10A NCAC 13K .1116 is readopted with changes as published in 35:18 NCR 2029-2039 as follows:

**APPLICATION OF PHYSICAL PLANT REQUIREMENTS**

The physical plant requirements for each hospice residential facility or unit shall be applied as follows:

1. New construction shall comply with all the requirements of Section .1100 of this Subchapter;
2. Except where otherwise specified, existing buildings shall meet the licensure and code requirements in effect at the time of licensure, construction, alteration or modification;
3. New additions, alterations, modifications, and repairs shall meet the technical requirements of Section .1100 of this Subchapter; however, where strict conformance with current requirements would be impracticable, the authority having jurisdiction may approve alternative measures where the facility can demonstrate to the Department's satisfaction that the alternative measures do not reduce the safety or operating effectiveness of the facility;
4. Rules contained in Rule .1109 of this Section are minimum requirements and are not intended to prohibit buildings, systems, or operational conditions that exceed minimum requirements;
5. Equivalency: Alternate methods, procedures, design criteria, and functional variations from the physical plant requirements, because of extraordinary circumstances, new programs, or unusual conditions, may be approved by the authority having jurisdiction when the facility can effectively demonstrate to the Department's satisfaction that the intent of the physical plant requirements are met and that the variation does not reduce the safety or operational effectiveness of the facility; and The Division may grant an equivalency to allow alternate methods, procedures, design criteria, or functional variation from the requirements of this Rule and the rules contained in this Section. The equivalency may be granted by the Division when a governing body submits a written equivalency request to the Division that states the following:
   a. the rule citation and the rule requirement that will not be met because strict conformance with current requirements would be impractical, extraordinary circumstances, new programs, or unusual conditions;
   b. the justification for the equivalency; and
   c. how the proposed equivalency meets the intent of the corresponding rule requirement.
(5) In determining whether to grant an equivalency [request] request, the Division shall consider whether the request will reduce the safety and operational effectiveness of the facility. The governing body shall maintain a copy of the approved equivalence issued by the Division.

(6) Where rules, codes, or standards have any conflict, the more stringent requirement shall apply.

History Note: Authority G.S. 131E-202;
Eff. February 1, 1996.
