MEMORANDUM

DATE: May 15, 2025

TO: Interested Parties

FROM: Shanah Black, Rule Review Manager *SFB*

RE: Proposed Readoption/Amendment/Repeal of Radiation Protection Commission Rules
10A NCAC 15 .0201-.0213

GS 150B-21.2 requires a rule-making body to notify certain individuals of its intent to adopt a rule. It also requires notification of the date, time and location of the public hearing on the rule and any fiscal analysis that has been prepared in connection with the proposed rule. There are 13 rules in this rulemaking action. With input from advisory committees, working groups of the N.C. Radiation Protection Commission and stakeholders, substantive changes are proposed for 10 rules for readoption with substantive changes and four rules for amendment.

The rules that are being readopted reflect agency requirements, not federal requirements. These rules are necessary because they clarify agency expectations for registrants and licensees possessing and using sources of radiation within the State. Two of the rules being amended are being amended to correct references to definitions that apply to X-Ray registrants found in one rule that is being readopted with substantive changes during this rulemaking.

The North Carolina Radiation Protection Commission has submitted form OAH 0300 to the Codifier of Rules, Office of Administrative Hearings, indicating its intent to proceed with the following rule-making actions:

10A NCAC 15 Radiation Protection

10A NCAC 15 .0201	Purpose and Scope (Amend)
