for a contested case hearing has been filed in accordance with G.S. 131E-188.
  - (2) Five business days after it receives a file-stamped copy of the notice of voluntary dismissal, unless the voluntary dismissal is a stipulation of dismissal without prejudice.
  - (3) Thirty-five days of the date of the written notice of the final agency decision affirming or approving the issuance, unless a notice of appeal to the North Carolina Court of Appeals is timely filed.
  - (4) Twenty days after a mandate is issued by the North Carolina Court of Appeals affirming the issuance of a certificate of need, unless a notice of appeal or petition for discretionary review to the North Carolina Supreme Court is timely filed.
  - (5) Five business days after the North Carolina Supreme Court issues a mandate affirming the issuance of a certificate of need or an order declining to certify the case for discretionary review if the order declining to certify the case disposes of the appeal in its entirety.

**§ 131E-188. Administrative and judicial review.**

- (a) After a decision of the Department to issue, deny or withdraw a certificate of need or exemption or to issue a certificate of need pursuant to a settlement agreement with an applicant to the extent permitted by law, any affected person, as defined in subsection (c) of this section, shall be entitled to a contested case hearing under Article 3 of Chapter 150B of the General Statutes. A petition for a contested case shall be filed within 30 days after the Department makes its decision. When a petition is filed, the Department shall send notification of the petition to the proponent of each application that was reviewed with the application for a certificate of need that is the subject of the petition. Any affected person shall be entitled to intervene in a contested case.

A contested case shall be conducted in accordance with the following timetable:

- (1) An administrative law judge or a hearing officer, as appropriate, shall be assigned within 15 days after a petition is filed.
- (2) The parties shall complete discovery within 90 days after the assignment of the administrative law judge or hearing officer.
- (3) The hearing at which sworn testimony is taken and evidence is presented shall be held within 45 days after the end of the discovery period.
- (4) The administrative law judge or hearing officer shall make a final decision within 75 days after the hearing.

The administrative law judge or hearing officer assigned to a case may extend the deadlines in subdivisions (2) through (4) so long as the administrative law judge or hearing officer makes a final decision in the case within 270 days after the petition is filed.

- (a1) On or before the date of filing a petition for a contested case hearing on the approval of an applicant for a certificate of need, the petitioner shall deposit a bond with the clerk of superior court where the new institutional health service that is the subject of the petition is proposed to be located. The bond shall be secured by cash or its equivalent in an amount equal to five percent (5%) of the cost of the proposed new institutional health service that is the subject of the petition, but may not be less than five thousand dollars (\$5,000) and may not exceed fifty thousand dollars (\$50,000). A petitioner who received approval for a certificate of need and is contesting only a condition in the certificate is not required to file a bond under this subsection.

The applicant who received approval for the new institutional health service that is the subject of the petition may bring an action against a bond filed under this subsection in the superior court of the county where the bond was filed. Upon finding that the petition for a contested case was frivolous or filed to delay the applicant, the court may award the applicant part or all of the bond filed under this subsection. At the conclusion of the contested case, if the court does not find that the petition for a contested case was frivolous or filed to delay the applicant, the petitioner shall be entitled to the return of the bond deposited with the superior court upon demonstrating to the clerk of superior court where the bond was filed that the contested case hearing is concluded.

- (b) Any affected person who was a party in a contested case hearing shall be entitled to judicial review of all or any portion of any final decision in the following manner. The appeal shall be to the Court of Appeals as provided in G.S. 7A-29(a). The procedure for the appeal shall be as provided by the rules of appellate procedure. The appeal of the final decision shall be taken within 30 days of the receipt of the written notice of final decision, and notice of appeal shall be filed with Office of Administrative Hearings and served on the Department and all other affected persons who were parties to the contested hearing.

- (b1) Before filing an appeal of a final decision granting a certificate of need, the affected person shall deposit a bond with the Clerk of the Court of Appeals. The bond requirements of this subsection shall not apply to any appeal filed by the Department.

- (1) The bond shall be secured by cash or its equivalent in an amount equal to five percent (5%) of the cost of the proposed new institutional health service that is the subject of the appeal, but may not be less than five thousand dollars (\$5,000) and may not exceed fifty thousand dollars (\$50,000); provided that the applicant who received approval of the certificate of need may petition the Court of Appeals for a higher bond amount for the payment of such

costs and damages as may be awarded pursuant to subdivision (2) of this subsection. This amount shall be determined by the Court in its discretion, not to exceed three hundred thousand dollars (\$300,000). A holder of a certificate of need who is appealing only a condition in the certificate is not required to file a bond under this subsection.

- (2) If the Court of Appeals finds that the appeal was frivolous or filed to delay the applicant, the court shall remand the case to the superior court of the county where a bond was filed for the contested case hearing on the certificate of need. The superior court may award the holder of the certificate of need part or all of the bond. The court shall award the holder of the certificate of need reasonable attorney fees and costs incurred in the appeal to the Court of Appeals. If the Court of Appeals does not find that the appeal was frivolous or filed to delay the applicant and does not remand the case to superior court for a possible award of all or part of the bond to the holder of the certificate of need, the person originally filing the bond shall be entitled to a return of the bond.
- (c) The term "affected persons" includes: the applicant; any individual residing within the service area or the geographic area served or to be served by the applicant; any individual who regularly uses health service facilities within that geographic area or the service area; any person who provides services, similar to the services under review, to individuals residing within the service area or the geographic area proposed to be served by the applicant; any person who, prior to receipt by the agency of the proposal being reviewed, has provided written notice to the agency of an intention to provide similar services in the future to individuals residing within the service area or the geographic area to be served by the applicant; third party payers who reimburse health service facilities for services in the service area in which the project is proposed to be located; and any agency which establishes rates for health service facilities or HMOs located in the service area in which the project is proposed to be located.

#### **§ 131E-189. Withdrawal of a certificate of need.**

- (a) The Department shall specify in each certificate of need the time the holder has to make the service or equipment available or to complete the project and the timetable to be followed. The timetable shall be the one proposed by the holder of the certificate of need unless the Department specifies a different timetable in its decision letter. The holder of the certificate shall submit such periodic reports on his progress in meeting the timetable as may be required by the Department. If no progress report is provided or, after reviewing the progress, the Department determines that the holder of the certificate is not meeting the timetable and the holder cannot demonstrate that it is making good faith efforts to meet the timetable, the Department may withdraw the certificate. If the Department determines that the holder of the certificate is making a good faith effort to meet the timetable, the Department may, at the request of the holder, extend the timetable for a specified period.
- (b) The Department may withdraw any certificate of need, if the holder of the certificate fails to develop the service in a manner consistent with the representations made in the application or with any condition or conditions the Department placed on the certificate of need.
- (c) The Department may immediately withdraw any certificate of need if the holder of the certificate, before completion of the project or operation of the facility, transfers ownership or control of the facility, the project, or the certificate of need. Any transfer after that time will be subject to the requirement that the service be provided consistent with the representations made in the application and any applicable conditions the Department placed on the certificate of need. Transfers resulting from death or personal illness or other good cause, as determined by the Department, shall not result in withdrawal if the Department receives prior written notice of the transfer and finds good cause. Transfers resulting from death shall not result in withdrawal.

#### **§ 131E-190. Enforcement and sanctions.**

- (a) Only those new institutional health services which are found by the Department to be needed as provided in this Article and granted certificates of need shall be offered or developed within the State.

- (b) No formal commitments made for financing, construction, or acquisition regarding the offering or development of a new institutional health service shall be made by any person unless a certificate of need for such service or activities has been granted.
- (c) Repealed.
- (d) If any person proceeds to offer or develop a new institutional health service without having first obtained a certificate of need for such services, the penalty for such violation of this Article and rules hereunder may include the withholding of federal and State funds under Titles V, XVIII, and XIX of the Social Security Act for reimbursement of capital and operating expenses related to the provision of the new institutional health service.
- (e) The Department may revoke or suspend the license of any person who proceeds to offer or develop a new institutional health service without having first obtained a certificate of need for such services.
- (f) The Department may assess a civil penalty of not more than twenty thousand dollars (\$20,000) against any person who knowingly offers or develops any new institutional health service within the meaning of this Article without a certificate of need issued under this Article and the rules pertaining thereto, or in violation of the terms or conditions of such a certificate, whenever it determines a violation has occurred and each time the service is provided in violation of this provision. In determining the amount of the penalty the Department shall consider the degree and extent of harm caused by the violation and the cost of rectifying the damage. A person who is assessed a penalty shall be notified of the penalty by registered or certified mail. The notice shall state the reasons for the penalty. If a person fails to pay a penalty, the Department shall refer the matter to the Attorney General for collection. For the purpose of this subsection, the word "person" shall not include an individual in his capacity as an officer, director, or employee of a person as otherwise defined in this Article.
- (g) No agency of the State or any of its political subdivisions may appropriate or grant funds or financially assist in any way a person, applicant, or facility which is or whose project is in violation of this Article.
- (h) If any person proceeds to offer or develop a new institutional health service without having first obtained a certificate of need for such services, the Secretary of Health and Human Services or any person aggrieved, as defined by G.S. 150B-2(6), may bring a civil action for injunctive relief, temporary or permanent, against the person offering, developing or operating any new institutional health service. The action may be brought in the superior court of any county in which the health service facility is located or in the superior court of Wake County.
- (i) If the Department determines that the recipient of a certificate of need, or its successor, is operating a service which materially differs from the representations made in its application for that certificate of need, the Department may bring an action in Wake County Superior Court or the superior court of any county in which the certificate of need is to be utilized for injunctive relief, temporary or permanent, requiring the recipient, or its successor, to materially comply with the representations in its application. The Department may also bring an action in Wake County Superior Court or the superior court of any county in which the certificate of need is to be utilized to enforce the provisions of this subsection and G.S. 131E-181(b) and the rules adopted in accordance with this subsection and G.S. 131E-181(b).

DFS ADVISORY

Title: Regulation of Detoxification Services Provided in Hospitals Licensed under Article 5, Chapter 131E, of the General Statutes

Date: October 22, 2003

Purpose

The purpose of this Advisory is to provide The Agency’s interpretation of the certificate of need requirements for acute care hospitals to develop new or expanded detoxification services and interpretation of hospital licensing requirements for beds used for detoxification services.

Background

House Bill 815, which revised Article 9, Chapter 131E, the Certificate of Need Law, was approved August 7, 2003, and excludes “social setting detoxification” and “medical detoxification” facilities from the definition of chemical treatment facilities licensed under Chapter 122C. Consequently, the Certificate of Need Law no longer regulates the development of facilities licensed as “non-hospital medical detoxification for individuals who are substance abusers” or “social setting detoxification for substance abuse.”

Policy

The change in the law did not revise the definition of a “chemical treatment facility” for detoxification units in an acute care hospital licensed under Article 5, Chapter 131E. Pursuant to enactment of House Bill 815, the Agency recently reviewed the licensure regulations for acute care hospitals and determined there is no licensure category for medical detoxification services that is separate from the licensure categories for psychiatric, substance abuse or acute care beds. In other words, medical detoxification services may be a component of licensed psychiatric, substance abuse and acute care services in acute care hospitals. Therefore, acute care hospitals may provide medical detoxification services in existing licensed psychiatric, substance abuse/chemical dependency treatment or acute care beds without a certificate of need. As a result of this interpretation, the Agency will revise current licenses for acute care hospitals to change the existing licensed medical detoxification beds to licensed chemical dependency/substance abuse treatment beds given that, to date, detoxification beds have been recognized by the Agency as one type of substance abuse bed.

In summary, if an acute care hospital wants to develop new or expanded detoxification services at this time, it may do so without a certificate of need, as long as the services are provided in an existing licensed acute care, psychiatric or substance abuse bed. However, if an acute care hospital wants to increase the bed capacity in its facility to develop or expand detoxification services, it must first obtain a certificate of need to add either licensed acute care, psychiatric or substance abuse beds for that purpose.
